H10. Business – Town Centre Zone

H10.1. Zone description

The Business – Town Centre Zone applies to suburban centres throughout Auckland, the satellite centres of Warkworth and Pukekohe, and the rural towns of Helensville and Wellsford. The centres are typically located on main arterial roads, which provide good public transport access.

The zone provides for a wide range of activities including commercial, leisure, residential, tourist, cultural, community and civic services, providing a focus for commercial activities and growth.

Most centres are identified for growth and intensification. Expansion of these centres may be appropriate depending on strategic and local environmental considerations.

There is a range of possible building heights depending on the context. Provisions typically enable buildings of between four and eight storeys, although there may be special circumstances where other building heights are appropriate. The height opportunities within the centres will facilitate increased intensification, including office and residential activities at upper floors.

Some street frontages within the zone are subject to a Key Retail Frontage Control or General Commercial Frontage Control provisions. Key retail streets are a focus for pedestrian activity within the centre. General commercial streets play a supporting role. Development fronting these streets is expected to reinforce this function.

H10.2. Objectives

General objectives for all centres, Business – Mixed Use Zone, Business – General Business Zone and Business – Business Park Zone

(1) A strong network of centres that are attractive environments and attract ongoing investment, promote commercial activity, and provide employment, housing and goods and services, all at a variety of scales.

(2) Development is of a form, scale and design quality so that centres are reinforced as focal points for the community.

(3) Development positively contributes towards planned future form and quality, creating a sense of place.

(4) Business activity is distributed in locations, and is of a scale and form, that:

   (a) provides for the community’s social and economic needs;

   (b) improves community access to goods, services, community facilities and opportunities for social interaction; and

   (c) manages adverse effects on the environment, including effects on infrastructure and residential amenity.

(5) A network of centres that provides:
(a) a framework and context to the functioning of the urban area and its transport network, recognising:

(i) the regional role and function of the city centre, metropolitan centres and town centres as commercial, cultural and social focal points for the region, sub-regions and local areas; and

(ii) local centres and neighbourhood centres in their role to provide for a range of convenience activities to support and serve as focal points for their local communities.

(b) a clear framework within which public and private investment can be prioritised and made; and

(c) a basis for regeneration and intensification initiatives.

**Business Town Centre Zone objectives**

(6) Town centres are the focus of commercial, community and civic activities for the surrounding area and which provide for residential intensification.

(7) The scale and intensity of development in town centres is increased while ensuring development is in keeping with the planning and design outcomes identified in this Plan for the relevant centre.

(8) Town centres are an attractive place to live, work and visit with vibrant and vital commercial, entertainment and retail areas.

(9) Key Retail Frontage streets are a focus for pedestrian activity, with General Commercial Frontage streets supporting this role.

**H10.3. Policies**

*General policies for all centres, Business – Mixed Use Zone, Business – General Business Zone and Business – Business Park Zone*

(1) Reinforce the function of the city centre, metropolitan centres and town centres as the primary location for commercial activity, according to their role in the hierarchy of centres.

(2) Enable an increase in the density, diversity and quality of housing in the centre zones and Business – Mixed Use Zone while managing any reverse sensitivity effects including from the higher levels of ambient noise and reduced privacy that may result from non-residential activities.

(3) Require development to be of a quality and design that positively contributes to:

   (a) planning and design outcomes identified in this Plan for the relevant zone;

   (b) the visual quality and interest of streets and other public open spaces; and
(c) pedestrian amenity, movement, safety and convenience for people of all ages and abilities.

(4) Encourage universal access for all development, particularly medium to large scale development.

(5) Require large-scale development to be of a design quality that is commensurate with the prominence and visual effects of the development.

(6) Encourage buildings at the ground floor to be adaptable to a range of uses to allow activities to change over time.

(7) Require at grade parking to be located and designed in such a manner as to avoid or mitigate adverse effects on pedestrian amenity and the streetscape.

(8) Require development adjacent to residential zones and the Special Purpose – School Zone and Special Purpose – Māori Purpose Zone to maintain the amenity values of those areas, having specific regard to dominance, overlooking and shadowing.

(9) Discourage activities, which have noxious, offensive, or undesirable qualities from locating within the centres and mixed use zones, while recognising the need to retain employment opportunities.

