Takanini, within blocks surrounded by: Walters, Cosgrave, Grove and Old Wairoa Roads; Hamlin, Cosgrave and Old Wairoa Roads; and Old Wairoa, Papakura – Clevedon and Cosgrave Roads specifically: Lot 1 DP21849, Lot 2 DP21849, Lot 4 DP188918, Lot 2 DP 55480, Lot 3 DP55480, Lot 2 DP159502, Lot 1 DP69608, Lot 2 DP69608, Lot 200 DP490095; 50 metre section of Cosgrave Road adjacent to 84 Cosgrave Road 25 metre section of Old Wairoa Road east of Ancroft Street

400 Tawharanui Regional Park

Designation Number	400
Requiring Authority	Auckland Council
Location	1181 Takatu Road, Takatu Peninsula, Tawharanui
Rollover Designation	Yes
Legacy Reference	Designation 201, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track

Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

403 Muriwai Regional Park

Designation Number	403
Requiring Authority	Auckland Council
Location	447 Motutara Road, Muriwai
Rollover Designation	Yes
Legacy Designation	Designation 205, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings,	Construction and	The construction of utility services and minor

structures and utility services, including drainage systems	maintenance of minor recreational structures and utility services	recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this

conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

404 Scandrett Regional Park

Designation Number	404
Requiring Authority	Auckland Council
Location	114 Scandrett Road, Mullet Point, Mahurangi East
Rollover Designation	Yes
Legacy Designation	Designation 206, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the

		edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: <ul style="list-style-type: none"> i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage

values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT be advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

415 Long Bay Regional Park

Designation Number	415
Requiring Authority	Auckland Council
Location	2000 Beach Road, Long Bay
Rollover Designation	Yes
Legacy Designation	Designation 117, Auckland Council District Plan (North Shore Section) 2002; and Designation 180, Auckland Council District Plan (North Shore Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings,	Construction and	The construction of utility services and minor

structures and utility services, including drainage systems	maintenance of minor recreational structures and utility services	recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² -in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of

the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

416 Te Rau Puriri Regional Park

Designation Number	416
Requiring Authority	Auckland Council
Location	2911 South Head Road, South Head
Rollover Designation	Yes
Legacy Designation	Designation 210, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track

Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. 417 Rosedale Landfill

Designation Number	417
Requiring Authority	Auckland Council
Location	62 Greville Road, Albany
Rollover Designation	Yes
Legacy Reference	Designation 116, Auckland Council District Plan (North Shore Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Refuse disposal.

The Rosedale Landfill and Constellation Drive Transfer Station are designated by the Auckland Regional Council pursuant to the powers given to it by Section 707AA of the Local Government Act 1974. Operation and management of these facilities is vested in Northern Disposal Systems Ltd, a LATE of the Auckland Regional Services Trust.

The Rosedale Landfill currently receives all of the refuse from within the city, from within the North Shore and from various localities beyond the North Shore. The landfill has sufficient capacity to continue operations past the turn of the century. The Council has long held the view that the Rosedale Landfill is not well located to serve as a regional refuse facility because of its impact on local residential properties, its likely effect upon the planned development of the Greville Road area for housing and upon the Council's desire to achieve high urban environmental standards throughout the Albany Basin. Consequently, the Council has resisted proposals for major extensions to the Rosedale Landfill, and has instead given planning consent to two limited extensions only. These consents recognised and sought to overcome the short-term difficulties facing the Auckland Regional Council in disposing of the North Shore's refuse.

The planning approval given by the Council to the second extension stipulated that there was to be no further expansion of the Rosedale Landfill beyond the limits of that consent and imposed a number of conditions on the establishment, operation and management of the landfill. Issues relating to the landfill designation were again considered in 1996 during the hearing of submissions to the proposed District Plan. As a result, consent to dispose of refuse in the Rosedale Landfill expires during the year 2005. The Development Plan for the landfill, showing the finished landform, and the conditions attached to its operation and management are incorporated within the District Plan as Appendix 14H. A Management Plan for the landfill is being prepared by Northern Disposal Systems Ltd in consultation with the Council. This Plan will set out the approved guidelines for the management and operation of the landfill.

The Council's longterm intention is for the site to be a recreation reserve.

. A possible end use proposal is shown in Appendix 14I. The Council does, however, reserve its right to develop and use the facility in a manner appropriate to the circumstances existing at the time in the future when development and use of the landfill for urban type purposes is possible.

Conditions

1. Major Control Requirements

1.1 The development of the Rosedale Landfill (hereinafter referred to as the 'landfill') shall proceed in accordance with the provisions of the Development Plan included in Appendix 14H.

1.2 The landfill shall be operated in conjunction with a refuse transfer station and shall not be open to the general public except in an extreme emergency.

1.3 All vehicles shall enter and leave the landfill from Greville Road and no vehicle access shall be permitted from Rosedale Road.

1.4 Except insofar as is necessary to construct vehicle access as soon as practical from the Stage 1 extension to Greville Road, as required in Condition 4 of Major Control Requirements of the Consent Order for the Rosedale Landfill Stage 1 Extension, the Auckland Regional Council shall not commence landfill until both the present landfill and the Stage 1 extension are full.

1.5 There shall be no consent given at any stage in the future to the further extension of refuse disposal facilities at or within the vicinity of Rosedale Road.

1.6 That refuse disposal on the landfill site shall cease in the year 2005.

1.7 The landfill shall be operated and developed so that the final levels of refuse landfill and restoration works shall comply with the levels depicted on the Development Plan, except insofar as any modification may be agreed between the ARC and the city Council. It is acknowledged that this obligation shall be satisfied as soon as practicable after the refuse landfill is complete and following satisfaction of the obligation at that time, the ARC shall not have a continuing obligation in this regard.

1.8 All works of an engineering nature shall require approval of the City Engineer.

2. Establishment Works

2.1 The ARC shall obtain all necessary water rights from the Regional Water Board for the collection and disposal of leachate and shall comply with the terms and conditions of these rights.

2.2 The ARC shall obtain all necessary water right and engineering approvals from the city Council for sediment erosion and silt collection, and for the construction of the proposed culvert to carry the flow of the tributary to the Oteha Stream through the landfill site, as well as for such connecting pipes as are required for the tributary stream in the culvert beneath Greville Road, the runoff from existing landfill areas, natural seepage and the like.

2.3 The ARC shall place a seal of clay compacted to a minimum depth of one metre over the top of the culvert. This clay seal shall be provided to the satisfaction of the Regional Water Board to ensure that leachate is directed to the leachate drain, and to the satisfaction of the city Council to ensure that sound engineering practice is followed.

2.4 The ARC shall obtain engineering approval from the city Council for an overland flow path for the tributary stream, this flow path being maintained at each stage in the operation of the landfill as well as in the ultimate development of the land for recreational purposes. However, the ARC is advised

that it may be necessary for the Council to obtain the approval of the Regional Water Board to a modification of Water Right No. 833824 held by the Council.

2.5 The overland flow path shall be designed to come into operation immediately the upstream detention pond has reached its design peak level.

2.6 The ARC shall construct drains for the collection of leachate. These drains shall be provided to the satisfaction of the Regional Water Board to convey leachate from the landfill to a proposed leachate recirculating system or to the existing 80mm leachate pumping main to the North Shore Drainage Board treatment plant and to the satisfaction of the city Council to ensure that sound engineering practice is followed.

2.7 The entrance and access road off Greville Road, including such widening of the carriageway as may be necessary, shall be designed, constructed and sealed to the satisfaction of the city Council.

2.8 The internal road giving access to the disposal site shall be sealed from Greville Road to the wheelwash.

2.9 The wheelwash facility shall be designed to the satisfaction of the city Council and maintained in a manner that at all times ensures the effective cleaning of vehicles leaving the landfill.

2.10 The excavation of cover material by earthmoving machinery shall only occur between the hours of 7.00 am and 8.30 pm, Mondays to Saturdays. There shall be no excavation on Sundays.

2.11 The ARC shall ensure that all earthmoving machinery is equipped with effective mufflers.

2.12 Screen planting along the Greville Road frontage and eastern boundary of the landfill shall commence during the first planting season after the requirement is finally confirmed. In this regard a planting plan shall be prepared by the ARC and approved by the city Council prior to planting commencing. The planting plan shall determine which existing trees and vegetation shall be retained.

2.13 Such fire breaks shall be provided around the edge of the disposal site as may be required by the New Zealand Fire Service.

2.14 All signage shall be the subject of separate planning approval.

3. Landfill Management and Operations

3.1 All landfill operations shall be under the direct supervision of the ARC.

3.2 At the end of each day refuse shall be covered either with soil or fine mesh netting. The manner for dealing with refuse left overnight shall be monitored and the Medical Officer of Health shall have the right to direct that it be covered with soil should he/she consider that this practice is necessary.

3.3 The ARC shall deal with hazardous wastes in accordance with its Refuse Disposal Baylaw 1976.

3.4 Immediate and effective action shall be taken to deal with refuse that is particularly objectionable because of smell.

3.5 Immediate and effective action shall be taken to eliminate vermin or insect infestation should this become evident. Where necessary, this action shall include an ongoing programme of eradication.

3.6 Should the ARC devise an acceptable technique for effectively stopping seagulls from gathering at the landfill, it shall apply this technique immediately.

3.7 Temporary contour drains shall be formed around the landfill to the satisfaction of the city Council to intercept stormwater flowing from higher ground and areas of covered refuse.

3.8 Permanent stormwater drainage for the completed landfill shall be installed as required to the satisfaction of the city Council.

3.9 Landfill operations including earthworks associated with land-filling shall be carried out under the supervision of an appropriately qualified person who shall ensure that these works are undertaken in a manner that ensures the stability of the land and all pipelines contained therein.

3.10 Refuse shall be conveyed to the landfill in totally enclosed vehicles. The only exception to this shall be in the event that the landfill is opened to the general public in an extreme emergency. In this event, the ARC shall charge an additional fee for loads which, in the opinion of the ARC staff, are insecure.

3.11 Windblown litter shall be contained effectively within the landfill by the erection of nets and screens, and these shall be cleared of litter at weekly intervals or more frequently as necessary.

3.12 The ARC shall carry out patrols along the Greville Road and State Highway 1 frontage of the landfill to pick up:

- a. Litter blown beyond the nets and screens at weekly intervals or more frequently as necessary; and
- b. Refuse illegally deposited at the roadside as required.

3.13 The ARC shall ensure that all operating equipment used on the landfill is equipped with effective mufflers.

3.14 No activity shall create:

a. any intrusive odour which is, or is likely to be, either objectionable or offensive in the opinion of an enforcement officer, and is able to be detected beyond the boundary of any site within a residential, future urban, rural or open space zone;

b. dust which is, or is likely to be, either objectionable or offensive in the opinion of an enforcement officer, beyond the site boundary of the activity, except that this rule shall not apply to any construction, maintenance or demolition activities provided that the Best Practical Option is applied and all practical measures are applied to avoid, remedy or mitigate any dust nuisance beyond the boundary of the activity.

c. noise (rating) levels arising from the designated activity measured within the boundary of the designation exceeding 70dB LAeq. Where noise generated by the designated activity is received outside the designation boundary, the activity generating the noise must comply with the noise limits and controls of the different zone at the receiving site.

4. Completion Works

4.1 The ARC shall place a minimum of 500mm of soil on the finished surfaces of the landfill as soon as practicable after refuse land-filling is complete and sow the area with grass.

4.2 The ARC shall have a continuing responsibility for leachate collection and disposal beyond the life of the landfill as a disposal facility until such time as the Regional Water Board gives written notice to the Council that this is no longer required.

4.3 Should sewerage reticulation be provided in the vicinity of the landfill prior to the Regional Water Board giving notice to the Council under Clause 4.2 above, the Council may require the leachate drains to be connected to this reticulation at the ARC's cost.

4.4 The City Council is concerned as to the eventual ownership of the completed landfill and its further development (after proper completion of the landfill works) to a state suitable for recreational or associated public use.

Attachments

14I Possible End Use Proposal for Refuse and Disposal Site at Rosedale Road

418 Waitakere Ranges Regional Parkland

Designation Number	418
Requiring Authority	Auckland Council
Location	300 Scenic Drive, Titrangi; 601 Huia Road, Parau; and, Whatapu Road, Huia, Waiaatarua
Rollover Designation	Yes
Legacy Designation	Designation WCCRP, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the

		edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: <ul style="list-style-type: none"> i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;

- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT be advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

419 Waikumete Cemetery

Designation Number	419
Requiring Authority	Auckland Council
Location	4128A Great North Road, Glen Eden
Rollover Designation	Yes
Legacy Designation	Designation C1, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Cemetery and crematorium.

Conditions

Outline Plan of Works

1. Before any works, including new buildings, or new interments, or other vegetation alteration or removal in excess of the permitted activity within any Significant Ecological Area (SEA) are undertaken an Outline Plan of Works shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 2, from requiring an outline plan of works. The Outline Plan of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan of Works.

Exemptions

2. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place or are within an SEA, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of cemetery infrastructure		Nature of works
Burials	The construction of works associated with interments, including ornamental gardens.	Structures, such as burial plots, berms, headstones and mausoleums.

Paths and tracks	Construction and maintenance of paths and tracks in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of paths and tracks up to 2.5m in width, including the construction of structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing paths and tracks involving: <ul style="list-style-type: none"> i. Water tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of native vegetation up to 1m from the edge of the track.
Minor buildings, structures and utility services, including drainage systems	Construction and maintenance of minor buildings and structures and utility services	The construction of utility services and minor structures, such as notice boards, information kiosks, signs, outdoor seating, entrance gates, shade shelters, pavilions and toilet blocks.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of native vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Vegetation	Management of vegetation for specified reasons i, ii or iii.	Vegetation management involved in: <ul style="list-style-type: none"> i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Cemetery Management Plan

Cultural / Heritage / Archaeological/ SEA vegetation

3. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item), or vegetation alteration or removal in excess of the permitted activity controls within any SEA, an outline plan of works is required.

The following (as applicable) shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place;
- b. An assessment of the effects of the vegetation alteration or removal on the natural heritage values of the SEA vegetation;
- c. A consideration of alternative methods and/or appropriate mitigation to prevent

or avoid damage, loss or destruction of the values of the historic heritage place or SEA vegetation.

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for the purpose of a cemetery but is to conserve and protect the recognised natural, cultural and historic values that significantly contribute to the cemetery's setting and botanical and ecological importance.

Condition 3 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place or natural values of the SEA vegetation; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Cemetery Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.
- iv. Where there is a vegetation management plan or similar plan that has been prepared for the management of the natural areas and the proposed new works are in accordance with this management plan.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from appropriate staff within council's Heritage Unit or Auckland Plan, Strategy, and Research Department, Department of Conservation, or Auckland Botanical Society as applicable to the works prior to undertaking the exemptions to Condition 2 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub- subsurface marine and terrestrial deposits, building or structures) is subject to an authority under the Heritage New Zealand Pouhere Taonga Act 2014. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (Heritage NZ) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the Heritage NZ advised of the discovery. The Heritage NZ will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising

the Heritage NZ, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Maori and European origin or human burials.

4. The Cemetery Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a cemetery.

420 Swanson Cemetery

Designation Number	420
Requiring Authority	Auckland Council
Location	54 O'Neills Road, Swanson
Rollover Designation	Yes
Legacy Designation	Designation C2, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Cemetery.

Conditions

Outline Plan of Works

1. Before any works, including new buildings, are undertaken an Outline Plan of Works shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 1, from requiring an outline plan of works. The Outline Plan of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan of Works.

Exemptions

2. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of cemetery infrastructure		Nature of works
Burials	The construction of works associated with interments, including ornamental gardens.	Structures, such as burial plots, berms, headstones and mausoleums.
Paths and tracks	Construction and maintenance of paths and tracks in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of paths and tracks up to 2.5 metres in width, including the construction of structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing paths and tracks involving: i. Water tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of native vegetation up to 1

		metre from the edge of the track.
Minor buildings, structures and utility services, including drainage systems	Construction and maintenance of minor buildings and structures and utility services	The construction of utility services and minor structures, such as notice boards, information kiosks, signs, outdoor seating, entrance gates, shade shelters, pavilions and toilet blocks.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of native vegetation up to 1 metre from the edge of the car park or road, or within the car park for safety reasons
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: <ul style="list-style-type: none"> i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Cemetery Management Plan

3. Cultural / Heritage / Archaeological

Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for the purpose of a cemetery but is to conserve and protect the recognised natural, cultural and historic values that significantly contribute to the cemetery setting.

This condition (Condition 2) will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 2 in order to confirm an outline plan is not required.
2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.
3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.
4. The Cemetery Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a cemetery.

421 Alderman Drive Local Park

Designation Number	421
Requiring Authority	Auckland Council
Location	9-15 Alderman Drive, Henderson
Rollover Designation	Yes
Legacy Designation	Designation OS5, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Local park including esplanade reserves, accessways and walkways. Works include parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. An Outline Plan of Works for any works or development shall include an assessment of effects and appropriate mitigation of impacts on the landscape values of the site.

Attachments

No attachments.

422 Sunnyvale Road Local Park

Designation Number	422
Requiring Authority	Auckland Council
Location	1-19 Sunnyvale Road, Swanson
Rollover Designation	Yes
Legacy Designation	Designation PR4, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Local park including esplanade reserves, accessways and walkways. Works include parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. An outline plan of works for any works or development shall include an assessment of effects and appropriate mitigation of impacts in relation to the following matters: Noise, Natural Hazards, Hazardous facilities and contaminated sites, Air discharges and odour, and dust, glare and vibration.

Attachments

No attachments.

423 Glen Road Park Service Centre

Designation Number	423
Requiring Authority	Auckland Council
Location	75 Glen Road, Massey
Rollover Designation	Yes
Legacy Designation	Designation PSC1, Auckland Council District Plan (Waitakere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Park service centre.

