

H18. Future Urban Zone

H18.1. Zone description

The Future Urban Zone is applied to greenfield land that has been identified as suitable for urbanisation. The Future Urban Zone is a transitional zone. Land may be used for a range of general rural activities but cannot be used for urban activities until the site is rezoned for urban purposes.

Refer to Chapter B Regional Policy Statement and Appendix 1 Structure plan guidelines when preparing structure plans and plan changes to rezone sites for urban activities.

H18.2. Objectives

- (1) Land is used and developed to achieve the objectives of the Rural – Rural Production Zone until it has been rezoned for urban purposes.
- (2) Rural activities and services are provided for to support the rural community until the land is rezoned for urban purposes.
- (3) Future urban development is not compromised by premature subdivision, use or development.
- (4) Urbanisation on sites zoned Future Urban Zone is avoided until the sites have been rezoned for urban purposes.

H18.3. Policies

- (1) Provide for use and development which supports the policies of the Rural – Rural Production Zone unless that use and development is inconsistent with policies H18.3(2) to (6).
- (2) Enable activities that are reliant on the quality of the soil or require a rural location to operate or which provide for the day to day needs of the local rural community.
- (3) Require subdivision, use and development to maintain and complement rural character and amenity.
- (4) Avoid subdivision that will result in the fragmentation of land and compromise future urban development.
- (5) Prevent the establishment of more than one dwelling on a site except for the provision for minor dwellings and workers' accommodation.
- (6) Avoid subdivision, use and development of land that may result in one or more of the following:
 - (a) structures and buildings of a scale and form that will hinder or prevent future urban development;
 - (b) compromise the efficient and effective operation of the local and wider transport network;

- (c) require significant upgrades, provisions or extension to the wastewater, water supply, or stormwater networks or other infrastructure;
- (d) inhibit the efficient provision of infrastructure;
- (e) give rise to reverse sensitivity effects when urban development occurs;
- (f) give rise to reverse sensitivity effects in relation to existing rural activities or infrastructure; or
- (g) undermine the form or nature of future urban development.