(10) Discourage dwellings at ground floor in centre zones and enable dwellings above ground floor in centre zones.

(11) Require development to avoid, remedy or mitigate adverse wind and glare effects on public open spaces, including streets, and shading effects on open space zoned land.

(12) Recognise the functional and operational requirements of activities and development.

(13) In identified locations within the centres zones, Business – Mixed Use Zone, Business – General Business Zone and Business – Business Park Zone enable greater building height than the standard zone height, having regard to whether the greater height:

(a) is an efficient use of land;

(b) supports public transport, community infrastructure and contributes to centre vitality and vibrancy;

(c) considering the size and depth of the area, can be accommodated without significant adverse effects on adjacent residential zones; and

(d) is supported by the status of the centre in the centres hierarchy, or is adjacent to such a centre.
(14) In identified locations within the centre zones, Business – Mixed Use Zone, Business – General Business Zone and Business – Business Park Zone, reduce building height below the standard zone height, where the standard zone height would have significant adverse effects on identified special character, identified landscape features, or amenity.

Business – Town Centre Zone policies

(15) Provide for town centres including new town centres of different scales and locations, that:

(a) service the surrounding community’s needs for a range of uses, such as commercial, leisure, tourist, cultural, community and civic activities; and

(b) support a range of transport modes including, public transport, pedestrian and cycle networks and the ability to change transport modes.

(16) Enable significant growth and intensification in town centres, except for those centres where it would compromise the planning outcomes identified in this Plan for the relevant centre.

(17) Manage development in town centres so that it contributes to the function and amenity of the centre.

(18) Require those parts of buildings with frontages subject to the Key Retail Frontage Control to maximise street activation, building continuity along the frontage, pedestrian amenity and safety and visual quality.

(19) Require those parts of buildings with frontages subject to the General Commercial Frontage Control to achieve street activation, building continuity along the frontage, pedestrian amenity and safety and visual quality.

(20) Encourage the location of supermarkets and department stores within town centres by recognising:

(a) the positive contribution these activities make to centre viability and function;

(b) the functional and operational requirements of these activities; and

(c) where preferred built form outcomes are not achieved, the development needs to achieve a quality built environment by positively contributing to public open space, including the activation of streets.

(21) Require activities adjacent to residential zones to avoid, remedy or mitigate adverse effects on amenity values of those areas.

(22) Restrict maximum impervious area within a riparian yard in order to ensure that adverse effects on water quality, water quantity and amenity values are avoided or mitigated.
H10.4. Activity table

Table H10.4.1 Activity table specifies the activity status of land use and development activities in the Business – Town Centre Zone pursuant to section 9(3) of the Resource Management Act 1991.

### H10.5. Notification

1. Any application for resource consent for an activity listed in Table H10.4.1 Activity table above will be subject to the normal tests for notification under the relevant sections of the Resource Management Act 1991.

2. When deciding who is an affected person in relation to any activity for the purposes of section 95E of the Resource Management Act 1991 the Council will give specific consideration to those persons listed in Rule C1.13(4).

3. Any application for resource consent for the following activity will be considered without public or limited notification or the need to obtain the written approval from affected parties unless the Council decides that special circumstances exist under section 95A(4) of the Resource Management Act 1991:

   - (a) Development which does not comply with Standard H10.6.11 Minimum dwelling size.
H10.6. Standards

All activities listed as permitted or restricted discretionary in Table H10.4.1 Activity table must comply with the following standards.

H10.6.0 Activities within 30m of a residential zone

(1) The following activities are restricted discretionary activities where they are located within 30m of a residential zone and are listed as a permitted activity in the activity table:

(a) bars and taverns;

(b) drive-through restaurants;

(c) outdoor eating areas accessory to restaurants;

(d) entertainment facilities;

(e) child care centres; and

(f) animal breeding and boarding.

This standard only applies to those parts of the activities subject to the application that are within 30m of the residential zone.

H10.6.1. Building height

Purpose:

• manage the effects of building height;

• manage shadowing effects of building height on public open space, excluding streets;

• manage visual dominance effects;

• allow an occupiable height component to the height limit, and an additional height for roof forms that enables design flexibility, to provide variation and interest in building form when viewed from the street;

• enable greater height in areas identified for intensification; and

• provide for variations to the standard zone height through the Height Variation Control, to recognise the character and amenity of particular areas and provide a transition in building scale to lower density zones.