Conditions

1. An outline plan of works for any works or development shall include an assessment of effects and appropriate mitigation of impacts in relation to the following matters: Noise, natural hazards, hazardous facilities and contaminated sites, air discharges and odour, and dust, glare and vibration.

Attachments

425 Waitākere Resource Recovery Park

Designation Number	425
Requiring Authority	Auckland Council
Location	50 The Concourse, Henderson
Rollover Designation	Yes
Legacy Reference	Designation BF1, Auckland Council District Plan (Waitākere Section) 2003
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Resource Recovery Park that maximises the diversion of waste from landfill. This includes all activities and auxiliary activities associated with waste minimisation, resource recovery, reuse, and waste management including:

- separation of reusable, recyclable materials and green (or organic) waste
- consolidation of commercial and residential waste
- consolidation and site storage of hazardous waste
- sale of reusable and recyclable materials/items
- upcycling
- co-location of businesses using recovered materials
- waste minimisation education
- innovation, including testing and implementing new technologies and processes to minimise waste and maximise resource recovery

Conditions

Noise

1. The noise (rating) level and maximum noise level arising from the Waitākere Resource Recovery Park must not exceed 70 dB LAeq when measured or assessed within the boundary of any adjacent site zoned Business – Heavy Industry.

Construction Management Plan

2. A construction management plan shall be prepared and submitted with an outline plan of works for any major site works.

Accidental Discovery Protocol

3. Should any proposed earthworks result in the identification of any previously unknown sensitive materials, which is not expressly provided for by any consent or any other statutory authority, the following Accidental Discovery protocols shall be complied with.

For the purpose of this condition, 'sensitive material' means:

- i. human remains and kōiwi
- ii. an archaeological site
- iii. a Māori cultural artefact/taonga tuturu

- iv. a protected New Zealand object as defined in the Protected Objects Act 1975 (including any fossil or sub-fossil);
 - v. evidence of contaminated land (such as discolouration, vapours, asbestos, separate phase hydrocarbons, landfill material or significant odour)
 - vi. lava cave greater than 1m in diameter on any axis.
- a. Where the sensitive material is archaeological, all earthworks will cease in the immediate vicinity (at least 20m from the site of the discovery) while a suitably qualified archaeologist is consulted to establish the type of remains.

If the material is identified by the archaeologist as human, archaeology or artefact, earthworks must not be resumed in the affected area (as defined by the archaeologist). The requiring authority must immediately advise Auckland Council, Heritage New Zealand Pouhere Taonga and Police (if human remains are found) and arrange a site inspection with these parties.

If the discovery contains kōiwi, archaeology or artefacts of Maori origin, representatives from the relevant Mana Whenua Group are to be provided information on the nature and location of the discovery.

The requiring authority shall not recommence works until approved by Auckland Council.

Advice notes:

1. *For guidance and advice on managing the discovery of archaeological features, contact the Team Leader Cultural Heritage Implementation on 09 301 0101.*
2. *In respect of the accidental discovery of sensitive materials which shows evidence of contaminated land, the requiring authority will need to obtain any necessary regional consent and/or meet the National Environmental Standards for Assessing and Managing Contaminants in Soil to Protect Human Health 2011.*

426 Te Muri Regional Park

Designation Number	426
Requiring Authority	Auckland Council
Location	184 Hungry Creek Road, Mahurangi West
Rollover Designation	Yes
Legacy Designation	Designation 209, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and	Construction and maintenance of minor	The construction of utility services and minor recreational structures, such as notice boards,

utility services, including drainage systems	recreational structures and utility services	information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;

- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits,

old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

430 Regional Parkland at Pakiri

Designation Number	430
Requiring Authority	Auckland Council
Location	Southern part of Pakiri Coast (vicinity of Witten Road, Spencer Road and M Greenwood Road)
Rollover Designation	Yes
Legacy Designation	Designation 208, Auckland Council District Plan (Rodney Section) 2011
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track

Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in

appearance to those originally used, which does not detract from those features for which the place has been scheduled;

ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

5. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;

ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);

iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and

iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and

ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

431 Regional Parkland at Pakiri

Designation Number	431
Requiring Authority	Auckland Council
Location	Pakiri River Road, Pakiri Coast
Rollover Designation	No
Legacy Designation	N/A
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure	Nature of works
--	-----------------

Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: <ul style="list-style-type: none"> i. Water Tables and track drainage Track surfaces Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards

Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan Management of farm woodlots, including their harvest
-------------------	--	--

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

5. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic Auckland Unitary Plan Operative in part

engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

7. Auckland Council is deemed to have given its written approval (as requiring authority) under the RMA to Vector Limited, or any other party Vector may authorise, to carry out any works needed to operate, maintain, or upgrade Vector Limited's infrastructure. This approval is contingent upon Vector Limited having a property interest or statutory right under the Electricity Act in the land on which the infrastructure is located, whether or not that is authorised by an existing Vector designation.

In carrying out such works Vector, or any other party authorised by Vector will:

- (a) give Auckland Council 10 days' written notice of its intention to undertake such works, except for emergency works (as defined in the National Code of Practice for Utility Operators' Access to Transport Corridors 2011, or any replacement of the Code), when prior notice is not required. In the case of emergency works, notice of the works must be given to Auckland Council as soon as is as reasonably practicable before or after the works have been completed;
- (b) meet any necessary health and safety requirements;
- (c) undertake, as far as reasonably practicable, the works in a way that avoids or minimises any adverse effects on the operation of the regional park; and
- (d) remedy at Vector's cost any physical damage Vector has caused to the regional park as soon as reasonably practicable after completion of the works.

Advice Notes

7. The Requiring Authority and operational staff are encouraged to seek advice from Council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

8. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub- subsurface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform Auckland Unitary Plan Operative in part

the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

9. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

10. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

11. Vector has acknowledged that Auckland Council takes no responsibility for any damage resulting from the Vector works approved pursuant to Condition 7. For the avoidance of doubt, Auckland Council is not giving requiring authority approval for any works beyond the scope of any existing property right, designation, or rights under the Electricity Act 1992.

432 Te Arai Regional Park

Designation Number	432
Requiring Authority	Auckland Council
Location	Te Arai Point Road, Te Arai
Rollover Designation	No
Legacy Designation	N/A
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage Track surfaces Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

1. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of

the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

5. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

7. Auckland Council is deemed to have given its written approval (as requiring authority) under the RMA to Vector Limited, or any other party Vector may authorise, to carry out any works needed to operate, maintain, or upgrade Vector Limited's infrastructure. This approval is contingent upon Vector Limited having a property interest or statutory right under the Electricity Act in the land on which the infrastructure is located, whether or not that is authorised by an existing Vector designation.

In carrying out such works Vector, or any other party authorised by Vector will:

- (a) give Auckland Council 10 days' written notice of its intention to undertake such works, except for emergency works (as defined in the National Code of Practice for Utility Operators' Access to Transport Corridors 2011, or any replacement of the Code), when prior notice is not required. In the case of emergency works, notice of the works must be given to Auckland Council as soon as is reasonably practicable before or after the works have been completed;
- (b) meet any necessary health and safety requirements;
- (c) undertake, as far as reasonably practicable, the works in a way that avoids or minimises any adverse effects on the operation of the regional park; and
- (d) remedy at Vector's cost any physical damage Vector has caused to the regional park as soon as reasonably practicable after completion of the works.

Advice Notes

7. The Requiring Authority and operational staff are encouraged to seek advice from Council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

8. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub- subsurface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

9. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

10. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

11. Vector has acknowledged that Auckland Council takes no responsibility for any damage resulting from the Vector works approved pursuant to Condition 7. For the avoidance of doubt, Auckland Council is not giving requiring authority approval for any works beyond the scope of any existing property right, designation, or rights under the Electricity Act 1992.

500 Auckland City Art Gallery

Designation Number	500
Requiring Authority	Auckland Council
Location	1 Kitchener Street, Auckland Central
Rollover Designation	Yes
Legacy Designation	Designation 306, Auckland Council District Plan (Central Area) 2005
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

This designation provides for the development, operation and maintenance of Auckland Art Gallery Toi o Tamaki and ancillary activities. The development works encompassed by this designation principally involve excavation, seismic strengthening, heritage conservation (including restoration) demolition of infill buildings, alterations and extensions to the Art Gallery building. The existing interior and plant spaces will be modernised to increase the display and temporary exhibition space and related front-and back-of-house spaces, and to improve connections within and adjacent to the Art Gallery building. The principal activities of the Auckland Art Gallery include the collection, research and display of works of art and their associated interpretation, management and conservation. Closely related ancillary activities include the operation of a research library and the delivery of education and public programmes, together with the provision of visitor amenities including a shop, a cafe, a gallery shop and function and event facilities.

Conditions

Plans and Information

1. The height, shape, and bulk of the proposed building works shall be carried out generally in accordance with the plans listed in the table below and which are comprised in Appendix 1 to these conditions (*these plans available on request*):

Drawing Title	Drawing number	Revision
Urban Plan	DP01	C
Designation Plan	DP02	A
Basement Floor Plan	DP03	C
Lower Ground Floor Plan	DP04	C
Ground Floor Plan	DP05	C
Mezzanine Floor Plan	DP06	C
Level 1 Floor Plan	DP07	C
Level 2 Floor Plan	DP08	C
Level 3 Floor Plan	DP09	C
Roof Plan	DP10	D
West Elevation	DP11	D
North Elevation	DP12	D

East Elevation	DP13	D
Section A	DP14	C
Section B	DP15	D
Section C + Section D	DP16	D
Section E	DP17	D
Existing/Proposed Plan	DP18	C
Existing/Proposed West Elevation	DP19	D
Existing Loading and External Public Space	DP20	D
Proposed Loading and External Public Space	DP21	D
Existing Water Features	DP22	C
Proposed Water Features	DP23	C
Section F	DP24	B

Building height

2. The requiring authority shall engage a licensed cadastral surveyor to certify to the Manager Planning - Central/Islands in writing, both at the construction of framing to the upper level roofs and at the completion of the upper level roofs, that the building work completed at each of these stages is in accordance with the indicated RLs (reduced levels) and dimensions on the plans listed in condition 1 above.

Should any height infringements result:

- a. the certificate provided by the licensed cadastral surveyor shall specify the relevant difference in height; and
- b. the upper level roofs will be required to be reduced in height to comply with the applicable heights indicated on the approved plans in Appendix 1 (plans available on request).

The RL's and dimensions on the plans listed in condition 1 above shall prevail where there is any difference between them and what may be demonstrated by scaling from drawings.

External Glazing

3. The external vertically glazed surfaces of the Art Gallery North Atrium shall have, after the application of a soft low-E coating, a visible light transmission of no less than 81% and a visible light reflection of no greater than 9%. Roller blinds, drapes, curtains, banners, large flat art works and other objects that would prevent there being any visibility through the Art Gallery North Atrium of Albert Park from Kitchener Street shall not be used or installed in the Art Gallery North Atrium.

For the avoidance of doubt, this condition shall not prevent the floor-based display or suspension of works of art in the Art Gallery North Atrium. Any work of art in the Art Gallery North Atrium that partially obscures visibility of Albert Park through the Art Gallery North Atrium as viewed from a mid-point on Upper Khartoum Place, Kitchener Street (as specified in the attached illustration) shall be temporary in nature, with the display period not exceeding 12 months for that work. Any temporary work(s) of art in the Art Gallery North Atrium shall allow at least 60 percent of the views of Albert park to be maintained through the east window of the Art Gallery North Atrium as viewed from that same mid-point on Upper Khartoum Place, Kitchener Street.

Prior to the Building Consent being issued for the construction of the Art Gallery new extensions, the

requiring authority shall submit for the approval of the appointed independent heritage architect, Diane Hatada Jones, a schedule of external glazed surfaces together with details and specifications of the glazing systems designed for the remainder of the proposed Art Gallery new extensions (the areas excluding the North Atrium).

Note: With regard to the external glazed surfaces for the remainder of the proposed Art Gallery new extensions it is expected that the glass selected shall be appropriate for use in a functioning art museum which includes close environmental controlled interior gallery space. It is also expected that the glass selected for new glazing shall be sympathetic in appearance to the original heritage fabric of the Art Gallery. However the evaluation and approval of the schedule of external glazed surfaces should only be concerned with significant appearance issues and not fine level details. Existing windows to the heritage gallery will retain the current glass unless replacement of breakages is required, in which case the new material shall be a close match to that replaced.

Heritage

4.No work is to be undertaken on site for any demolition of original fabric until detailed drawings and specifications for the ensuing work have been completed and written approval has been subsequently obtained from the appointed independent heritage architect, Diane Hatada Jones, particularly in relation to the following matters:

- a. The emerging revised design for the south atrium and its interior components;
- b. Subject to condition 7 below (which applies to the exposed roof surface over the daylit gallery) the exterior, design and general appearance of roof plan elements, and in particular of structures or components that are ,elevated above the general new roof surfaces;
- c. The visibility of the East Gallery as seen from Albert Park, in relation to the evolving design and materials of the surrounding new gallery structure;
- d. The detailed design of, and use of materials in, the proposed raised East Gallery floor panels and their edges, bridging elements, architectural restoration, and lighting, to the intent that the original form and proportions of the East Gallery remain visually evident despite the new raised floor panels, and that the addition of the floor panels is reversible leaving the restored East Gallery intact, should such an action ever be contemplated;
- e. The detailed ground-level interface between Albert Park and new gallery elements;
- f. The on-going design and material resolution of the stone-clad base to the proposed northern building elements, to ensure a simple but legible relationship and visual narrative with the old Kitchener wing;
- g. The location, nature and impact of all seismic strengthening;
- h. The restoration of the East Gallery ceiling skylight, including the surviving maintenance gantry inside the roof lantern;
- i. The extent and location of major external gallery promotional, directional and other signage where this has a potential visual or physical impact on historic components of the gallery or Albert Park;
- j. The detailed design and alignment of the amphitheatre proposed for the north-eastern corner of the new northern wing in relation to its ground excavation impact on the park and nearby major trees;
- k. The design and location of pedestrian pathways in the entrance forecourt and at the northern end of the building between Kitchener Street and Albert Park to ensure visual and physical connectivity between Kitchener Street, the Art Gallery and Albert Park.

5.An investigation shall be conducted in locations agreed with the appointed independent heritage architect. Diane Hatada Jones , in respect of the possibility of surviving but hidden architectural detail and its adequate recovery or restoration in authentic form inside spaces of the 1887 Grainger and D'Ebro structures and the East Gallery.

6.An investigation shall be carried out, in consultation with the appointed independent heritage

architect, Diane Hatada Jones, during project excavations in respect of the known entrances off Kitchener Street to the World War II tunnel system under Albert Park and, if considered appropriate by the appointed independent heritage architect, Diane Hatada Jones, provision for a limited form of access to the tunnels from within the Art Gallery building shall be made.

7. The material, colour, and tone of the exposed roof surface over the daylight gallery shall be the subject of appropriate visual assessment and be selected, to the approval in writing of the appointed independent heritage architect, Diane Hatada Jones, prior to its installation. This new roof shall be visually minimised by being a close visual match to the dark tones of the backdrop trees and to the general hues of the slate surfaces and metal flashings on the existing Grainger and D'Ebro gallery roof, as seen in the foreground in the heritage views from Wellesley Street between Elliott and Queen Streets. In regard to the above, "tones" means lightness or darkness but not colour; and "hues" means colours but not lightness or darkness.

8. The surrounds of the services (cooling) tower identified in plan drawing number DP10 Rev C listed in condition 1 above shall comprise semi-opaque, fritted, or frosted frameless glass and shall be the subject of appropriate visual assessment and be selected to the approval in writing of the appointed independent heritage architect, Diane Hatada Jones.

9. The appointed independent heritage architect, Diane Hatada Jones is to be advised of adequately in advance, and invited to be present at, regular site meetings with the contractor during the construction phase to enable appropriate consultation with Council staff and advisers and monitoring on all aspects of the project as it impacts on the heritage values of the scheduled building.

10. An illustrative record consisting of photographs and drawings is to be made, by an appropriately qualified and experienced conservation architect, of both the building and its surrounds, particularly the areas subject to alteration, prior to the proposed works commencing on site. Once during the project and also on completion of the project. Each internal and external space or element shall be photographically recorded from one or more locations chosen so that the locations are accurately also available in the finished project, thus producing exactly equivalent 'before', 'during' and 'after' archival images. This publication, to also include a comprehensive record of images of the building from previous eras, is to be presented in bound form for Auckland Council records and a further copy of this record shall be available in the Auckland Art Gallery library.

11. Method statements must be agreed in writing with the of the appointed independent heritage architect, Diane Hatada Jones for all works which necessitate the protection of heritage fabric prior to construction commencing.

Archaeological

12. A plan at A1 scale is to be produced before work commences and kept on display on site showing current and proposed structures, overlain by known historic walls, paths, buildings, tunnels and entrances, and discovered radar anomalies, in order that monitoring authorities and any persons undertaking construction work on the site can best anticipate predictable subsurface elements. This plan should be similar in content to the plan attached in Appendix 2 to these conditions (plans available on request) but with the result of the ground-penetrating radar investigation added to the data shown on that plan. Such detail shall all be shown as accurately as records allow. A copy of this archaeological plan shall be provided to the Manager Planning - Central/Islands in advance of work commencing.

13. The requiring authority shall employ, at its expense, a qualified archaeologist who shall:
a. Be on site to monitor all earthworks, including surface stripping of the site to establish whether any

subsurface archaeological features are present: (this recognises that initial earthworks may go deeper than merely preliminary surface stripping. Additionally it is not just within the preliminary stages that archaeological evidence may be uncovered).

b. Certify to the Council (Manager Planning - Central/Island) in writing whether or not any archaeological features have been discovered and if so, describe the immediately evident nature of the features as observed by the monitoring archaeologist prior to any formal investigation or recovery. Refer Advice Note 2 below.

14. Following archaeological authorisation by the New Zealand Historic Places Trust and the Auckland Council, when each area of earthworks commences, sufficient time must be allowed for any exposed features to be professionally excavated and recorded by the archaeologist referred to in condition 13. This may entail programming surface clearance of each area of proposed earthworks ahead of the next stage of works, to allow any archaeological excavation to take place without unduly holding up the main work.

15. In the event that Koiwi (human remains) are uncovered in the process of excavation, work on the area concerned will cease immediately and Auckland Council (Manager Heritage) and the New Zealand Historic Places Trust (Regional Archaeologist) will be immediately contacted in order that appropriate investigation, iwi protocols, and further action can be defined. Work will not recommence on the area concerned until written authority is received from both the Auckland Council and New Zealand Historic Places Trust.

16. The requiring authority shall ensure that not less than seven days before any excavation associated with the works commences, representatives of tangata whenua are advised of, and invited to be present during, the excavations.

Construction

17. Prior to commencement of any works on the site, the requiring authority shall submit a construction management plan to the satisfaction of the Council (Manager - Central Resource Consenting and Compliance in consultation with Auckland Transport). The management plan shall include specific details relating to the excavation of the site, or part thereof, and the construction and management of all works associated with the proposed development, including:

- a. Details of the site or project manager, including their contact details (phone, facsimile, postal address);
- b. The location of large notice boards that clearly identify the name, telephone number and address for service of the site or project manager;
- c. Methods or restrictions, such as a restriction on the size of construction vehicles and machinery, to be employed to ensure that no damage occurs to street trees throughout the construction period;
- d. Measures to be adopted to ensure the protection of services such as pipes and water mains. in adjoining public roads and Albert Park;
- e. Measures to be adopted to maintain the land in a tidy condition in terms of disposal/storage of demolition materials, rubbish, storage and unloading of building materials and similar construction activities;
- f. Measures to be adopted to ensure that pedestrian access past the works is provided where practicable and that such access is safe;
- g. Location of workers conveniences (eg portaloos);
- h. Ingress and egress to and from the site for vehicles during the demolition and construction period;
- i. Proposed maximum numbers and timing of truck movements throughout each day and their proposed routes;
- j. Procedures for controlling sediment runoff, dust, the removal of soil, debris and demolition and construction materials from public roads or places. Dust mitigation measures should include use of

water sprays to control dust nuisance on dry or windy days;

k. Location of vehicle, and demolition and construction machinery access during the construction period;

l. Hours of operation and days of the week for demolition and construction activities;

m. Means of ensuring the safety of the general public;

n. Procedures for ensuring that residents in the immediate vicinity of the site are given prior notice of the commencement of demolition and construction activities and informed about the expected duration and effects (e.g. noise, dust, traffic) of the works;

o. Procedures to be followed to ensure that those working in the vicinity of identified heritage features are aware of the heritage values of these features and the steps which need to be taken to meet the conditions applying to work on the site;

p. Procedures to be followed in the event that any historic artefacts are disturbed. The New Zealand Historic Places Trust protocol shall be the base standard to be adopted. The construction management plan shall be implemented and maintained to the satisfaction of the Council (Manager - Central Resource Consenting and Compliance).

18. To prevent contamination of drains with water containing soil sediment, no stock piling of excavated material is permitted on the site (except where it is to be reused on the site). Any surplus excavated material shall be removed from the site and deposited in an approved landfill except where this is to be reused on the site and stored and maintained to a reasonable standard.

19. The requiring authority shall implement suitable sediment control measures during demolition, excavation and for the total period of construction in accordance with the guidelines on siltation control in the Unitary Plan. This is to include measures such as a wheel wash to ensure that all stormwater run-off from the site is managed and controlled to ensure that no silt, sediment or water containing silt or sediment is discharged into stormwater pipes, drains, channels or soakage systems or is deposited on roads. In the event that material is deposited on the road, the requiring authority shall take immediate action at its own expense to clean the road.

20. A wheel wash shall be installed and used on the site during the full period of demolition, excavation and construction works to ensure that loose material associated with pile works, removal of soil and debris, and delivery of construction materials is not carried by vehicle tyres and deposited on public roads. During such times the road carriageway adjacent to the site shall be hosed down at the end of each working day.

21. The loading and unloading of all vehicles and storage of plant and equipment associated with the excavation and construction on the site, shall take place within the designated area unless otherwise allowed by the written approval of the Council (Manager Planning - Central/Islands).

22. Temporary protection shall be installed where required to prevent vehicles damaging footpaths, kerbs and roads. Safety barriers and warning signs shall be installed as necessary and maintained at all times to ensure that the health and safety of the public and workers on the site is ensured. In the event that damage occurs to the roads, kerbs or footpaths as a result of demolition or construction works, the roads, kerbs or footpaths shall be fully reinstated at the requiring authority's expense.

23. All reinstatement work of the affected roads, footpaths, street furniture, trees and services shall be carried out at the direction of, and to the satisfaction of, the Council in consultation with Auckland Transport.

24. All existing crossings no longer required shall be reinstated as kerb and footpath and the cost of this borne by the requiring authority. All works associated with the relocation and creation of on-street

loading space is to be to the satisfaction of the Council in consultation with Auckland Transport and the cost of these works shall be borne by the requiring authority.

Noise Management

25. Prior to commencement of the works the requiring authority shall prepare a construction noise management plan for the approval of the Council (Manager Planning - Central/Islands). The plan shall include an assessment of the likely demolition and construction noise levels and propose a noise mitigation plan. The requiring authority shall employ, at its expense, a suitably qualified acoustic consultant to monitor the works and ensure that the noise mitigation management plan is implemented and maintained to the satisfaction of the Manager - Central Resource Consenting and Compliance.

Traffic Management

26. Prior to any works commencing on the site, the requiring authority shall submit a traffic management plan for the approval of the Council in consultation with Auckland Transport. The plan shall address all relevant details as listed in Appendix 3 to these conditions (available on request). All works shall be carried out in accordance with the approved traffic management plan.

27. Any proposed changes to the layout of the Mayoral Drive/Wellesley Street/Kitchener Street intersection to facilitate demolition and construction activity associated with the Art Gallery development works shall be subject to analysis prepared by the requiring authority covering delay and capacity impacts. The results of this analysis shall be submitted with the proposed traffic management measures as part of the traffic management plan submitted in accordance with condition 26 above.

Movement of Service vehicles from Wellesley Street (Post-Construction)

28. Shorter wheelbase (8m) rigid trucks servicing the Art Gallery shall be allowed to reverse on to the site from Wellesley Street at any time (preferably avoiding the 4:00pm to 7:00pm weekday peak traffic period), subject to a marshal being in attendance to manage pedestrian movements on the Wellesley Street footpath when the truck is accessing the site.

29. Longer wheelbase (11m) rigid trucks servicing the Art Gallery shall be allowed to reverse onto the site from Wellesley Street at all times except the 4:00pm to 7:00pm peak period Monday to Friday (public holidays excepted) subject to a marshal being in attendance to manage pedestrian movements on the Wellesley Street footpath when the truck is accessing the site.

30. Articulated truck access to service the Art Gallery from Wellesley Street is restricted to the 7:00pm to 7:00am period on weekdays (public holidays excepted). Any articulated vehicles coming to the site should be scheduled with traffic management pre-arranged and the following Temporary Traffic Management Procedure should be introduced while the truck is manoeuvring onto the site. Part of any approved traffic management plan as outlined in Condition 26 above should include the requirement to advise both the Council (Manager - Central Resource Consenting and Compliance) and Auckland Transport one week in advance of the scheduled arrival of an articulated truck.

Temporary Traffic Management Procedure:

- a. Stop the eastbound through movement on Wellesley Street (direct traffic into Kitchener Street);
- b. Stop the right turn into Wellesley Street from Mayoral Drive; and
- c. Manage pedestrian movements on Wellesley Street footpath.

Note: For unscheduled rigid trucks, the proposed loading zones on either side of the vehicle crossing would allow the trucks to pull out of the traffic stream. The driver would then report to and get the

necessary personnel from the Art Gallery for assistance with marshalling while the truck is reversing onto the site.

Parking

31. The requiring authority, in conjunction with the Art Gallery management. Council's Transport Strategy Group and the Auckland Transport, shall develop and implement a travel plan for the Art Gallery to assist both patrons and staff. The purpose of the travel plan shall be to promote alternative modes of transport to the motor car by recommending how demand for private commuter trips to/from the site can be minimised, particularly during the peak traffic periods. The travel plan shall be submitted for the approval of the Manager: City Planning prior to the commencement of the operation of the developed Art Gallery.

32. The requiring authority shall seek the approval of the Council (Manager - Central Resource Consenting and Compliance) in consultation with Auckland Transport to the following changes to the on-street parking controls:

- a. The P60 parking spaces outside the Art Gallery on Kitchener Street shall be changed to a P5; and
- b. That part of the P60 parking area on the northern side of Wellesley Street shall be changed to a time restricted bus parking area.

The full cost of giving effect to these changes shall be borne by the requiring authority.

33. The requiring authority shall seek the approval of the Council (Manager: Transport Safety Assets and Operations) to amend the other on-street parking controls impacted by the development of the Art Gallery to be generally in accordance with Traffic Planning Consultants Ltd drawing No. 03125-02 dated 2.8.05 and attached in Appendix 4 to these conditions (available on request).

The full cost of giving effect to these changes shall be borne by the requiring authority.

Landscape and Tree Works

34. Landscaping and tree works within the designated area shall be expressly authorised by resource consents where required by the Unitary plan and shall be carried out in accordance with conditions of any such resource consents.

General

35. A copy of this designation and its conditions and appendices (all available on request) shall be held on site at all times during the establishment and construction phase of the activity, and its provisions shall be drawn to the attention of all contractors, subcontractors and site supervisory staff.

Advice Notes

1. All archaeological sites (whether scheduled, registered or not) are protected under the provisions of the Historic Places Act 1993. It is an offence under this Act to destroy, damage or modify any archaeological site, whether or not the site is entered on the New Zealand Historic Places Trust Register of historic places, historic areas, waahi tapu and waahi tapu areas. Under Sections 11 and 12 of the Act, application must be made to the New Zealand Historic Places Trust for an archaeological site(s) where the avoidance of any effect on the site is not practicable.

2. Albert Park is scheduled as an archaeological site in the district plan, and this is recognised by the New Zealand Historic Places Trust (NZHPT). Notwithstanding this particular status for the park itself, the discovery of any archaeological feature or material on land beyond the scheduled archaeological site immediately ranks the location as a protected archaeological site under the Historic Places Act 1993. An application would need to be made to the NZHPT for a 'Consent to Modify' for the

archaeological site (including the information required in section 11(2) of the Historic Places Act 1993), and resource consent from the Auckland City Council may be required prior to any excavation, modification or professional investigation taking place. Further work in the area must cease pending the application and granting of the required consents.

503 Pioneer Womens Ellen Melville Memorial Hall

Designation Number	503
Requiring Authority	Auckland Council
Location	2 Freyberg Place, Auckland Central
Rollover Designation	Yes
Legacy Reference	Designation 304, Auckland Council District Plan (Central Area) 2005
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Community facility - for community recreation and gathering, and formal and informal learning including community centres, halls, libraries, child care and markets. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. Where any works or development involve the demolition of, or, alterations or additions to a scheduled historic heritage place, an Outline Plan of Works is required.
2. The following shall be submitted with the Outline Plan of Works:
 - a. An assessment of the effects on the historic heritage values of the place; and
 - b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Exemptions:

Conditions 1 and 2 do not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan.

Advice Notes

1. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.
2. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

3. The requiring authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to the condition in order to confirm an outline plan is not required.

Diagram of Designation 508 - Public Open Space

510 Hamer Street and Jellicoe Street Open Space

Designation Number	510
Requiring Authority	Auckland Council
Location	4 and 12 Hamer Street and 49-63 Jellicoe Street, Auckland Central
Rollover Designation	Yes
Legacy Designation	Designation 385, Auckland Council District Plan (Central Area) 2005
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Public open space and activities and ancillary structures including: recreational activities; water features; coastal edge access; roads, public lanes and walkways; public event spaces; entertainment and gathering (excluding "Events" and "Major Events" as defined below; ancillary retail activities; and the excavation and remediation/removal of any contaminated soil.

Definitions:

1. Events: Temporary and organised activities including but not limited to gatherings, parades, protests, weddings, private functions (independent premises), festivals, film shoots, concerts, celebrations, multi-venue sports events of significant scale, fun runs, marathons, duathlons and triathlons.
2. Major events: A Major event declared as a Major Event in accordance with the provisions of the Major Events Management Act 2007. The duration of the major event shall be limited to the duration of the actual Major Event plus four weeks before the commencement of the event and four weeks after the end of the event.

Conditions

1. At least 20 working days prior to the construction or use of the designated open space area, the written approval of the Manager Planning - Central/Islands shall be obtained for a Site Emergency and Evacuation Plan including measures relating to emergency evacuation from the area should a release of hazardous substances, fire or explosion occur at any of the Sanford, Marstel, Shell, BST or Pacific Terminals facilities. This Plan shall be prepared by a suitably experienced person and shall include alarm and notification procedures, egress routes and muster points at a location deemed to be a safe distance from existing hazard sources. The Plan shall be drafted in consultation with the appropriate authorities and the operators of the hazardous facilities.
2. If any archaeological site is exposed during site works then the following procedures shall apply:
 - a. Immediately when it becomes apparent that an archaeological site has been exposed, all site works shall cease, except that works may continue to prevent the escape of any contaminants that would result in any further pollution of the environment.
 - b. The site supervisor shall immediately secure the area in a way that ensures that any artefacts are untouched.
 - c. The site supervisor shall notify tangata whenua, the New Zealand Historic Places Trust, the Department of Conservation and the Manager Planning - Central/Islands of the Auckland Council that an archaeological site has been exposed, so that appropriate action can be taken. This is to ensure that such persons are given reasonable time as determined by the Council to record the archaeological features, including a photographic record, before work recommences on the site.

3. Artworks are not provided for under this designation and any resource consents required under the Unitary Plan should be obtained.

4. As part of any outline plan of works process, the requiring authority shall undertake consultation with industrial operators abutting or occupying the designated area to address significant reverse sensitivity issues through the open space design process.

5. The period within which this designation shall lapse if not given effect to, in accordance with Section 184(1) of the Resource Management Act 1991, shall be 15 years from the date on which it is confirmed.

513 St Mary's Road Library and Community Facility

Designation Number	513
Requiring Authority	Auckland Council
Location	20 St Mary's Road, Ponsonby
Rollover Designation	Yes
Legacy Designation	Designation B07-27, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Community facility - for community recreation and gathering, and formal and informal learning including community centres, halls, libraries, child care and markets. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place, an Outline Plan of Works is required.
2. The following shall be submitted with the Outline Plan of Works:
 - a. An assessment of the effects on the historic heritage values of the place; and
 - b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Exemptions:

Conditions 1 and 2 do not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan.

3. An Outline Plan of Works for any works or development shall include an assessment of effects and appropriate mitigation of impacts in relation to the protected titoki tree.

Advice Notes

1. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

2. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

3. The requiring authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to the condition in order to confirm an outline plan is not required.

514 St Mary's Road Local Park

Designation Number	514
Requiring Authority	Auckland Council
Location	84 St Mary's Road, Ponsonby
Rollover Designation	Yes
Legacy Designation	Designation B07-29, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Local park including esplanade reserves, accessways and walkways. Works include parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place, an Outline Plan of Works is required.
2. The following shall be submitted with the Outline Plan of Works:
 - a. An assessment of the effects on the historic heritage values of the place; and
 - b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Exemptions:

Conditions 1 and 2 do not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan.

3. An Outline Plan of Works for any works or development shall include an assessment of effects and appropriate mitigation of impacts in relation to the coastal values of the site.

Advice Notes

1. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

2. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked

stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

3. The requiring authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to the condition in order to confirm an outline plan is not required.

Exemptions:

Conditions 1 and 2 do not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- ii. Where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan.

Advice Notes

1. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

2. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits,

old building foundations, artefacts of Māori and European origin or human burials.

3. The requiring authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to the condition in order to confirm an outline plan is not required.

521 Huia Road Community Facility

Designation Number	521
Requiring Authority	Auckland Council
Location	18-20 Huia Road, Pt Chevalier
Rollover Designation	Yes
Legacy Designation	Designation D04-11, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Community facility - for community recreation and gathering, and formal and informal learning including community centres, halls, libraries, child care and markets. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. All activities, works and buildings not fully described in the notice of requirement shall be the subject of either:
 - a. A new notice of requirement, which shall be publicly notified, pursuant to Section 168A of the Resource Management Act; or
 - b. A notice to alter the designation, pursuant to section 181 of the Resource Management Act, which notice shall be publicly notified unless the alteration is minor and affected persons agree in accordance with the provisions of section 181(3) of the Act.
2. Eleven parking spaces shall be provided on the site, with at least three of these available for the community house function. These spaces shall be designed and located to the satisfaction of the Council.
3. Activities in the community house shall cease by 11:00 pm each day from Sunday to Thursday (both inclusive) and by midnight on Fridays and Saturdays.
4. The 1.8m high fence of permanent materials on western boundary of No. 18 and 20 Huia Road and the northern boundary between No. 20 and 22 Huia Road shall be maintained to the satisfaction of the council.
5. The front of the building shall be landscaped to the satisfaction of the council.
6. The provision of parking and landscaping in accordance with the above conditions shall be deemed to fully implement the designation. The designation shall otherwise lapse in 2 years time, subject to any extensions which may be granted in accordance with section 184 of the Resource Management Act 1991.