(1) Buildings must not exceed the height in metres as shown in Table H10.6.1.1 below for sites subject to the Height Variation Control on the planning maps.

(2) Any part of a building greater than the occupiable building height is to be used only for roof form, roof terraces, plant and other mechanical and electrical equipment.
Table H10.6.1.1 Total building height shown in the Height Variation Control on the planning maps

<table>
<thead>

<tr>
<td>Same as on the planning maps</td>
<td>NA</td>
<td>Exceeding 27m</td>
</tr>
</tbody>
</table>

H10.6.2. Height in relation to boundary

Purpose:

- manage the effects of building height;
- allow reasonable sunlight and daylight access to public open space excluding streets, and neighbouring zones; and
- manage visual dominance effects on neighbouring zones where lower height limits apply.

(1) Buildings must not project beyond a recession plane that begins vertically above ground level along the zone boundary. The angle of the recession plane and the height above ground level from which it is measured is specified in Table H10.6.2.1 and Figure H10.6.2.1 or Figure H10.6.2.2 below.

(2) Where the boundary forms part of an entrance strip, access site or pedestrian accessway, the standard applies from the farthest boundary of that entrance strip or access site. However, if an entrance strip, access site or pedestrian accessway is greater than 2.5m in width, the control will be measured from a parallel line 2.5m out from the site boundary.

(3) Figure H10.6.2.3 will be used to define what is a north, south, east or west boundary, where this is referred to in Table H10.6.2.1. The recession plane angle is calculated by orientating both site plan and Figure H10.6.2.3 to true north. Figure H10.6.2.3 is placed over the site plan with the outside of the circle touching the inside of the site boundary under consideration. At the point where Figure H10.6.2.3 touches the site boundary, the recession plane angle and height at which it begins, will be indicated by Table H10.6.2.1
### Table H10.6.2.1 Height in relation to boundary

<table>

</tr>
</tbody>
</table>
Figure H10.6.2.1 Height in relation to boundary

This diagram is not to scale. The actual recession plan angle and height above the ground level from which it is measured is determined in the table above.
Figure H10.6.2.2 Height in relation to boundary opposite a road

This diagram is not to scale. The actual recession plan angle and height above the ground level from which it is measured is determined in the table above.
Figure H10.6.2.3 Recession plane indicator for sites adjacent to an open space zone

H10.6.3. Building setback at upper floors

Purpose:

- provide adequate daylight access to streets;
- manage visual dominance effects on streets;
- manage visual dominance, residential amenity and privacy effects on residential zones; and
- mitigate adverse wind effects.

(1) A new building must be set back from the site frontage from the point where it exceeds the height listed in metres specified for the relevant zone in Table H10.6.3.1.
Table H10.6.3.1 Building setback at upper floors

<table>
<thead>
<tr>

<td>All other zones</td>
<td>6m</td>
<td>27m</td>
</tr>
</tbody>
</table>

Figure H10.6.3.1 Building setback at upper floors

H10.6.4. Maximum tower dimension and tower separation

Purpose: ensure that high-rise buildings:

- are not overly bulky in appearance and manage significant visual dominance effects;
- allow adequate sunlight and daylight access to streets, public open space and nearby sites;
- provide adequate sunlight and outlook around and between buildings; and
mitigate adverse wind effects.

(1) The maximum plan dimension of that part of the building above 27m must not exceed 55m.

(2) The maximum plan dimension is the horizontal dimension between the exterior faces of the two most separate points of the building.

(3) The part of a building above 27m must be located at least 6m from any side or rear boundary of the site.

Figure H10.6.4.1 Maximum tower dimension plan view

H10.6.5. Residential at ground floor

Purpose:

- protect the ground floor of buildings within centres for commercial use; and
- avoid locating activities that require privacy on the ground floor of buildings.

(1) Dwellings including units within an integrated residential development must not locate on the ground floor of a building where the dwelling or unit has frontage to public open spaces including streets.

H10.6.6. Yards

Purpose:

- provide a landscaped buffer between buildings and activities and adjoining residential zones and some special purpose zones, to mitigate adverse visual and nuisance effects; and
• ensure buildings are adequately setback from lakes, streams and the coastal edge to maintain water quality, amenity, provide protection from natural hazards, and potential access to the coast.

(1) A building or parts of a building must be set back from the relevant boundary by the minimum depth listed in Table H10.6.6.1.

**Table H10.6.6.1 Yards**

<table>
<thead>
<tr>
<th>Yard</th>
<th>Minimum depth</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rear</td>
<td>3m where the rear boundary adjoins a residential zone or the Special Purpose – Māori Purpose Zone</td>
</tr>
<tr>
<td>Side</td>
<td>3m where a side boundary adjoins a residential zone or the Special Purpose – Māori Purpose Zone</td>
</tr>
<tr>
<td>Riparian</td>
<td>10m from the edge of all permanent and intermittent streams</td>
</tr>
<tr>
<td>Lakeside yard</td>
<td>30m</td>
</tr>
<tr>
<td>Coastal protection yard</td>
<td>25m, or as otherwise specified in Appendix 6 Coastal protection yard</td>
</tr>
</tbody>
</table>

Note 1
A side or rear yard, and/or landscaping within that yard, is only required along that part of the side or rear boundary adjoining a residential zone or the Special Purpose – Māori Purpose Zone.

(2) Side and rear yards must be planted with a mixture of trees, shrubs or ground cover plants (including grass) within and along the full extent of the yard for a depth of at least 3m.

**H10.6.7. Landscaping**

Purpose:
• ensure landscaping provides a buffer and screening between car parking, loading, or service areas commercial activities and the street; and

• ensure landscaping is of sufficient quality as to make a positive contribution to the amenity of the street.

(1) A landscape buffer of 2m in depth must be provided along the street frontage between the street and car parking, loading, or service areas which are visible from the street frontage. This rule excludes access points.

(2) The required landscaping in Standard H10.6.6.7(1) above must comprise a mix of trees, shrubs or ground cover plants (including grass).

**H10.6.8. Maximum impervious area in the riparian yard**

Purpose: support the functioning of riparian yards and in-stream health.

(1) The maximum impervious area within a riparian yard must not exceed 10 per cent of the riparian yard area.
H10.6.9. Wind

Purpose: mitigate the adverse wind effects generated by tall buildings.

(1) A new building exceeding 25m in height and additions to existing buildings that increase the building height above 25m must not cause:

(a) the mean wind speed around it to exceed the category for the intended use of the area as set out in Table H10.6.9.1 and Figure H10.6.9.1 below;

(b) the average annual maximum peak 3-second gust to exceed the dangerous level of 25m/second; and

(c) an existing wind speed which exceeds the controls of Standard H10.6.9(1)(a) or Standard H10.6.9(1)(b) above to increase.

(2) A report and certification from a suitably qualified and experienced person, showing that the building complies with Standard H10.6.9(1) above, will demonstrate compliance with this standard.

(3) If the information in Standard H10.6.9(2) above is not provided, or if such information is provided but does not predict compliance with the rule, a further wind report including the results of a wind tunnel test or appropriate alternative test procedure is required to demonstrate compliance with this standard.

Table H10.6.9.1 Categories

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category A</td>
<td>Areas of pedestrian use or adjacent dwellings containing significant formal elements and features intended to encourage longer term recreational or relaxation use i.e. public open space and adjacent outdoor living space</td>
</tr>
<tr>
<td>Category B</td>
<td>Areas of pedestrian use or adjacent dwellings containing minor elements and features intended to encourage short term recreation or relaxation, including adjacent private residential properties</td>
</tr>
<tr>
<td>Category C</td>
<td>Areas of formed footpath or open space pedestrian linkages, used primarily for pedestrian transit and devoid of significant or repeated recreational or relaxational features, such as footpaths not covered in categories A or B above</td>
</tr>
<tr>
<td>Category D</td>
<td>Areas of road, carriage way, or vehicular routes, used primarily for vehicular transit and open storage, such as roads generally where devoid of any features or form which would include the spaces in categories A to C above</td>
</tr>
<tr>
<td>Category E</td>
<td>Category E represents conditions which are dangerous to the elderly and infants and of considerable cumulative discomfort to others, including residents in adjacent sites. Category E conditions are unacceptable and are not allocated to any physically defined areas of the city</td>
</tr>
</tbody>
</table>
Figure H10.6.9.1 Wind environment control