522 Grey Lynn Library and Community Facilities

Designation Number	522
Requiring Authority	Auckland Council
Location	474 Great North Road, Grey Lynn
Rollover Designation	Yes
Legacy Designation	Designation D06-10, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Community facility - for community recreation and gathering, and formal and informal learning including community centres, halls, libraries, child care and markets. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place, an Outline Plan of Works is required.
2. The following shall be submitted with the Outline Plan of Works:
 - a. An assessment of the effects on the historic heritage values of the place; and
 - b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Exemptions:

Conditions 1 and 2 do not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan.

551 Captain Springs Road Local and Sports Park

Designation Number	551
Requiring Authority	Auckland Council
Location	60 Captain Springs Road, Te Papapa
Rollover Designation	Yes
Legacy Designation	Designation H11-24, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Local and sports park including esplanade reserves, accessways and walkways. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes.

Conditions

1. That the term for implementation of this designation be 10 years from 2 November 2007, in accordance with Section 184A(2) of the Resource Management Act.
2. That any development of the site is subject to the following development controls (with the exception of lighting poles and associated fixtures):
 - a. The maximum permitted building height, as measured from finished ground level following earthworks to create suitable sports fields and open space, is 10m;
 - b. The maximum building coverage is 15%; and
 - c. All buildings shall be set back 6m from the southern boundary of the site. With the exception of retaining walls and fences specifically for the purpose of preventing balls straying beyond play and minimising conflict with other uses, all buildings shall be set back 6m from the western and eastern boundaries of the site. Where the sites adjoin land to the north zoned Open Space - Sport and Active Recreation there is no yard.
3. The maximum height of any lighting poles and associated fixtures shall not exceed a height of 20m, as measured from the finished ground following earthworks to create suitable sports fields.
4. All buildings and structures shall be set back by a horizontal distance of at least 12m from the centreline of the Henderson - Otahuhu A high voltage transmission line.
5. With the exception of lighting poles and associated fixtures, any buildings or parking areas that are visible from the adjoining land zoned Special Purpose – Cemetery and Open Space – Sport and Recreation shall be appropriately landscaped, consistent with ensuring safety to pedestrians and other users, by adopting Crime Prevention Through Environmental Design (CPTED) principles.
6. All activities shall comply with the separation distances specified in NZECP 34:2001. (Note: this applies to the 220kV Transpower line).
7. The use of artificial light producing an illuminance in excess of 150 lux measured at any point on the site in a horizontal or vertical plan at ground level shall not be permitted to extend beyond 10pm during weekdays and Saturday and up to 9pm on Sunday and public holidays.

8. No activity shall be permitted to create any noise with results in the following standards being exceeded – the L10 noise level and maximum level (L_{max}) arising from any activity measured at or within the boundary of any residentially zoned property shall not exceed the following limits:

Monday to Saturday 7.00am-10.00pm	L10 55dBA
Sunday & Public Holidays 9.00am-6.00pm	L10 55dBA
At all other times	L ₁₀ 40dBA L _{max} 75 dBA, or background (L95) plus 30dBA, whichever is the lower

Crowd noise shall not be included in any assessment of noise levels. The above noise levels shall be measured and assessed in accordance with the requirements of the NZS 6081: 1991 "Measurement of Sound" and NZS 6802:1991 "Assessment of Environmental Sound".

9. Prior to use of the site as sports fields the following shall have been implemented:

- a. The extension of the adjacent car park at Waikaraka Park to provide one hundred (100) additional car parking spaces (including 3 mobility impaired spaces) shall be completed to Council's satisfaction, and secure parking for bicycles shall also be provided;
- b. A footpath, designed and constructed in accordance with Council standards, shall be provided along the western side of Captain Springs Road, from the intersection with Neilson Street to the southern side of the vehicle entrance to the car parking area;
- c. A pedestrian path, with a minimum width of 1.5m, shall be provided along the full length of the southern side of the vehicle access to the car parking area on Waikaraka Park; and
- d. Access for pedestrians, including those in wheelchairs, shall be provided to the sports fields, and linking to the coastal walk and cycleway.

10. That the following be submitted as part of the Outline Plan of Works prior to the construction of the sports fields:

- a. Details of the form of the sports fields, including whether artificial surfaces or other such methods are proposed to improve access to facilities.
- b. Assessment of safety issues, including Crime Prevention Through Environmental Design and CCTV cameras if required.
- c. A full earthworks methodology, showing cut to fill balance and existing and proposed finished contours, retaining walls, and batter slope gradient. This methodology shall include details of suitable sediment control measures to be used to ensure that all stormwater run off from the site is managed and controlled to ensure that no silt, sediment or water containing silt or sediment is discharged into stormwater pipes, drains, channels or soakage systems in accordance with the Council's sediment control policy.
- d. A report from a Chartered Professional Structural or Geotechnical Engineer confirming that all buildings, retaining walls and batter slopes can be safely constructed and if required, indicating any measures to be taken to mitigate the effects of soil instability on the proposed use and beyond the site. Light framed structures and buildings are preferred but alternative design methods will be accepted if satisfactory evidence is provided to ensure that there will be no danger to the structure, its occupants or surrounding properties caused by subsoil decomposition;

e. A Site Management Plan including the following:

i. specific details relating to the construction and management of all works associated with this development, and including if relevant:

- Hours of earthworks and construction;
- Details of the site manager, including their contact details (phone, facsimile, postal address). A telephone number for after hours emergencies shall also be supplied.
- The location of a large notice board on the land that clearly identifies the name, telephone number and address for service of the site manager;
- The address to which the work relates;
- Any means, such as a restriction on the size of construction vehicles and machinery accessing the land, required to ensure that no damage occurs to trees on land, remainder of the site or adjacent to the site, throughout the construction period;
- Any means of protection of services such as pipes and water mains within the legal road;
- Measures to be adopted to maintain the land in a tidy condition in terms of disposal/storage of rubbish, storage and unloading of building materials and similar construction activities;
- Location of workers conveniences (e.g. portaloos);

ii. detailed procedures to control the on-site or off-site impacts of the following matters during the proposed works:

- Dust; which must be controlled according to the Good Practice Guide for assessing and managing the environmental effects of Dust Emissions, Ministry for the Environment 2001;
- Landfill gas encountered during the proposed works;
- Refuse or contaminated material;
- Suspended sediment or leachate run-off;

iii. (Contingency Plan) detailing the procedures to deal with any potential adverse health or environmental impacts in the event of encountering landfill gas, leachate, or hazardous material (notably asbestos) during the proposed works; and

iv. (Health and Safety Plan) providing details of how the effects of the contaminated material will be minimised, including for the workers involved in the site development and on-going maintenance. The plan must be in accordance with the Cleanup of Contaminated Sites, Occupational Safety & Health Service, Department of Labour, 1994.

f. A contamination report detailing how the activity complies with council guidelines "Tier 1 Soil Screening Criteria - human health". This report shall include details of the investigations to be undertaken in accordance with the "Contaminated Land Management Guidelines No). 5 Site Investigation and Analysis of Soils", MFE 2003.

g. A methodology for works in close proximity to the Henderson - Otahuhu A high voltage transmission line. This shall include measures to ensure compliance with the New Zealand Electrical Code of Practice (NZECP) 34:2001, including but not limited to the following:

i. In accordance with NZECP 34:2001, Section 2, in the case of any tower supporting any conductor, no person shall excavate or otherwise interfere with any land:

- At a depth greater than 300mm within 6m of the outer edge of the visible foundations of the tower; or
- At a depth greater than 3m, between 5m and 12m of the outer edge of the visible foundation of the tower; or
- In such a way as to create an unstable batter;

ii. Excavated or other material shall not be deposited under or near the Henderson - Otahuhu A high voltage transmission line so as to reduce the vertical distance from the ground to the conductors to a distance less than:

- 7.5m vertically, across or along roads or driveways or on any other land traversable by vehicles;
- 6.0m vertically, on any land not traversable by vehicles due to inaccessibility; and
- 4.5m in any distance other than vertical on all land;

iii. All machinery and mobile plant operated on proposed site shall maintain a minimum clearance distance of 4m from the Henderson - Otahuhu A line conductors at all times; and

iv. The approved management plan shall be implemented and maintained throughout the entire period of works.

h. Details of the provision made to protect existing and proposed structures, pipework, infrastructure and other site works from any effects caused by the escape of methane gas resulting from the decomposition of fill.

i. A Lighting Plan prepared by a recognised lighting specialist and shall include details of the design and compliance with AS 2560.2.3 Sports Lighting for Football (All Codes), the Auckland Council Environmental Protection Bylaw (2008), Clause 13.5.4, regarding glare at the boundary and to ensure that the spill light does not exceed 79 lux at the Eastern Boundary and 10 lux at all other boundaries. The Lighting Plan shall include details of the luminaires, which shall be of modern design with zero upward wasted light output and zero tilt to limit glare and cut off, particularly to any of the residential properties to the south of the site across the adjacent bay and shall demonstrate that the requirements of AS 4282 Table 2.2 are satisfied to fully comply with the Auckland Council Environmental Protection Bylaw (2008), Clause 13.5.4, in respect to glare.

j. A Landscape Plan shall be prepared and shall ensure that visual links between the Notice of Requirement area, the Manukau Harbour, and the existing Waikaraka Park are maintained while also being consistent with ensuring safety to pedestrians and other users through appropriate use of Crime Prevention Through Environmental Design (CPTED) principles. It shall show as a minimum, where planting will be retained, transplanted trees, trees for removal, mitigation planting for the loss of any generally protected trees. This plan shall include:

- i. Any planting to mitigate increases in ground level;
- ii. Details of the plant species and sizes, all of which shall be locally sourced and coastal tolerant;
- iii. Details of the depth of planting required and the estimated depth of roots, once fully grown. Unless information confirms the depth of the fill on site allows deeper rooting plants, to prevent potential contamination effects, all plants shall be shallow rooting, not extending beyond a depth of 1m when fully grown;
- iv. Confirmation that the location of any trees shall not conflict with the Electricity (Hazards from Trees) Regulations 2003 and any tall growing trees/vegetation (exceeding a mature height of 1m) are located at least 12m away from the centre line of the Henderson - Otahuhu high voltage transmission line; and
- v. Details of how the proposed landscaping of the site has considered the historic heritage of Waikaraka Park and its location adjacent to the Manukau Harbour, through an information plaque or other means to ensure information is publicly available on the site's history.

552 Mason Avenue Community Facility

Designation Number	552
Requiring Authority	Auckland Council
Location	28-34 Mason Avenue, Otahuhu
Rollover Designation	Yes
Legacy Designation	Designation I14-39, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Community facility - for community recreation and gathering, and formal and informal learning including community centres, halls, libraries, child care and markets. Works include buildings, parking, operation, maintenance and upgrade of land for the aforementioned purposes. This designation shall also provide for formal and informal outdoor recreation.

Conditions

General

1. Outline plans may be submitted in stages to reflect any proposed staging of the works.
2. Any land taken or held for works shall be maintained to a reasonable standard until physical works commence.
3. That the period within which this designation shall lapse if not given effect to will be 15 years from November 2003.

Construction

4. A construction management plan shall be provided prior to the commencement of each stage of construction. The construction management plan shall include specific details relating to avoiding, remedying or mitigating adverse effects on the environment of the earthworks, construction and management of all works associated with this development as follows:
 - a. Details of the site manager, including their contact details (phone, fax, postal address);
 - b. The location of a large noticeboard on the site that clearly identifies the name, telephone number and address for service of the site manager;
 - c. Measures to be adopted to maintain the site in a tidy condition in terms of disposal / storage of rubbish, storage and unloading of building materials and similar construction activities;
 - d. Ingress and egress to and from the site for vehicles and construction machinery during the site works period;
 - e. Proposed location of any wheel-wash facilities; and
 - f. Proposed numbers and timing of truck movements throughout the day and the proposed routes.

The above details shall be shown on a site plan and supporting documentation as appropriate. The approved construction management plan shall be implemented and maintained throughout the entire construction period.

5. During construction NZS 6803:1999 Acoustics – Construction noise shall be complied with. The noise limits of Table 2 of NZS 6803:1999 shall apply.

6. The hours of work during construction shall be limited to:

Weekdays	7.00am to 6.00pm
Saturdays	8.00am to 5.00pm
Sundays and public holidays	No work

Sediment and Stormwater Control

7. The requiring authority shall implement suitable sediment control measures during all earthworks and after construction to ensure that all stormwater run off from the site is managed and controlled to ensure that, in so far as it is practicable no silt, sediment or water containing silt or sediment is discharged into stormwater pipes, drains, channels or soakage systems in accordance with Annexure 14 of the Plan 'Guidelines for sediment control'. In the event that material is deposited on the street, the requiring authority shall take immediate action to clean the street.

Landscaping and Trees

8. The following trees shall not be cut, damaged, altered, injured, destroyed or partly destroyed other than in accordance with an outline plan submitted and processed in terms of Section 176A of the Resource Management Act 1991:

a. Indigenous trees (including the roots) over 6m in height or with a girth (measured at 1.4m above the ground) greater than 600mm; and

b. Exotic trees (including the roots) over 8m in height or with a girth (measured at 1.4m above the ground) greater than 800mm;

In the case of a tree with multiple trunks (such as pohutukawa) the girth measurement shall be the aggregate or collective measurement of all trunks which have a circumference of 250mm or more. Provided that regular minor trimming or maintenance effected by hand operated secateurs or pruning shears, may be undertaken in accordance with accepted arboricultural practice, and that removal or trimming required to safeguard life and property is permitted without an outline plan.

9. A detailed landscape plan, including an implementation and maintenance programme, shall be submitted with the outline plan. The plan shall include details of plant sizes at the time of planting and intended species.

10. The landscaping shall comply with the guidelines for planting set out in the Otahuhu centre's mainstreet plan.

11. The landscaping shall be implemented in accordance with the landscaping plan within the first planting season following completion of the construction works and shall be maintained thereafter.

Noise (excluding construction noise)

12. The noise from activities within the site shall not exceed the following levels when measured at or within the boundary of any residential zoned property adjoining the designated land:

Monday to Saturday 7.00am-10.00pm	L10 55 dBA
Sundays and public holidays 9.00am-6.00pm	L10 55 dBA
At all other times	L10 40 dBA L _{max} 75 dBA or background (L95) plus 30 dBA, whichever is the lower

The noise levels shall be measured and assessed in accordance with NZS 6801:1991 Measurement of Sound and NZS 6802:1991 Assessment of Environmental Sound.

13. At the time an outline plan is submitted for building on the site, the requiring authority shall provide certification from an experienced acoustical consultant confirming that the design and materials to be used for the building(s) are such that the noise levels set out in 5.1 above can be complied with.

14. The requiring authority shall construct 2m high solid acoustic fence or wall along the southern and western boundaries of the site where it adjoins residential zoned properties on Hall Avenue and Nikau Road. Details of the fence or wall shall be provided in with the first outline plan submitted for the site. The fence shall be constructed before the commencement of the use of buildings on the site.

Bulk and Location Controls

15. Building development shall comply with the following bulk and location requirements:

a. Maximum height 10m.

Except that the recreation and youth centre can be built to a maximum height of 11m in accordance with the following drawings by the Architecture Office:

i. 'New Otahuhu recreation centre', preliminary elevations, job no. 04-042, drawing no. SK002 Rev 2 dated 19-11-04

ii. 'New Otahuhu recreation centre', preliminary site layout, job no. 04-042, drawing no. SK001 Rev 1 dated 4-11-04

553 Pikes Point Transfer Station

Designation Number	553
Requiring Authority	Auckland Council
Location	81 Captain Springs Road, Te Papapa
Rollover Designation	Yes
Legacy Reference	Designation H11-16, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Refuse processing centre.

Conditions

1.All new activities, works and buildings not in conformity with the notice of requirement or not otherwise provided for by the zone provisions of the Unitary Plan shall be the subject of either:

a. A new notice of requirement, which shall be publicly notified, pursuant to Section 168 of the Resource Management Act; or

b. A notice to alter the designation, pursuant to section 181 of the Resource Management Act, which notice shall be publicly notified unless the alteration is minor and affected persons agree in accordance with the provisions of Section 181(3) of the Act.

2. Unless lapsed prior to 15 June 2010, the expiry date of this designation was extended to 1 November 2015, by section 78 of the Local Government (Auckland Transitional Provisions) Act 2010.

554 Daldy Street

Designation Number	1570
Requiring Authority	Auckland Council
Location	Daldy Street from Pakenham Street West to Madden Street, Auckland Central
Rollover Designation	Yes
Legacy Reference	Designation 372, Auckland City Council District Plan (Central Area Section) 2005
Lapse Date	15 years from being operative in the Unitary Plan unless given effect to prior

Description

Road.

Conditions

1. In accordance with section 184 of the Resource Management Act 1991, this designation will lapse on the expiry of 15 (fifteen) years after the date on which it is included in the Unitary Plan unless:
 - a. It is given effect to before the end of that period; or
 - b. The territorial authority resolves that it has made, and is continuing to make, substantial progress or effort towards giving effect to the designation and fixes a longer period to give effect to the designation; or
 - c. The designation lapses earlier by virtue of the Unitary Plan ceasing to be operative.

Diagram of Designation 554 - Road

555 Jellicoe Street

Designation Number	555
Requiring Authority	Auckland Council
Location	West end of Jellicoe Street, Wynyard Quarter
Rollover Designation	Yes
Legacy Reference	Designation 386, Auckland Council District Plan (Central Area Section) 2005
Lapse Date	15 years from being operative in the Unitary Plan unless given effect to prior

Description

Road.