Derivation of the wind environment control graph:

The curves on the graph delineating the boundaries between the acceptable categories (A-D) and unacceptable (E) categories of wind performance are described by the Weibull expression:

\[ P(>V) = e^{-\left(\frac{v}{c}\right)^k} \]

where \( V \) is a selected value on the horizontal axis, and \( P \) is the corresponding value of the vertical axis:

and where:

- \( P(>V) \) = Probability of a wind speed \( V \) being exceeded;
- \( e \) = The Napierian base 2.7182818285
- \( v \) = the velocity selected;
- \( k \) = the constant 1.5; and
- \( c \) = a variable dependent on the boundary being defined:

\( A/B, c = 1.548 \)
B/C, c = 2.322
C/D, c = 3.017
D/E, c = 3.715

H10 Business – Town Centre Zone

H10.6.10. Outlook space

Purpose:
- to ensure a reasonable standard of visual privacy between habitable rooms of different buildings, on the same or adjacent sites; and
- manage visual dominance effects within a site by ensuring that habitable rooms have an outlook and sense of space.

(1) This standard applies to dwellings, units in an integrated residential development, visitor accommodation and boarding houses.

(2) An outlook space must be provided from the face of a building containing windows to a habitable room. Where the room has two or more external faces with windows the outlook space must be provided from the face with the largest area of glazing.

(3) The minimum dimensions for a required outlook space are as follows:
   (a) a principal living room of a dwelling or main living and dining area within a boarding house or supported residential care must have a outlook space with a minimum dimension of 6m in depth and 4m in width; and
   (b) all other habitable rooms of a dwelling or a bedroom within a boarding house or supported residential care unit must have an outlook space with a minimum dimension of 3m in depth and 3m in width.

(4) The depth of the outlook space is measured at right angles to and horizontal from the window to which it applies.

(5) The width of the outlook space is measured from the centre point of the largest window on the building face to which it applies.

(6) The height of the outlook space is the same as the floor height, measured from floor to ceiling, of the building face to which the standard applies.

(7) Outlook spaces may be within the site, over a public street, or other public open space.

(8) Outlook spaces required from different rooms within the same building may overlap.

(9) Outlook spaces may overlap where they are on the same wall plane.

(10) Outlook spaces must:
   (a) be clear and unobstructed by buildings;
(b) not extend over adjacent sites, except for where the outlook space is over a public street or public open space as outlined in H10.6.10(7) above; and

(c) not extend over an outlook spaces or outdoor living space required by another dwelling.

Figure H10.6.10.1 Required outlook space

H10.6.11 Minimum dwelling size

Purpose: to ensure dwellings are functional and of a sufficient size to provide for the day to day needs of residents, based on the number of occupants the dwelling is designed to accommodate.

(1) Dwellings must have a minimum net internal floor area as follows:

(a) 30m² for studio dwellings.

(b) 45m² for one or more bedroom dwellings.

H10.7. Assessment – controlled activities

There are no controlled activities in this zone.

H10.8. Assessment – restricted discretionary activities

H10.8.1. Matters of discretion

The Council will restrict its discretion to the following matters when assessing a restricted discretionary resource consent application:

(1) drive-through restaurants, activities within 30m of a residential zone, emergency services and service stations:
(a) the compatibility of:

(i) the effects of intensity and scale of the development arising from the numbers of people and/or vehicles using the site; and

(ii) the effects of the operation of the activity;

on the existing and expected future amenity values of the surrounding area and any practicable mitigation measures that would be appropriate to manage those effects;

(b) the effects of the design and location of parking areas and vehicle access and servicing arrangements on visual amenity of the streetscape and on pedestrian safety;

(c) the effects of location, design and management of storage and servicing facilities on the amenity values of nearby residential properties including potential visual effects, adequacy of access for service vehicles (including waste collection) and any night time noise effects; and

(d) the assessment of the above matters having regard to the need to provide for the functional requirements of the activity;