Conditions

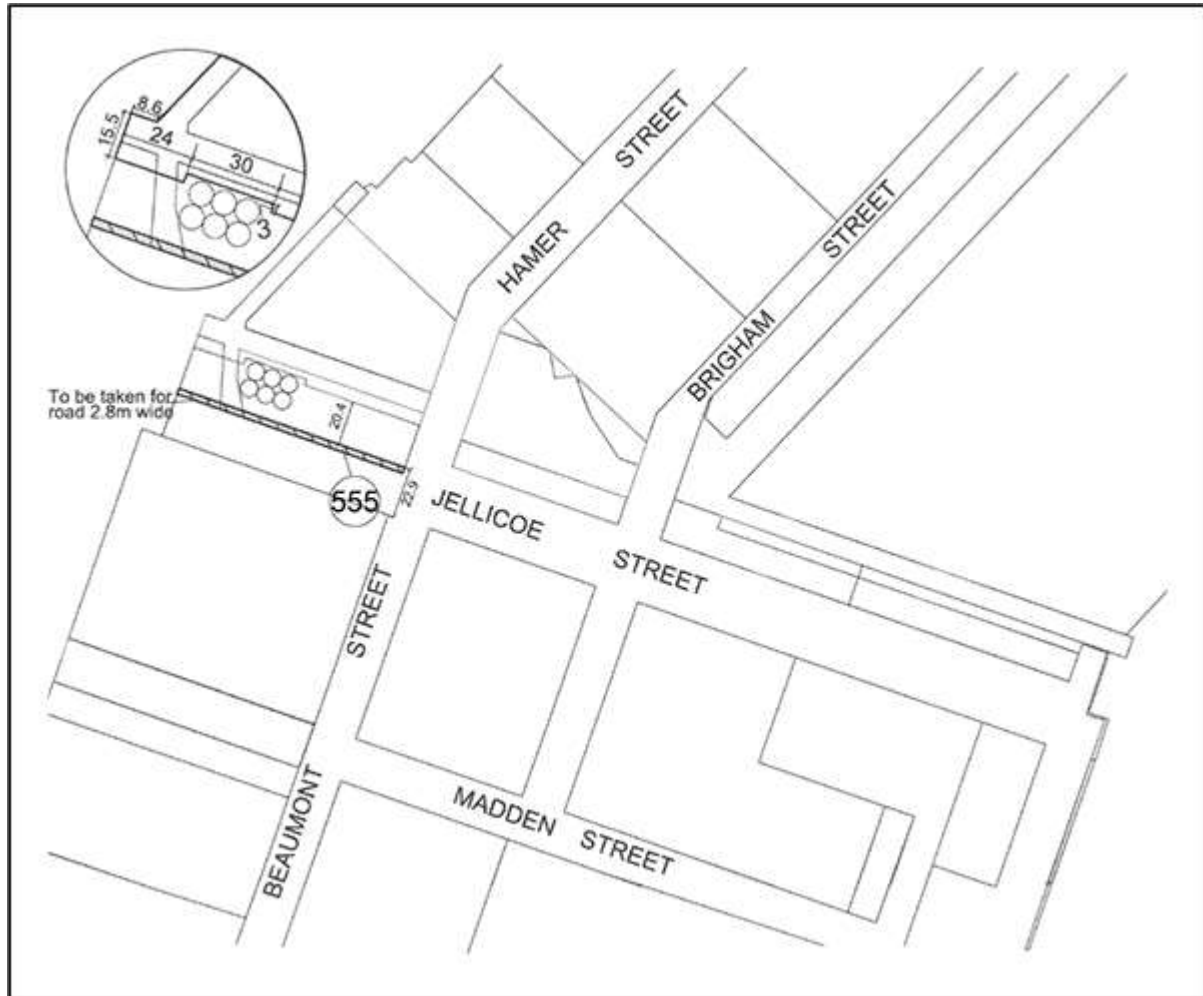

1. If any archaeological site is exposed during site works then the following procedures shall apply:
 - a. Immediately when it becomes apparent that an archaeological site has been exposed, all site works shall cease, except that works may continue to prevent the escape of any contaminants that would result in any further pollution of the environment; and
 - b. The site supervisor shall immediately secure the area in a way that ensures that any artefacts are untouched.

The site supervisor shall notify tangata whenua, the New Zealand Historic Places Trust, the Department of Conservation and the Manager Planning of the council that an archaeological site has been exposed, so that appropriate action can be taken. This is to ensure that such persons are given reasonable time as determined by the Council to record the archaeological features, including a photographic record, before work recommences on the site.

2. The period within which this designation shall lapse if not given effect to in accordance with section 184 of the Resource Management Act 1991 shall be 15 years from the date on which it is confirmed.

556 Bycroft Reserve Water Protection Reserve

Designation Number	556
Requiring Authority	Auckland Council
Location	Bycroft Reserve, 122R and 122S Neilson Street and 43 Galway Street, Onehunga
Rollover Designation	Yes
Legacy Reference	Designation H10-31, Auckland Council District Plan (Isthmus Section) 1999
Lapse Date	31 August 2022

Purpose

Water protection reserve to protect the aquatic moss *Fissidens berteroi* and its habitat.

Conditions

General

1. Measures shall be taken to protect the existence of the aquatic moss *Fissidens berteroi*, indigenous vegetation and wildlife; and
2. The Requiring Authority shall use appropriate measures to ensure minimum water flow of 30m³/day (0.31 l/sec) in the Bycroft Stream is maintained to protect the wetland.

600 Tawhitokino Regional Park

Designation Number	600
Requiring Authority	Auckland Council
Location	265 Kawakawa Bay Coast Road, Clevedon
Rollover Designation	Yes
Legacy Designation	Designation 188, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures

		iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

6. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform

the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

601 Hunua Ranges Regional Park

Designation Number	601
Requiring Authority	Auckland Council
Location	Moumoukai Road, Hunua
Rollover Designation	Yes
Legacy Designation	Designation 189, Auckland Council District Plan (Manukau Section) 2002; Designation 192, Auckland Council District Plan (Manukau Section) 2002; and Designation 100, Auckland Council District Plan (Franklin Section) 2000
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage

		ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles, entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

5. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

- a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in

order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

602 Regional Botanic Gardens

Designation Number	602
Requiring Authority	Auckland Council
Location	100 Hill Road, Manurewa
Rollover Designation	Yes
Legacy Designation	Designation 190, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Auckland botanic gardens - to create and maintain gardens, buildings, structures and visitor services for the propagation, display, conservation, education and research of plants, and to facilitate the development of trails and visitor infrastructure for informal outdoor recreation activities, education and events. Works include operation, upgrade and maintenance associated with the aforementioned activities.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Auckland Botanic Gardens (2001) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Gardens and garden structures	Construction and maintenance of gardens and garden structures	Works and structures associated with operating and maintaining display gardens, including workshops, garden walls, structures, ornamental ponds, and education and interpretation facilities.
Garden pathways	Construction and maintenance of garden pathways in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of the main garden path up to 3.5 metres in width and secondary loop paths and garden paths up to 1.8 metres in width, including the construction of path structures, such as directional signs, information signs, safety barriers, foot bridges, steps, board walks and rafts, and the maintenance of existing paths involving: <ul style="list-style-type: none"> (i) Water tables and track drainage (ii) Track surfaces (iii) Modification of vegetation up to 1 metre from the edge of the path.
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3 metres in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: <ul style="list-style-type: none"> (i) Water Tables and track drainage (ii) Track surfaces (iii) Track structures (iv) Modification of vegetation up to 1 metre from the edge of the track

Buildings, structures and utility services, including drainage systems	Construction and maintenance of minor recreational structures and utility services	The construction of utility services and minor recreational structures, such as notice boards, signs, picnic tables, styles, entrance gates, shade shelters, information kiosks and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Maintenance of car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: (i) Removal of non-native and non-scheduled plants (ii) The development of approved works (iii) The maintenance of view shafts identified in the Auckland Botanic Gardens Master Plan 2009 and any subsequent management plan.

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

1. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

Auckland Unitary Plan Operative in part

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions

Condition 4 will not apply in the following circumstances:

Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved management plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists;
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking & Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:
- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
 - ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Auckland Botanic Gardens Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan.

603 Omana Regional Park

Designation Number	603
Requiring Authority	Auckland Council
Location	44R Maraetai Drive, Maraetai
Rollover Designation	Yes
Legacy Designation	Designation 191, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services,	Construction and maintenance of minor recreational structures and	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles,

including drainage systems	utility services	entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage

values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

5. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

6. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

607 Manukau Memorial Gardens

Designation Number	607
Requiring Authority	Auckland Council
Location	361 Puhinui Road, Papatoetoe
Rollover Designation	Yes
Legacy Designation	Designation 222, Auckland Council District Plan (Manukau Section) 2002; Designation 222A, Auckland Council District Plan (Manukau Section) 2002; and Designation 223, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Cemetery and crematorium.

Conditions

Outline Plan of Works

1. Before any works, including new buildings, are undertaken an Outline Plan of Works shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 1, from requiring an outline plan of works. The Outline Plan of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan of Works.

Exemptions:

2. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of cemetery infrastructure		Nature of works
Burials	The construction of works associated with interments, including ornamental gardens.	Structures, such as burial plots, berms, headstones and mausoleums.
Paths and tracks	Construction and maintenance of paths and tracks in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of paths and tracks up to 2.5 metres in width, including the construction of structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing paths and tracks involving: <ul style="list-style-type: none"> i. Water tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of native vegetation up to 1 metre from the edge of the track.
Minor buildings, structures and utility services, including drainage	Construction and maintenance of minor buildings and structures and utility services	The construction of utility services and minor structures, such as notice boards, information kiosks, signs, outdoor seating, entrance gates, shade shelters, pavilions and toilet
	Maintenance, repairs and minor	

systems	alterations to buildings, structures and utility services	blocks.
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of native vegetation up to 1 metre from the edge of the car park or road, or within the car park for safety reasons
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Cemetery Management Plan

3. Cultural / Heritage / Archaeological

Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for the purpose of a cemetery but is to conserve and protect the recognised natural, cultural and historic values that significantly contribute to the cemetery setting.

This condition (Condition 2) will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage values of the scheduled place; or
- iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Cemetery Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 2 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Heritage New Zealand Pouhere Taonga Act 2014. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (Heritage NZ) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the Heritage NZ advised of the discovery. The Heritage NZ will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the Heritage NZ, Council's

Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Cemetery Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a cemetery.

608 Regional Parkland at Waitawa

Designation Number	608
Requiring Authority	Auckland Council
Location	1168 Clevedon-Kawakawa Road, Clevedon
Rollover Designation	Yes
Legacy Reference	Designation 312, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services,	Construction and maintenance of minor recreational structures and	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles,

including drainage systems	utility services	entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage

values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

609 Ambury Regional Park

Designation Number	609
Requiring Authority	Auckland Council
Location	66 Wellesley Road, Mangere Bridge
Rollover Designation	No
Legacy Reference	N/A
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services,	Construction and maintenance of minor recreational structures and	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles,

including drainage systems	utility services	entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage

values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

611 Greenmount Refuse Disposal

Designation Number	611
Requiring Authority	Auckland Council
Location	1 Harris Road, East Tamaki
Rollover Designation	Yes
Legacy Reference	Designation 195, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

The Greenmount Landfill is designated as Interim Regional Refuse Disposal Landfill for the purposes of and in relation to refuse disposal.

The list of activities which are provided for by the designation are the following:

- Refuse landfill;
- Receipt, storage and disposal of refuse;
- Collection, disposal and power generation from landfill gas;
- Reception and weighbridge facilities;
- Stormwater control;
- Leachate control;
- Ancillary buildings and structures; and
- Other activities ancillary to the above activities and the operation of a refuse landfill.

Explanation:

For some eight years commencing in 1960 the former Manukau City Council itself used part of the quarried area for refuse disposal. In 1980 the site opened as a regional refuse disposal landfill as a means of backfilling the quarried area. The site was designated for this purpose at the requirement of the former Auckland Regional Authority.

A large portion of the land is the subject of a bequest, under the will of the late Mrs SJ Lushington, to the territorial authority in whose district the land is situated, upon trust for public recreation purposes. Reflecting this bequest, the site has the underlying zoning of Public Open Space. Prior to its end use as a recreation area, the landfill continues to be used for refuse disposal purposes.

The site is well located for the purposes of refuse disposal on a regional basis and in 1985 the former Regional Authority served a further requirement to extend the quarrying and landfill operation onto an adjoining site (Lot 2 DP 81107).

In 1992 Northern Disposal Systems Ltd (NDS) took over responsibility for the Greenmount refuse disposal operations from the former Auckland Regional Council. NDS is a Local Auckland Unitary Plan Operative in part

Authority Trading Enterprise (LATE) established under the Auckland Regional Services Trust (ARST). NDS has subsequently purchased the Stevensons Quarry land and this is to be passed to Auckland Council for recreation uses at the completion of land filling along with the Lushington Estate.

The Auckland Council retains the power to designate for Northern Disposal Systems' facilities. In 1995 the former Auckland Regional Council requested that the existing designation for the whole site be carried over into the reviewed legacy Manukau City District Plan. Northern Disposal Systems has been granted a land use consent to carry on land filling until the year 2003. The Greenmount refuse disposal operation is to be managed in accordance with the conditions of this designation, the resource consents obtained in respect of this site and the associated consent conditions.

The Greenmount refuse disposal operation is primarily a land filling operation. A gas collection system and gas fired power station are components of that operation.

Greenmount is designed as a co-disposal sanitary landfill for the disposal of domestic and special wastes.

Conditions

1.0 - Design of Access to Road Network

1.1 Vehicle Crossing Design

a. Vehicle crossings shall intersect with the carriageway at an angle of between 45° and 90° and cross the property boundary at an angle of between 75° and 105°.

b. Vehicle crossings shall comply with the following minimum and maximum widths. This rule also applies to vehicle crossings shared by more than one property.

	Min Width of	Max Width of
one-way	3.0 metres	6.0 metres
two-way	3.0 metres	9.0 metres

1.2 Gradients

The grade of vehicle crossings shall not exceed 1:8. For curved ramps and driveways, the gradient is measured along the inside radius.

1.3 Separation of Driveways

The following minimum separation distances shall apply to vehicle crossings:

- Three metres between vehicle crossings as measured at the kerb.
- 1.5 metres between the vehicle crossing and the applicant's side of property boundary as measured at the kerb and perpendicular to the kerb. This provision shall not apply in respect of vehicle crossings shared by adjoining properties.

1.4 Swept Paths

All vehicle crossings within the primary road network, or within roads within which a centreline is defined shall be designed to accommodate the swept path of the largest vehicle expected to use it. When turning left the vehicle must not be required to cross the road centreline or the right hand edge of the rear traffic lane where there is more than one lane.

1.5 Separate Entry and Exits

Where activities provide separate entry and exit crossings they are to be clearly marked as such.

2.0 — Parking and Vehicle Circulation

2.1 Provision of Parking

2.1.1 Number of Parking Spaces to be Provided

- a. The number of parking spaces to be provided shall be 1 per 50m² GFA, or 0.7 per FTE employee (where the number of employees is known), whichever is the lesser.
- b. When the assessment of the number of parking spaces required in respect of the use of any land or building results in a fraction, a fraction under one half shall be disregarded and fractions of one half or more shall require an additional parking space.

2.1.2 Diminution of Land Available

The parking area that is made available about a building in compliance with the requirements for off-road parking shall not be diminished by the subsequent construction of any structure, by the storage of goods, or by any other activity, but a private garage may be erected.

2.1.3 Allocation of Parking Spaces

The requiring authority or other occupier of the site shall not unreasonably allocate or manage the parking spaces so as to prevent staff, fleet vehicles, visitors or particular occupiers associated with that site from utilising this parking.

2.2 Provision of Loading Space

2.2.1 Any activity within the designation that generates delivery trips by heavy vehicles, shall make adequate provision on the site for a loading space.

2.2.2 Part of any yard of a site may be used to provide a loading space for any site provided that the loading space and method of loading shall at no time:

- a. cause the footpath or access to the rear of the site or access to an adjacent property to be blocked; or
- b. create a traffic hazard on the road.

2.2.3 The number of loading spaces to be provided in respect of any of the following uses on any particular site shall be determined according to the following table:

Gross Floor Area of Activity (Square	Number of Off-Road Loading Spaces to be
0-20,000	1
20,001-50,000	2
Over 50,000	1 + 1 for every additional 25,000m ² of gross floor area

2.3 Design of Parking and Circulation Areas

All parking in the form of a parking lot or a parking building, shall conform with layout, access and any other requirements of this condition.

2.3.1 Vehicle Dimensions

Each parking space to be provided in terms of this Section shall be in accordance with the dimensions specified in Attachment 1 Carparking layout and suitably laid out to accommodate a 90 percentile motor car as defined by the Ministry of Transport. The dimensions and tracking curve of this vehicle are shown in Attachment 2 Minimum radius tracking curve for 90 percentile car.

2.3.2 Reverse Manoeuvring

All parking areas shall be designed to ensure that vehicles are not required to reverse either onto or off the site; and are not required to execute more than a three point turn to exit the site based on the 90 percentile motor car as defined within Attachment 2 Minimum radius tracking curve for 90 percentile car.

2.3.3 Vehicle Queuing

Sites shall be laid out in such a way that vehicles using or waiting to use on site facilities shall not queue into the adjoining road or obstruct entry to or exit from the site. The minimum distance between any such facility and the mid point of the property boundary edge of any vehicle crossing to the site shall be 12 metres (the property boundary having been adjusted for any proposed road widening).