(2) new buildings and alterations and additions to buildings not otherwise provided for:

(a) the design and appearance of buildings in so far as it affects the existing and future amenity values of public streets and spaces used by significant numbers of people. This includes:

(i) the contribution that such buildings make to the attractiveness pleasantness and enclosure of the public space;

(ii) the maintenance or enhancement of amenity for pedestrians using the public space or street;

(iii) the provision of convenient and direct access between the street and building for people of all ages and abilities;

(iv) measures adopted for limiting the adverse visual effects of any blank walls along the frontage of the public space; and

(v) the effectiveness of screening of car parking and service areas from the view of people using the public space;

(b) the provision of floor to floor heights that will provide the flexibility of the space to be adaptable to a wide variety of use over time;

(c) the extent of glazing provided on walls fronting public streets and public spaces and the benefits it provides in terms of:

(i) the attractiveness and pleasantness of the public space and the amenity for people using or passing through that space;
(ii) the degree of visibility that it provides between the public space and the building interior; and

(iii) the opportunities for passive surveillance of the street from the ground floor of buildings;

(d) the provision of verandahs to provide weather protection in areas used, or likely to be used, by significant numbers of pedestrians;

(e) the application of crime prevention through environmental design principles to the design and layout of buildings adjoining public spaces;

(f) the effects of creation of new roads and/or service lanes on the matters listed above;

(g) the positive effects that landscaping, including required landscaping, on sites adjoining public spaces is able to contribute to the amenity values of the people using or passing through the public space;

(h) taking an integrated stormwater management approach; and

(i) all the above matters to be assessed having regard to the outcomes set out in this Plan and the functional requirements of the activities that the buildings are intended to accommodate;

(3) in addition to the matters for new buildings stated above the Council will restrict its discretion to the following matter in regard to:

- integrated retail developments; or
- supermarkets, department stores and large format retail where the activity or integrated retail development exceeds 1000m² gross floor area per tenancy:

(a) the manner in which these building/developments are integrated with the adjacent existing and planned future centre and zone activities and public spaces and provide for the continuity of active public frontages and associated pedestrian amenity that is appropriate to those centres and zones having regard to the outcomes set out in this Plan and the functional requirements of the activities that the buildings are intended to accommodate. This will include the effects of the design and location of parking areas, vehicle access and servicing arrangements on the visual amenity of the streetscape and on pedestrian safety;

(4) In addition to the matters for new buildings stated above the Council will restrict its discretion to the following matter in regard to:

- drive-through restaurants; or
- service stations:

(a) the effects of the location and design of:
(i) buildings and associated equipment, parking and service areas;
(ii) access for vehicles including service vehicles; and
(iii) landscaping;
on the amenity of surrounding areas (particularly residential areas), on
streetscapes and on pedestrian amenity and any methods by which those
effects can be appropriately managed;

(5) conversion of a building or part of a building to dwellings, an integrated
residential development, visitor accommodation and boarding houses:
(a) any matters that do not meet the standards set out for the activity in
Standard H10.6.10 or Standard H10.6.11 having regard to the need to
ensure a good standard of amenity within and between dwellings, visitor
accommodation, boarding houses and retirement villages;

(6) buildings that do not comply with the standards:
(a) any policy which is relevant to the standard;
(b) the purpose of the standard;
(c) the effects of the infringement of the standard;
(d) the effects on the amenity of neighbouring sites;
(e) the effects of any special or unusual characteristic of the site which is
relevant to the standard;
(f) the characteristics of the development;
(g) any other matters specifically listed for the standard; and
(h) where more than one standard will be infringed, the effects of all
infringements.