2.3.4 Design and Constructional Details

All public and private parking areas shall comply with the following requirements:

- a. The parking area shall be maintained at all times so as not to create a dust nuisance;
- b. Provision shall be made to illuminate access driveways and pedestrian areas within public parking areas used during the hours of darkness. Illumination shall not be directed towards any adjacent residentially zoned land. All exterior lighting must be designed, located and at all times directed, screened, adjusted and maintained to ensure that the direct illuminance from the lighting installation shall not exceed:

- 10 lux (lumens per square metre) at or within the boundary of all affected residential sites between the hours of 10.00pm and 7.00 am;
- 20 lux at or within the boundary of all affected residential sites at all other times when exterior

lighting is required;

c. Parking areas and signs and markings shall be maintained by the owner or occupier so that at all times they remain legible and available for use by vehicles;

d. All parking spaces provided to meet the requirements of clause 2.1.1 of this condition shall be right angled parking spaces;

e. The design and layout of parking areas shall be such that vehicles are not required to reverse a distance greater than 30 metres to enter or exit any parking space or exit any parking aisle in the event that the parking spaces within the aisle are occupied; and

f. Where there are several separate parking areas within a site (or sites where joint parking areas are involved), then internal vehicular access between the parking areas shall be provided so that vehicles do not have to use the adjoining road network to travel between car parks.

2.3.5 Provisions for Disabled Persons

Where it is proposed to establish the use of any land or erect any building and that use or building is listed in Schedule 2 of the Building Act 2004 carparking spaces for the exclusive use of vehicles driven by persons with disabilities or any person accompanying a person or persons with disabilities, shall be provided as follows:

a. No fewer than one carparking spaces for the disabled shall be provided where the total number of carparking spaces is between 1 and 10; no fewer than two carparking spaces for the disabled shall be provided where the total number of parking spaces is between 11 and 99; and one additional carparking spaces for the disabled for each additional 50 parking spaces or part thereof;

b. Such carparking space or spaces shall be credited towards the number carparking spaces required; and

c. Such carparking spaces shall be designed in accordance with the requirements of the New Zealand Standard Specification 4121: 2001. Access from such carparking spaces to buildings shall also be designed in accordance with these standards and carparking spaces shall be so located to ensure that the distance to be traversed is as short as possible.

2.3.6 Design of Loading Spaces

a. Location

A loading space or loading spaces shall be so located as to fulfil the purpose for which loading is required in relation to the functional design of the building and the area and shape of the site. The extent of the area required for manoeuvring in respect of any loading space shall be sufficient to accommodate the largest vehicle that is expected to utilise the loading space. In determining that area there shall be taken as a minimum guide the 90 percentile truck tracking curve shown in Attachment 3 Minimum radius tracking curve for a 8m rigid truck;

b. Loading Docks Fronting Roads or Service Lanes

The minimum dimensions for a loading dock fronting directly on to a road or service lane shall be sufficient to accommodate the largest vehicle that is expected to utilise the loading space. As a minimum guide, they shall be 3.5m wide by 3.5m high by 7.5m deep measured from the road or service lane boundary of the site. In the case of a loading dock to be used by articulated vehicles, the dock shall not be less than 11m deep measured from the road or service lane boundary of the site; and

c. Reverse Manoeuvring

Except for loading areas with access to a cul-de-sac or service lane, all loading areas shall be

designed to ensure that the vehicles using them are not required to reverse either onto or off the site and are not required to execute more than a three point turn to exit the site (based on the appropriate truck tracking curve). In complying with the above the truck tracking curve shall not track over any defined parking spaces required to satisfy Condition 2.3 of this condition or require a vehicle to reverse more than 30 metres on site.

2.4 Traffic Management Works

The Council shall assess any Outline Plan of Works by the requiring authority for any development or redevelopment of the designated site.

A Traffic Management Plan shall be submitted to the Council as part of any outline plan of works application having regard to the potential transportation related effects of the development, which include:

- removal or relocation of a street tree, traffic signals, street light, bus shelter, traffic sign, or street furniture as a result from any proposed vehicle crossing
- any proposed public and private parking spaces and access drives and aisles
- stormwater drainage from any proposed parking area.

The requiring authority shall be required to meet the reasonable costs of all access and traffic management works (including any additional land required to accommodate these works) associated with an activity on the designated site to the extent that such works are required to meet safety, access, egress, or amenity considerations related to the activity or where the works are required to mitigate the likely adverse effects from the activity on the safety or operation of the transport network.

Advice Notes

1. The Greenmount Landfill is also subject to the following regional resource consent and their conditions, granted by the former Auckland Regional Council:

- No. 928676 Diversion and discharge of stormwater
- No. 928677 Discharge of leachate and landfill gas through the clay liner No. 928678 Diversion of groundwater
- No. 949458 Discharge of landfill gas to the atmosphere
- No. 949459 Discharge contaminants onto and into land; and
- Resource consent PRM6291/1 issued by the former Manukau City Council.

2. There are additional consents in relation to the methane gas and power generation plant.

Note: Ministry of Transport recommends a minimum manoeuvre aisle width of 3.7m

Attachment 2 Minimum radius tracking curve for 90 percentile car

Scale 1:100

- Note:
- Minimum recommended clearance for both sides of the vehicle is 600mm
 - Minimum turning radius - required extent of hard surface
 - Minimum overhang radius - area required to be kept clear of obstruction

Attachment 3 Minimum radius tracking curve for a 8m rigid truck;

NOTES:

1. MINIMUM RECOMMENDED CLEARANCE FOR HORIZONTAL CLEARANCE IS 0.7m AND IS TO BE APPLIED TO THE TRACKING CURVE.
2. MINIMUM OVERHANG RADIUS - AREA REQUIRED TO BE KEPT CLEAR OF OBSTRUCTION.
3. MINIMUM TURNING RADIUS - REQUIRED EXTENT OF HARD SURFACE.
4. THESE "TRACKING CURVES" ARE ONLY TO BE USED FOR LOW SPEED ON SITE DESIGN AND ARE NOT NECESSARILY SUITABLE FOR ON-ROAD DESIGN PURPOSES.

612 Whitford Landfill

Designation Number	612
Requiring Authority	Auckland Council
Location	373 Whitford-Maraetai Road, Whitford
Rollover Designation	Yes
Legacy Reference	Designation 229, Auckland Council District Plan (Manukau Section) 2002
Lapse date	Given effect to (i.e. no lapse date)

Purpose

Rule 10.2.8.1.1 Whitford Landfill Landfilling Designation (Zone 1): Purposes

a. Subject to the conditions set out in Rule 10.2.8.1.1.1, the area shown as "Zone 1" in Figure 10.2.1 may be used for the purposes of:

- A refuse landfill and for the ponding and disposal of leachate
- Recycling and composting
- Residents' transfer station
- Recreational paths
- Other activities ancillary to the above activities

b. In these conditions "Landfill Operator" means the Auckland Council in its capacity as operator of the Whitford Landfill; and also includes any agent operator of the Auckland Council; or other successor or successors as operator of the Whitford Landfill.

Explanation:

The Whitford Landfill has been designated for many years. In 2005 a Notice of Requirement was sought to alter the existing designation in order to increase the life of the Landfill beyond 2014. The Council decided that the new time frame would allow landfilling for approximately 35 years, to coincide with the expiry date of the regional consents. The landfill area is shown in Figure 10.2.1.

The designation is identified by four areas which are referred to as Landfill Zones 1, 2, 3 and Landfill Zone 1/Quarry. Each zone is also referred by descriptive names, such as "Excavation of Cover Material Designation".

Zone 1 and Landfill Zone 1/Quarry make provision for the disposal of refuse during the planning period having regard to the topography of the land, so that while full use can be made of material available within the area for covering refuse, the operation can be conducted with a minimum of detraction from the amenities of the neighbourhood. The combined areas currently designated at Whitford for landfill purposes (Zone 1 and Landfill Zone 1/Quarry) have a life of approximately 35 years.

The southern part of the designation, Zone 2 known as the "O'Brien Property" was purchased by the Council as a source of additional cover material, to the landfill, with the purpose of reducing the traffic and other effects of importing cover material from elsewhere.

The northern part of the designation, Zone 3 known as "Curries Farm", was purchased by the Council for the spray irrigation of leachate from the landfill. On 21 November 1994 Auckland Council granted a resource consent for the spray irrigation of treated leachate on to part of the land in the northern part of the designation.

Special conditions and restrictions are set out for each of the zones of the designated area for the future protection of the amenities of the area.

Council has undertaken the realignment and upgrading of sections of Ormiston Road in order to improve the principal route to the landfill and for the benefit of other road users. The Landfill Operator also has a number of regional consents from the Auckland Council covering aspects of the landfill activities. The conditions of this designation complement the conditions of the ARC consents.

Recognising the need for correct loading of trucks and trailers carrying refuse through the City, access roads leading to the designated area will be patrolled at regular intervals (including weekends), by Council, and it will enforce its powers under its Bylaws and the Litter Act 1979.

Conditions

Restrictions on Footprint

a. The disposal of refuse shall be confined to the area showing the limits of refuse disposal in Figure 10.2.2 at the rear of this section.

Proviso:

No areas outside the Interim Footprint shown in Figure 10.2.2 at the rear of this section may be developed or used for refuse disposal except in accordance with the relevant parts of the Management Plan required under condition (d) and approved under condition (f).

General Requirements

a. The landfill and all associated activities, development and works (including postclosure aftercare) shall:

- Be designed, constructed, operated and maintained as a modern landfill in accordance with currently recognised good sanitary landfill practice
- Be undertaken in accordance with such practice by persons appropriately qualified and experienced for the particular purpose
- Comply in all respects with these conditions to the satisfaction of the Council's Director of Planning and Resource Management or other specified officer and any other statutory authority having regulatory jurisdiction over the matter
- Proceed in accordance with the Management Plan referred to in condition (d) but as amended from time to time in accordance with these conditions of the designation. No development may proceed until the relevant part of the Management Plan has been approved
- Be subject to compliance with all necessary resource consents from the Auckland

Auckland Unitary Plan Operative in part

Council and any other applicable statutory requirements.

(For the avoidance of doubt where any conditions attaching to any necessary resource consent or any other statutory requirements impose more stringent requirements on the landfill than these conditions, then the more stringent requirements shall prevail).

b. A residents transfer station and recycling facilities shall be established and maintained on the landfill site for so long as the site is used for refuse disposal purposes.

Management Plan

a. The Landfill Operator shall maintain and keep current the following plans and manuals ("the Management Plan"), the basis of which shall be the Landfill Management Plan held by the Council in its records on the Whitford Landfill and as subsequently approved by the Council. The Landfill Management Plan shall be completed no later than 3 months after the confirmation of the designation.

Plans and Manuals Comprising the Management Plan:

- Design Manual
- Construction Manual
- Monitoring Manual
- Operations Manual
- Contingency Manual
- Site Landscaping Plan
- Post-Closure Aftercare Plan

b. The Management Plan (and any amendments) shall give effect to these conditions and otherwise generally accord with the Outline Management Plan.

c. Each part of the Management Plan (and any amendments) shall:

- Be subject to the approval of:
- The Council in consultation with the Peer Review Panel referred to in condition (j); and
- When so approved, be strictly adhered to at all times
- Be subject to review (including a review of the performance of the practices and procedures in the Plan) by the Peer Review Panel on an annual basis or earlier if required by the Council.

d. Amendments shall be made to the Management Plan to incorporate:

- Requirements of the Council to ensure compliance with these conditions (including requirements made on the advice of the Peer Review Panel)
- Changes sought by the Landfill Operator to give better effect to these conditions which

have been reviewed by the Peer Review Panel and have the approval of the Council where appropriate

- The requirements of any applicable enactment.

Any amendments required by this clause shall be incorporated without delay in and shall form part of the approved Management Plan.

Matters to be covered in the Management Plan

e. The Management Plan shall contain provisions dealing with the following matters:

	Specific Condition
Waste Acceptance Criteria indicating categories of refuse accepted at the Landfill	(x)
Stages of development	(-)
The separation of existing and future areas of refuse placement	(-)
Right of access	(s)
Hours of operation	(u)
Categories of refuse accepted at the landfill	(x) (y)
Liner construction	(b)
Site Access, internal roading, vehicle stacking areas and traffic management	(v)
Occupational Safety and Health	(-)
Mediation	(q)
Methods of handling and disposal of refuse including controlled waste	(x) (y)
Refuse covering and capping	(aa)
Landscape amelioration, maintenance and restoration work	(rr) (vv)
Litter control	(kk)
Recycling, residents waste transfer station and composting operations	(c)
Stormwater management	(-)
Leachate management	(w)
Landfill gas management	(hh)
Nuisance control	(jj) (nn)
Monitoring and record keeping	(oo) (qq)
Contingency plans	(d)
Emergency procedures	(-)
Site closure and rehabilitation	(rr) (ww)
Aftercare requirements	(ww)
Community liaison	(k)
Cultural Heritage Sites	(-)
Such other matters as are considered appropriate from time to time by the Council	(-)

f. The Management Plan shall expressly require compliance with these conditions:

- That gas wells and other permanent engineering features are located so as to be as unobtrusive as possible from adjacent land and to be compatible with the site Landscaping and Post-Closure Aftercare Plans
- That a layer of low permeability materials be constructed above the existing landfill to direct leachate from new refuse to new leachate collection drains. The layer shall be of such thickness and permeability as to ensure the minimisation of movement of leachate into the underlying refuse and the avoidance of adverse environmental effects.

Peer Review Panel

j. For the operating life of the landfill and such further period as the Council may require the Landfill Operator shall establish and maintain an independent Peer Review Panel. The composition of the Peer Review Panel shall be as approved by the Council's Manager — Resource Consents and Compliance, and the Auckland Council following consultation with any Community Committee established under condition (p); and shall comprise not less than 3 nor more than 5 suitably qualified and experienced persons one of whom shall be the nominee of any Community Committee established under condition q.

k. The objectives of the Peer Review Panel will be to ensure that the conditions of this Rule are met and to ensure that all engineering works authorised by the Auckland Council achieve design specifications.

l. All reasonable costs of the Peer Review Panel in undertaking its functions set out in these conditions shall be met by the Landfill Operator.

m. The Peer Review Panel may co-opt other specialist members to assist in any of its functions for specified periods subject to the approval of the Council, and after consultation with the Landfill Operator. The Peer Review Panel shall appoint one of its members as convener.

n. The Peer Review Panel shall undertake all of the following functions save to the extent modified by the Auckland Council in respect of matters over which it has jurisdiction:

- i. Reviewing the adequacy of the various parts of the Management Plan prior to their initial approval by the Council and thereafter on an annual basis.
- ii. Being satisfied that conditions (a) and (b) are being complied with and that the landfill and all associated activities and works (including post closure aftercare) are adequate to ensure the ongoing containment of refuse and leachate.
- iii. Reviewing any proposed modifications to the design, construction, operation or aftercare of the landfill and all associated activities and works.
- iv. Taking such steps as are necessary to ensure that the following are undertaken to its satisfaction:
 - The monitoring of the construction and performance of the landfill liner
 - The monitoring and testing referred to in condition (qq) the evaluation of the results of the monitoring and any consequential testing.

- v. From time to time drawing to the Council's attention any changes to the management plan that it considers necessary or desirable and any other matter which, in the opinion of the Peer Review Panel, the Council should deal with or be aware of.
- vi. Reporting to the Council at 6 monthly intervals, or sooner if required by the Council, on all the above matters as appropriate and otherwise describing the status of the landfill project, particularly with regard to compliance with these conditions.
- vii. Consulting with the Community Committee on any matters relating to the landfill at the same frequency as it is required to report to the Council and promptly providing the Committee with copies of its reports.
- viii. Consulting with and reporting to the Landfill Operator from time to time on the above matters.

General Duties of the Landfill Operator

o. The Landfill Operator shall:

- Do all things necessary to enable the Council, any other relevant statutory regulatory authority and the Peer Review Panel to perform their functions, and without limiting that obligation, it shall supply those bodies with all information reasonably necessary for its purposes and permit access to the landfill site at all reasonable times.

Review of the Management Plan by Landfill Operator

p. The Landfill Operator shall undertake its own review:

- Annually of all parts of the Management Plan for the purpose of ensuring ongoing compliance with these conditions
- The Landfill Operator shall also report to the Council annually, summarising its annual review.

The Landfill Operator shall also prepare reports for the Council annually on:

- i. Significant changes made to the design construction, operation or management of the landfill and all associated activities and work including aftercare.
- ii. Environmental monitoring results in summarised form.
- iii. Incidents involving non compliance with these conditions and actions taken to remedy them. and five yearly on:
- iv. Significant local or international advances made in any aspect of landfill design, construction, operation or management that may have benefits for the Whitford Landfill, and how it is intended to incorporate them, if at all.
- v. Details of any alternative methods of refuse disposal that could affect the future viability of the landfill operation.
- vi. The effects of landfill traffic on the local road network that serves the landfill site taking into account overall traffic conditions at the time.

The first five yearly report shall be submitted to the Council on or as soon as practicable after 1 June 1999. The reports shall in each case (with the exception of the report referred to in (vi)) deal with the preceding year or five years as appropriate.

Community Committee

q. The Landfill Operator shall:

- Consult with tangata whenua and representatives of local residents (including the Whitford Residents and Ratepayers Association) to facilitate the establishment of a Community Committee comprising up to five representatives of those groups, a representative of the Landfill Operator and up to two representatives of the Council
- Ensure, as far as practicable, that those living in close proximity to the landfill and those living in the broader Whitford Community are represented on the Committee
- Discuss matters relevant to the landfill including, but without limitation, concerns and complaints of residents and aspects of non compliance and ways of alleviating them
- Disseminate information to the Committee about the landfill and about any future proposals for the landfill
- Ensure its representative attends meetings of the Committee on a quarterly basis or sooner if requested by the Council's Director of Environmental Management
- Ensure its representative attends any mediation held at the request of the Council's representative in the event of disagreement between the Landfill Operator and members of the Committee over matters relating to the landfill.