H10.8.2. Assessment criteria

The Council will consider the relevant assessment criteria below for restricted
discretionary activities:

(1) drive-through restaurants, activities within 30m of a residential zone
emergency services and service stations:
(a) for Matter H10.8.1(1)(a)(i) refer to Policy H10.3(3)(a), Policy H10.3(3)(b),
Policy H10.3(3)(c), Policy H10.3(8); Policy H10.3(15)(a); Policy H10.3(17),
Policy H10.3(18), Policy H10.3(19) and Policy H10.3(21);
(b) for Matter H10.8.1(1)(a)(ii) refer to Policy H10.3(3)(a), Policy H10.3(3)(b),
Policy H10.3(3)(c), Policy H10.3(8); Policy H10.3(15)(a); Policy H10.3(17),
Policy H10.3(18), Policy H10.3(19) and Policy H10.3(21);
(c) for Matter H10.8.1(1)(b) refer to Policy H10.3(3)(c), Policy H10.3(7), Policy H10.3(18) and Policy H10.3(19);

(d) for Matter H10.8.1(1)(c) refer to Policy H10.3(21); and

(e) for Matter H10.8.1(1)(d) refer to Policy H10.3(12);

(2) new buildings and alterations and additions to buildings not otherwise provided for:

(a) for Matter H10.8.1(2)(a)(i) refer to Policy H10.3(3)(a), Policy H10.3(3)(b) and Policy H10.3(17);

(b) for Matter H10.8.1(2)(a)(ii) refer to Policy H10.3(3)(c), Policy H10.3(18) and Policy H10.3(19);

(c) for Matter H10.8.1(2)(a)(iii) refer to Policy H10.3(4);

(d) for Matter H10.8.1(2)(a)(iv) refer to Policy H10.3(3)(a);

(e) for Matter H10.8.1(2)(a)(v) refer to Policy H10.3(7);

(f) for Matter H10.8.1(2)(b) refer to Policy H10.3(6);

(g) for Matter H10.8.1(2)(c)(i) refer to Policy H10.3.3(3)(a) and Policy H10.3(3)(b);

(h) for Matter H10.8.1(2)(c)(ii) refer to Policy H10.3(3)(a) and Policy H10.3(3)(b);

(i) for Matter H10.8.1(2)(c)(iii) refer to Policy H10.3(3)(a) and Policy H10.3(3)(b);

(j) for Matter H10.8.1(2)(d) refer to Policy H10.3(3)(c);

(k) for Matter H10.8.1(2)(e) refer to Policy H10.3(3)(c);

(l) for Matter H10.8.1(2)(f) refer to Policy H10.3(3)(b);

(m) for Matter H10.8.1(2)(g) refer to Policy H10.3(3)(c);

(n) for Matter H10.8.1(2)(h) refer to Policy E1.3(10); and

(o) for Matter H10.8.1(2)(i) refer to Policy H10.3(12);

(3) in addition to the policies for new buildings stated above the Council will have regard to the following policies when considering new buildings for the following purposes:

- integrated retail developments; or
- supermarkets, department stores and large format retail where the activity or integrated retail development exceeds 1000m² gross floor area per tenancy:
(a) refer to Policy H10.3(1), Policy H10.3(5), Policy H10.3(16) and Policy H10.3(20);

(4) in addition to the policies for new buildings stated above the Council will have regard to the following policies when considering new buildings for the following purposes:

- Drive-through restaurants; or
- service stations:

(a) refer to Policy H10.3(3)(a), Policy H10.3(3)(b), Policy H10.3(3)(c), Policy H10.3(7), Policy H10.3(8), Policy H10.3(12), Policy H10.3(15)(a); Policy H10.3(17), Policy H10.3(18); Policy H10.3(19) and Policy H10.3(21);

(5) conversion of a building or part of a building to dwellings, retirement villages, visitor accommodation and boarding houses:

(a) refer to Policy H10.3(2);

(6) buildings that do not comply with the standards:

(a) height, height in relation to boundary, building setbacks at upper floors, maximum tower dimension and tower separation:

(i) refer to Policy H10.3(3)(a), Policy H10.3(3)(b), Policy H10.3(8), Policy H10.3(13), Policy H10.3(14) and Policy H10.3(15);

(b) residential at ground floor:

(i) refer to Policy H10.3(10) and Policy H10.3(18);

(c) yards and landscaping:

(i) refer to Policy H10.3(3)(b), Policy H10.3(3)(c), Policy H10.3(7) and Policy H10.3(8);

(d) maximum impervious area in a riparian yard:

(i) refer to Policy H10.3(22);

(e) wind:

(i) refer to Policy H10.3(11);

(f) outlook space, minimum dwelling size:

(i) refer to Policy H10.3(2).

**H10.9. Special information requirements**

There are no special information requirements in this zone.