Archaeological

r. In the event of archaeological features being uncovered (e.g. shell midden, hangi, or oven stones, pit depressions, defensive ditches, artefact material or human bones), work is to cease in the vicinity of the discovery and the Auckland Council, the New Zealand Historic Places Trust and the appropriate iwi authorities shall be contacted so that appropriate action can be taken. This includes such persons being given a reasonable time to record and recover archaeological features discovered before work may commence.

Right of access

s. Right of access to the Whitford Landfill for the purposes of refuse disposal shall be restricted to the following users:

- i. Refuse Vehicles
- ii. Private vehicles of residents from within the area shown on Figure 10.2.3 at the rear of this section.

The Landfill Operator shall licence all Refuse Vehicles. All vehicles shall be required to display a registration number issued by the Landfill Operator. Vehicles not so licensed and displaying a registration number shall be prohibited from using the landfill except where a temporary licence is granted.

Return trips by Refuse Vehicles shall be limited as follows:

- During the operating life of the Quarry, while quarry product is being extracted and removed from the site, the number of return trips generated in any one year by Refuse Vehicles shall not exceed an average of 110 per day (12 month average), corresponding to a refuse quantity of 275,000 tonnes per annum.
- Once the Quarry has ceased to extract and remove rock from the site, but while final

quarry remedial works are being undertaken, the combined number of return trips generated in any one year by Refuse Vehicles and quarry trucks shall not exceed an average of 210 per day (12 month average), provided, however, that the permitted number of return trips by Refuse Vehicles shall not be greater than 155 per day (12 month average), corresponding to a refuse quantity of 350,000 tonnes per annum.

- After completion of quarry remedial works, the number of return trips generated in any one year by Refuse Vehicles shall not exceed an average of 155 per day (12 month average), corresponding to a refuse quantity of 350,000 tonnes per annum.

t. The Landfill Operator shall require that all roads be fully enclosed or secured.

Hours of operation

u. The hours of operation may not commence before 7.00am Monday–Friday, 7.30am Saturday and 11.00am on Sunday; and shall cease no later than at 6.00pm Monday to Saturday and 4.00pm on Sunday; subject to the following limitations and exceptions:

i. The landfill shall be closed on Good Friday, Christmas Day and New Year's Day; and where practicable on other public holidays having regard to the requirements of transfer station operations.

ii. The hours of operation may be extended to no later than 9.00pm (Monday to Saturday) for equipment maintenance works and office work only, except in cases of emergency.

iii. Delivery of refuse to the site shall be limited as follows:

- Deliveries from commercial and industrial users:

Monday–Friday: 7.30am to 5.00pm

Saturday: 7.30am to 2.00pm, but extended to 5.00pm for Transfer Station transporters.

- Deliveries from private users:

Monday–Sunday: 11.00am to 3.00pm

Proviso:

On Saturdays following a week in which there is a public holiday these hours may be extended to 4.00pm for the commercial vehicles of Auckland Councils domestic refuse contractors.

Site Access

v. Entrance gates across the access to the landfill shall be provided and locked outside the hours of operation of the landfill. In order to provide for circumstances where the hours of operation of the quarry do not coincide with those of the landfill, the quarry operator shall be provided with a key to the entrance gates to enable quarry vehicles to access the quarry during the quarry's hours of operation. For the avoidance of doubt, landfill trucks that are commercial and industrial users may park or "stack" on the area to be retained for stacking of vehicles shown on Figure 10.2.6 during the period shortly before 7.30am, but may not travel beyond that area until 7.30am

Initial Establishment Works

w.

i. The following works shall be undertaken as soon as practicable unless otherwise specified in general accordance with the relevant provisions of the Management Plan:

- Earth embankment construction and screen planting along the Trig Road and Whitford-Maraetai Road frontages which shall be carried out progressively.

ii. In addition to v(i) above the ongoing maintenance of the following works are required:

- Earth embankment construction and screen planting along the Trig Road and Whitford-Maraetai Road frontages
- Fencing of the boundaries of the designated areas shown in Figure 10.2.1 of Chapter 10.2 with a stock-proof fence.

Proviso:

Where areas abutting a boundary of the designated site are intended to be used for landfill purposes then the Council may waive this requirement in respect of the relevant part of the boundary.

iii. The following operational conditions shall apply:

- The retention of the existing access and entrance facilities off Whitford-Maraetai Road as indicated on Figure 10.2.2 of Chapter 10.2
- The retention of areas for stacking of refuse vehicles off public roads as indicated on Figure 10.2.6 of Chapter 10.2
- The continued upgrading of leachate treatment and storage facilities to comply with any relevant resource consents.

Restrictions on Waste

x. Wastes disposed of to the Landfill must comply with the Whitford Landfill Waste Acceptance Criteria as set out in the Landfill Management Plan.

y Permitted Waste — The categories of refuse permitted to be disposed of at the landfill shall be limited to the following:

- General household, commercial or industrial refuse, but excluding prohibited waste
- Clean fill
- Offal and animal carcasses

Buffering

z. A buffer zone of 30 metres shall be left between the landfill operations and the following boundaries of the site:

- i. The Whitford-Maraetai Road boundary.
- ii. The Trig Road boundary.
- iii. The boundary with Allotment 30, Maraetai Parish.

The buffer in (i) and (ii) (and in (iii) if required by the Council) shall be screened with planting and bunding and otherwise developed to present an attractive buffer and as far as possible to screen the landfill from nearby dwellings and adjoining roads; and to minimise noise generated by the landfill.

The planting shall be augmented as necessary from time to time with an appropriate mix of indigenous species in order to maintain a vegetative screen at all times throughout the life of the landfill. Details of the development, planting and bunding shall be included in the Management Plans.

Refuse Placement and Cover Explanatory Statement:

Refuse placement and cover is controlled by a regional resource consent.

Noise

aa. Construction noise — construction noise from site development works and building construction on the site shall be as recommended in, and be measured and assessed in accordance with NZ 6803P" 1984 "The Measurement and Assessment of Noise from Construction, Maintenance and Demolition Work". Construction activities shall be clearly identified in the Management Plan (Construction Manual).

bb. Landfill operations — The corrected noise level (L10) of any landfill operations as measured at or within the notional boundary of any existing dwelling outside the landfill site shall not exceed the following limits:

Monday to Friday	7.00am-6.00p	55 dBA
Saturday	7.30am-6.00p	55 dBA
Sunday and all other times		45 dBA

Note:

Notwithstanding the standards in this rule the Landfill Operator should aim at achieving a corrected L10 noise level of 50dBA at the notional boundary of any rural property between 7.00am and 6:00pm from Monday to Saturday, as a matter of good practice.

cc. The notional boundary shall be taken to be a line 20 metres from the facade of any existing dwelling or the legal boundary where this is closer to the dwelling.

dd. Subject to the express provisions of these conditions, noise levels shall be measured and assessed in accordance with the requirements of New Zealand Standards (NZS 6801:1991 Measurement of Sound and NZS 6802:1991 Assessment of Environmental Sound)

ee. The noise shall be measured with a sound level meter complying with the International Standard IEC 651 (1979): Sound Level Meters, Type I,

ff. A certificate from an acoustical engineer shall be given to the Council within seven days of its request and shall demonstrate that the above performance standards are being complied with. In the event of non - compliance, information shall be given to the Council setting out reduction measures to ensure compliance which shall be implemented forthwith.

Gas Emission

gg. A gas control system shall be installed progressively for the collection and burning or utilization of landfill gas so as to mitigate odours from gas. Details of the system shall be included in the Management Plan.

Protection of Ground Water and Containment System

hh. The Landfill Operator shall ensure that all necessary measures are taken to ensure ground water levels on site are controlled or other alternative measures are undertaken so as to provide in either case for the effective containment of leachate.

Nuisances

ii. Odour — Effective procedures to control discharges to air shall be implemented to ensure compliance with the conditions of any air discharge permit granted under section 15 of the RMA. In particular but without limitation the following measures shall be undertaken to prevent that occurrence:

- Malodorous special wastes shall be accepted only by prior arrangement and shall be covered immediately upon acceptance. Furthermore, malodorous special waste shall only be accepted when there is sufficient fresh refuse or cleanfill available, and in any event no later than 3.00pm Monday to Friday.
- The collection and treatment of landfill gas shall be undertaken in accordance with the relevant conditions on the Air Discharge Permit.
- The avoidance as far as practicable of practices which require excavation into old refuse
- The use of cover material as set out in condition (cc)
- The implementation of a policy of liaison with the producers of potentially odorous loads to minimise the occurrence of problems
- The use of odour neutralising or masking sprays.

jj. Litter — Effective procedures shall be implemented by the Landfill Operator to:

- Prevent the escape of litter from the landfill
- Ensure all reasonable steps are taken to keep the roads leading to the landfill and properties adjacent to the landfill free from litter
- Promptly clean up any materials dumped in the vicinity of the site entrance, including Trig Road

- Promptly, if so requested by the Council, remove any litter that appears to have come from the landfill operations.

kk. Vermin, Insects, and Birds — Effective control and eradication procedures shall be implemented at the site to minimise the incidence of birds, rodents, insects and any other form of potential nuisance. Full details shall be set out in the Management Plan.

ll. Dust and Mud Control — Effective control procedures including the following shall be implemented: On site:

- Sealing the entrance road
- Sealing heavily trafficked permanent roads
- Cleaning roads where required
- The use of water sprays and water carts
- Maintain a permanent wheel wash and hose down facilities at an appropriate location Off site:
- Cleaning of roads leading to the landfill to remove mud emanating from the landfill.

mm. Fires — The intentional burning of refuse and any other material apart from the landfill gas is prohibited. The Landfill Operator shall maintain and operate a fire protection system to the satisfaction of the Council and any other relevant statutory authority having regulatory control over the matter.

Monitoring and Records

nn. The Management Plan shall provide for a monitoring programme which shall be carried out by the Landfill Operator. The programme shall accord with the provisions of the Outline Management Plan on monitoring and provide for the monitoring and testing of the following during the landfill life and the aftercare period:

- Construction and performance of the landfill liner
- Ground and surface water
- Leachate
- Landfill gas
- Noise
- Other things or matters required to be monitored by the Council.

Monitoring and testing shall be carried out with such regularity as is required by the conditions of the regional consents provided that if there are no such consents applicable then the monitoring and testing should be carried out with such regularity as the Council or other relevant statutory regulatory authority requires.

Persons undertaking monitoring and testing for the Landfill Operator shall be approved by the Council or other relevant statutory regulatory authority after consultation with the Peer Review Panel.

The Landfill Operator shall permit the Council to have access to the landfill at all reasonable times for the purpose of any inspection or monitoring the Council might wish to undertake.

oo. The Landfill Operator shall keep detailed records on the following:

- All monitoring activities and results including non-standard results
- Engineering works including civil, mechanical and electrical (which records shall include "as-built" drawings)
- Quantities of refuse (including details according to type) delivered to the site and/ or removed from the site
- Placement of controlled waste disposed of on-site according to type and quantity
- Complaints
- Fires
- Special waste
- Test results
- Pest control
- Emergencies
- The contingency plan and its effectiveness
- Failures or events contrary to these conditions or the Management Plan and the actions taken to alleviate the consequences.

pp. The Landfill Operator shall report to the Peer Review Panel monthly on the matters listed in (oo), and promptly comply with any request by the Panel or the Council or other relevant statutory regulatory authority for copies of the records required by condition (oo).

Completion Works and Closure Report

qq. All structures no longer required for the landfill shall be removed at the earliest practical opportunity on completion of their functions.

Prior to landfilling above RL90m within the shaded area indicated on Figure 10.2.5, ("the Shaded Area"), the Landfill Operator shall submit to the Peer Review Panel a report prepared in accordance with best industry practice that, amongst other things:

- a. Analyses historical settlement at the Landfill,
- b. Predicts the rate of settlement in the shaded area based on historical Landfill settlement patterns, and
- c. Identifies a fill sequence and pre-settlement fill contour plan for the Shaded Area that allows for a degree of over-filling. If the Peer Review Panel accepts the report and advises the Manager — Compliance Enforcement and the Whitford Landfill Community Liaison Committee in writing that it confirms the conclusions reached in that report then a degree of over-filling shall be permitted in the Shaded Area to allow for ongoing settlement. The degree of over-filling shall relate to the predicted rate of settlement identified in the report and ensure a settled profile in the Shaded Area will be achieved at or about the contour levels shown in Figure 10.2.5 within 5 years of final waste placement.

Each completed Landfill stage shall, as soon as practicable after completion of refuse

placement in that stage be capped, topsoiled and landscaped so as to render the site suitable for an end use for public recreational and open space purposes. Subject to regional consent conditions relating to the clay cap, any trees or shrubs to be planted on the finished Landfill shall be selected and located so that generally they will not grow to a height exceeding RL120 metres.

rr. As part of the Site Landscaping and Post-Closure Aftercare Plans, the Landfill Operator shall include detailed provisions, prepared in consultation with the Council, the Community Committee and owners of adjacent sites to give effect to the above requirements to the satisfaction of the Council.

ss. Capping shall be a minimum of 600mm depth of clay-based material and shall be compacted in at least 2 layers to achieve a permeability generally in the range of 10⁻⁷ to 10⁻⁸m/second, or such alternative equivalent design as the Landfill Operator may propose, to the approval of the Auckland Council, or through a resource consent. Capping in areas where plants are to be located must be sufficient to ensure that root systems do not penetrate the cap.

tt. The preparation of areas of rehabilitated landfill that are to be planted shall be adequate to ensure healthy planting and growth of grass, shrubs or trees or a combination thereof. Details shall be provided in the Management Plan.

uu. A closure report shall be prepared to the satisfaction of the Council and submitted no later than 6 months after the last refuse is placed on the landfill site.

Time Frame

vv. The settled contours of the Landfill shall be within the envelope shown on Figure 10.2.5 (which shall be entitled "Whitford Landfill Post Settlement Contours"). With the exception of final restoration work, all landfilling on the site shall cease by the end of 2041 or such earlier year as specified in a regional consent unless the period is extended by a resource consent. Final restoration work shall be completed as soon as practicable.

Post-Closure Aftercare

ww. The Landfill Operator shall:

- Be responsible on a continuing basis for:
 - the control of groundwater and stormwater
 - the collection and disposal of leachate and landfill gas, and
 - the post-closure aftercare of the landfill for a period of 30 years or such longer period as the Council require.
- Prepare a post closure plan to the satisfaction of the Manager — Compliance Enforcement, at least 10 years before the anticipated closure of the Landfill which will describe the measures that will be taken to prepare the Landfill for its future use. The plan will include an estimate of ground levels, planting/landscaping and final use proposals,

- estimate of truck numbers, and measures to control gas and leachate.
- Prepare a post closure aftercare completion report to ensure and demonstrate to the satisfaction of the Council, and any other appropriate regulatory authority that the Landfill is in a state that does not present or have the potential to present any risk or adverse effect on or to the environment, and that there is no need for any further control, treatment or measures of any kind to ensure the continuation of that state.

Post-Closure Aftercare Fund Bond

xx. Any person or body other than the Council which is involved as Landfill Operator of the landfill shall forthwith upon any written request of the Council enter into and maintain a cash (or equivalent) bond in favour of the Council and drawn in terms satisfactory to the bond holders to provide security for early closure, environmental remediation, and post-closure aftercare; and to ensure compliance with these conditions, the conditions of any resource consents and with the Management Plan and to provide security for the Council's costs and charges relating to these conditions.

The bond shall be for an initial sum of up to \$2.1 million, which sum shall be incremented by up to \$3.00 per tonne of refuse deposited at the landfill after 1 April 1994, up to a total sum not exceeding \$12.6 million. Both the bond fund and the increments shall be adjusted annually according to the Works Construction Cost Index, or other suitable alternative approved by the Council's Manager — Resource Consents and Compliance.

The actual amounts of the initial sum, the increments, and the total sum shall be fixed by the Council having regard to the proportionate interest of the relevant person or body in the operation of the Whitford Landfill.

Proviso as to review:

The maximum amounts of the initial sum, the increments and the total sum may be subject to review at the time of any review of the district plan or pursuant to any change to the district plan to ensure that those limits provide adequate security for the above purposes. In the event of any change in any of the above mentioned sums, the bond shall be amended accordingly.

Monitoring Charge

yy. The Landfill Operator shall pay the Council's reasonable monitoring charges relating to the conditions in this designation as they fall due.

Community Fund

zz. The landfill operator shall from 1 July 1997 contribute to a Trust established by the Council for the benefit of the local community within the vicinity of the Whitford Landfill.

Such contribution shall be a levy of:

- 50 cents per tonne for each tonne of refuse received from the former District of Manukau and
- \$1 per tonne for refuse received from outside the former District of Manukau.

These levies shall be reviewed by the Council at five yearly intervals with the first review to be made on 1 July 2011. The review may take into account, among other factors, any changes to the Consumer Price Index, with the Reference Index being the June Quarter of 2006.

Maintenance of Internal Access Roads

aaa. The existing sealed access road within the Joint Landfill/Quarry Area shall be maintained at all times to minimise the potential of body rattle due to uneven road surfaces. This access road shall be inspected on a 6 monthly basis as part of a detailed walkover with an engineer who shall report to the Landfill Community Committee on the works (if any) that may be necessary to minimise the potential for body rattle. The works shall be undertaken by the Landfill Operator in an expeditious manner and to the satisfaction of the Manager — Compliance Enforcement.

Rule 10.2.8.1.2 Whitford Landfill Excavation of Cover Material Designation (Zone 2): Purposes

Subject to the conditions in Rule 10.2.8.1.2 the area shown as Zone 2 in Figure 10.2.1 may be used for the purposes of:

- mineral extraction other than topsoil complying with the provisions of Rule 10.2.8.1.2.1 except that mineral resources extracted from the designated site may not be transported off the designated site.

Rule 10.2.8.1.2.1 Conditions

a. Before commencing any operations the Landfill Operator shall furnish an Excavation Management Plan to the Council which shall include the following information in plan form and in explanatory material:

- i. Demarcation of the area to be excavated
- ii. Existing contours
- iii. Final contours including proposals for the coordination of final levels of adjoining land
- iv. Ultimate drainage of quarried lands
- v. An indication of the period over which quarrying will continue, and of staged development
- vi. Location of buildings and plant
- vii. Provision for the disposal and/or stockpiling of overburden, waste and excavated material, including the areas to be used for stockpiling
- viii. Areas for stockpiling of topsoil
- ix. Provision for screening unsightly features from public view and fencing dangerous or potentially dangerous features
- x. Description of methods to be employed to prevent contamination of air or natural water and to comply with the noise provisions of these conditions
- xi. Provision for the progressive restoration of the site such that the land will be left in a condition suitable for the establishment of those uses to which the land may subsequently be

put

xii. A landscape plan indicating the uses the excavated areas will be put to once the excavation has been completed.

b. The Excavation Management Plan and any amendments shall be subject to the approval of the Council (in relation to matters required to be approved by Council in consultation with the Peer Review Panel referred to in Condition (j) of Rule 10.2.8.1.1.1 and when so approved shall be strictly adhered to at all times.

c. No excavation shall occur prior to an Archaeological Management Plan being approved by the Manager — Resource Consents and Compliance. The Archaeological Management Plan shall demonstrate that all necessary authorities under Historic Places Act 1993 have been granted by the Historic Places Trust.

d. No topsoil shall be disposed of by sale or otherwise permanently removed from the site except as may be specified in the Excavation Management Plan and approved by the Council.

e. No blasting shall occur on the site.

f. The excavated area and haul roads shall be wetted down on a regular basis during dry/windy conditions to the approval of the Council's Manager — Resource Consents and Compliance to mitigate any dust nuisance.

g. Noise conditions — The corrected noise level (L10) of any excavation operations as measured at or within the notional boundary of any rural dwelling outside the site shall not exceed the following limits:

Monday to Friday	7.00am-6.00pm	55 dBA
Saturday	7.30am-6.00pm	55 dBA
Sundays and all other times		45 dBA

i. The notional boundary shall be taken to be a line 20 metres from the facade of any existing dwelling or the legal boundary where this is closer to the dwelling.

ii. The noise levels shall be measured and assessed in accordance with the requirements of New Zealand Standards (NZS 6801: 1991 Measurement of Sound and NZS 6802:1991 Assessment of Environmental Sound)

iii. The noise shall be measured with a sound level meter complying with the International Standard IEC 651 (1979): Sound Level Meters, Type I.

Rule 10.2.8.1.3 Whitford Landfill Spray Irrigation Designation (Zone 3): Purposes

Subject to the conditions set out for each activity in Rule 10.2.8.1.3 the area shown as Zone 3 in Figure 10.2.1 may be used for the following purposes:

Rule 10.2.8.1.3.1 Conditions

- a. The spray irrigation of treated leachate including the construction and operation of a leachate storage pond.
- i. The above activities shall be carried out in accordance with Land Use Consent 1360 granted by Manukau City Council and the technical information and plans B11/134 held by the Council.
- b. Stormwater management and the construction of treatment facilities, ponds and wetlands.
- i. The above activities shall be carried out in compliance with resource consents granted by the ARC dated 5 December 1994 being Permit Nos. 939343, 939345, 939346, and 939348 -939357.
- c. Mineral extraction
- i. The above activities shall be carried out in compliance with the provisions of Rule 10.2.8.1.2.1

Rule 10.2.8.1.4 Conservation Covenant

There shall be no activities inconsistent with the Conservation Covenant within the area subject to a Conservation Covenant (indicated as "Bush Protection Area" on Figure 10.2.1).

After the Quarry operations and remedial works have ceased the Requiring Authority shall, to the satisfaction of the Manager — Compliance Enforcement, in the Conservation Covenant area implement the weed and pest- animal control programme that has been established and approved in accordance with the Quarry Notice of Requirement, subject to any additions and alterations inserted by the Manager — Compliance Enforcement.

Explanation:

In accordance with condition 2(d) of the Whitford Quarry Notice of Requirement a Conservation Covenant applies to the areas noted and identified as "Bush Protection Area" identified in Figure 10.2.1 in perpetuity to the effect that any native bush in that area shall not be damaged or destroyed ("the Conservation Covenant"). It is to be noted that the area to which the Conservation Covenant applies includes land designated as Landfill that is to be protected in order to mitigate the effects of the Quarry, not the effects of the Landfill.

Rule 10.2.8.1.5 Management of Cultural Heritage

The Landfill Management Plan shall incorporate suitable measures for monitoring of and avoiding adverse effects on cultural heritage sites, including but not limited to:

- i. Measures to protect the pa site RI 1/333 to the southwest of the Whitford Quarry extension area from damage from landfilling activities and any encroachment of heavy machinery, in accordance with accepted archaeological practice.
- ii. Involvement of Ngai Tai Umupuia in the identification and management of cultural heritage sites
- iii. Ceasing work in the immediate vicinity if subsurface archaeological evidence is unearthed during construction (e.g. intact shell midden, hangi, storage pits relating to Māori occupation, or cobbled floors, brick or stone foundation, and rubbish pits relating to Maori occupation),

- and contacting the Manukau City Council, Historic Places Trust and tangata whenua so that appropriate action can be taken. This includes such persons being given an reasonable time to record and recover archaeological features discovered before work commences.
- iv. applying for an Authority to Modify under Section 11 of the Historic Places Act 1991, in addition to any required approval of the Council, if modification of an archaeological site is necessary. (Note that this is a legal requirement).
 - v. in the event of human remains being uncovered ceasing work in the immediate vicinity and contacting the tangata whenua, Historic Places Trust and NZ Police so that appropriate arrangements can be made.

Rule 10.2.8.1.6 Outline Plan for O'Brien Block

An outline plan for work in the O'Brien block (Part Allotment 35 DP 15031 CT 778/186) in terms of s176A of the Resource Management Act 1991 will be required prior to the commencement of work. The plan shall include but not be limited to information about the depth of excavations for cover material, a plan of the excavation, proposals for protecting slope stability adjacent to the pa site and the covenanted area.

Note:

That if excavation is proposed on the O'Brien Block, including to the east of the Hog Hill Stream, a resource consent will be needed from the Auckland Council.

Rule 10.2.8.1.7 Coordination between the Quarry and The Landfill

Appropriate procedures shall be incorporated into the Landfill Management Plan to deal with coordination between the Quarry and the Landfill over issues including but not limited to, stormwater, noise and dust, and the Landfill Manager or other person responsible for the day to day operating of the Landfill, will be the first point of contact.

Rule 10.2.8.1.8 Height of Existing Water Tank Ridge

Landfill activities shall not lower the height of the existing water tank ridge / saddle immediately south of Contour Plan U (the area to be defined by a survey of the land undertaken in consultation with the owners of the property at 382 Ara Kotinga Road, Whitford, within 6 months of the designation being confirmed). Additional screen planting shall be undertaken along this saddle in consultation with the owner of the property at 382 Ara Kotinga Road, Whitford, within 24 months of the designation being confirmed.

616 Awhitu Regional Park

Designation Number	616
Requiring Authority	Auckland Council
Location	216 Brook Road, Waiuku
Rollover Designation	Yes
Legacy Designation	Designations 99 and 99A, Auckland Council District Plan (Franklin Section) 2000
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Regional park - for recreational use (including the ongoing operation and maintenance of trails and visitor infrastructure for informal outdoor recreation activities) and for the conservation of natural and cultural values.

Conditions

General

1. Any works are to be undertaken in accordance with either the approved Regional Parks Management Plan (2010) or any subsequent management plan.
2. Before any works, including new buildings, are undertaken an Outline Plan(s) shall be submitted in terms of Section 176A of the Resource Management Act 1991 to the Council unless the works are exempt, under Condition 3, from requiring an outline plan of works. The Outline Plan(s) of Works shall show those matters required by Section 176A of the Act and those matters specified in the following conditions (where relevant). All work shall be undertaken in accordance with the Outline Plan(s).
3. The following works will be exempt from an outline plan of works, except where the works involve a scheduled heritage place, pursuant to section 176A (2) of the Resource Management Act 1991:

Development and maintenance of park infrastructure		Nature of works
Tracks	Construction and maintenance of tracks and trails in a manner that prevents erosion and/or avoids sensitive natural and cultural features and sites	Construction and maintenance of tracks and trails up to 3.0m in width, including the construction of track structures, such as directional signs, information signs, safety barriers, foot-bridges, steps, board walks and rafts, and the maintenance of existing tracks involving: i. Water Tables and track drainage ii. Track surfaces iii. Track structures iv. Modification of vegetation up to 1m from the edge of the track
Buildings, structures and utility services,	Construction and maintenance of minor recreational structures and	The construction of utility services and minor recreational structures, such as notice boards, information kiosks, signs, picnic tables, styles,

including drainage systems	utility services	entrance gates and shade shelters and toilet blocks up to 100m ² in area.
	Maintenance, repairs and minor alterations to buildings, structures and utility services	
Car parking and roads	Construction and maintenance identified in an approved management plan and minor alterations to existing car parks and roads	Works associated with approved car parking areas and access roads, including the modification of vegetation up to 1m from the edge of the car park or road, or within the car park for safety reasons
Farming, including farm woodlots	Construction and maintenance of farming structures and roads	Works associated with operating and maintaining existing farm operations, including management livestock fencing and the fencing of conservation and cultural heritage sites, and livestock management fences and structures, such as stockyards
Vegetation	Management of vegetation for specified reasons	Vegetation management involved in: i. Removal of non-native and non-scheduled plants ii. The development of approved works iii. The maintenance of view shafts identified in the Regional Parks Management Plan iv. Management of farm woodlots, including their harvest

Note:

This condition does not prevent the use of the land for the purpose of Regional Park.

Cultural / Heritage / Archaeological

4. Where any works or development involve the demolition of, or alterations or additions to a scheduled historic heritage place (item) an outline plan of works is required. The following shall be submitted with the outline plan of works:

- a. An assessment of the effects on the historic heritage values of the place; and
- b. A consideration of alternative methods and/or appropriate mitigation to prevent or avoid damage, loss or destruction of the values of the historic heritage place

Note:

For the avoidance of doubt, this condition does not prevent the use of the land for park purposes, but is to conserve and protect the recognised natural and cultural values that significantly contribute to the park.

Exemptions:

Condition 4 will not apply in the following circumstances:

- i. In respect of buildings or structures, the redecoration, repair and/or insignificant alteration of any existing fabric or detailing carried out in a manner and design and with materials similar in appearance to those originally used, which does not detract from those features for which the place has been scheduled;
- ii. Any routine maintenance which does not destroy, compromise, damage or impair the heritage

values of the scheduled place; or

iii. Where there is a conservation plan or similar plan that has been prepared for the management of the scheduled historic heritage place and the proposed new works are in accordance with this conservation plan. The conservation plan or similar plan may be prepared as a document supplementing the approved Regional Parks Management Plan, prepared in terms of section 83 of the Local Government Act 2002, but must include an assessment of the historic heritage values of the place, relevant management policies and objectives, and a specific management plan and a monitoring regime.

Transport

4. An Integrated Transport Assessment shall be prepared and accompany any Outline Plan of Works which results in:

a. Predicted vehicle movements to and from the park exceeding 100 vehicle movements per hour (excluding events).

The Integrated Transport Assessment (ITA) report shall be produced by a suitably qualified traffic engineer and/or transportation planner to the satisfaction of Auckland Transport, Manager of Road Corridor Operations. The ITA shall give particular consideration to the following matters:

- i. The effects on the surrounding public road network arising from parking usage, access, loading, traffic generation in the park, including addressing any real or potential road safety implications;
- ii. Pedestrian accessibility to the site and the need for any infrastructure to ensure safe crossing points are provided for including provision for cyclists and horse riding if appropriate);
- iii. Where passing bays are proposed on any road which is only wide enough for one way traffic; and
- iv. Public transport accessibility, including tourist buses and campervan, particularly onsite manoeuvring.

Parking and Access

5. The following works related to new roading and/or additional parking shall be constructed to the satisfaction of council:

- i. The first 20m of access from any sealed public road shall be appropriately sealed with all-weather dust free surface; and
- ii. Parking and loading areas immediately adjoining a public road shall be designed and constructed in accordance with AS/NZS 2890.1:2004 standards or any subsequent revisions.

Advice Notes

1. The Requiring Authority and operational staff are encouraged to seek advice from council's Heritage Unit prior to undertaking the exemptions to Condition 4 in order to confirm an outline plan is not required.

2. Work affecting both recorded and unrecorded pre-1900 archaeological sites (including surface and sub-surface marine and terrestrial deposits, building or structures) is subject to an authority under the Historic Places Act 1993. Any activity that may modify, damage or destroy an archaeological site requires an authority from the New Zealand Historic Places Trust (NZHPT) in order for the work to proceed lawfully. If an unrecorded archaeological site is discovered while undertaking work, work must cease and the NZHPT advised of the discovery. The NZHPT will inform the designating authority of the protocol, which may require obtaining a retrospective authority to modify. In addition to advising the NZHPT, Council's Heritage Unit shall be advised of the discovery.

3. Examples of evidence of archaeological sites include (but are not limited to) burnt and fire cracked stone, charcoal, rubbish heaps including shell, bone and/or glass and crockery, ditches, banks, pits, old building foundations, artefacts of Māori and European origin or human burials.

4. The Regional Park Management Plan is prepared in accordance with Section 83 of the Local Government Act 2002 and, where appropriate, Section 41 of the Reserves Act 1977. Public consultation is required at the time of preparing or amending a management plan or development plan for a Regional Park.

620 Whitford Quarry

Designation Number	620
Requiring Authority	Auckland Council
Location	401 Trig Road, Whitford
Rollover Designation	Yes
Legacy Reference	Designation 233, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Whitford Quarry.

Joint Landfill/Quarry Area — Explanatory Statement

As well as being used for landfill purposes, the Joint Landfill/Quarry Area is also used for the purpose of stockpiles, water reticulation and treatment systems, access for vehicles and minor buildings.

Conditions

Introduction

I. Any reference in these conditions to a specified officer of the council includes an officer and/or a person authorised by the City Manager to act in the place of the specified officer, being an officer and/or a person having experience, professional competency and responsibility, as appropriate, in respect to the matters concerned.

II. Any reference in these conditions to the term "Quarry Operator" means the council in its capacity as Requiring Authority, and includes any person or body that is operating the quarry on behalf of the council, or as or on behalf of any successor to the council in its capacity as Requiring Authority or as quarry owner.

III. Point of Contact. The Landfill and Quarry operators have agreed to identify a single nominated person who shall be the key point of contact for members of the community and/or Council officers, to contact at all times during normal working hours. The initial point of contact will be the Landfill Site Manager, but may change from time to time following consultation between the Landfill and the Quarry operators and the community. The person shall be available during normal working hours and their name shall be made known through the regular Quarry and Landfill Community Committee meetings and to the Chairperson of the Whitford Residents and Ratepayers Association.

a. Quarry Management Plan (QMP)

I. The Whitford Quarry shall be operated in accordance with the latest version of the Whitford Quarry Management Plan as approved by the council. The Plan shall include the following information in plan form and in explanatory material and any other additional information requested by the Manager Southern Resource Consents and Compliance;

- i. Demarcation of areas to be excavated;
- ii. Areas to be used for the disposal and/or stockpiling of overburden, waste and excavated material,

including areas to be used for stockpiling;

iii. Areas for stockpiling of topsoil;

iv. Location of built structures including buildings and crusher;

v. Proposals for the co-ordination of final levels of adjoining land;

vi. The ultimate drainage of quarried lands;

vii. An indication of the period over which quarrying will continue, and of staged development;

viii. An Operations Manual containing the following:

- Management of air pollution
- The Noise Management Plan (NMP)
- Stormwater management
- Leachate monitoring and management
- Coordination procedures with the Landfill Site Manager in mitigating the above
- Contingency plans
- Emergency procedures
- ix. Reference as appropriate to:
 - Relevant parts of the Assessment of Environmental Effects dated 16 September 2005, noted by Council as P28899 and lodged in support of the Notice of Requirements with specific reference to Volume 3, Figure Q5 entitled 'Quarry Management Plan', noted by Council as 22293/206-FH05 and dated June 2005, which is to be attached to the Quarry Management Plan;
 - Relevant evidence lodged in support of the Notice of Requirement at the Commissioners Joint Hearing in February and March 2006, and the Quarry Management Plan dated 5 December 2000 as appropriate.
- x. Specific reference to the need for good quarrying practice to minimise visual impact.
- xi. A section addressing monitoring, that will include all records, analysis and reporting requirements, including reporting to the Whitford Quarry Community Committee;
- xii. Specific reference to the seeding of the overburden batter areas as proposed through the evidence lodged in support of the Notice of Requirement.
- xiii. Copies of the resource consents relevant to the quarry operations, with specific reference to the consent conditions in each relevant section of the Quarry Management Plan;
- xiv. A section addressing quarry management, that will specify the roles of staff employed at the site;
- xv. Separate and identifiable sections addressing rehabilitation and slope stability, with specific reference to conditions 2(o) and (t) of this Designation;
- xvi. Reference to other legislation and statutory approvals relevant to the environmental compliance of operations at the site.
- xvii. A requirement for:
 - The Requiring Authority to identify its quarry boundaries with identifiable markers and monitor these on a six monthly basis to ensure quarrying operations do not go beyond those boundaries;
 - A plan to be attached to the Quarry Management Plan to clearly show the quarry boundaries;
- xviii. A section addressing erosion and sedimentation management.

The Quarry Management Plan shall also record the following:

- a. That in order to further mitigate the effects of traffic on the environment, the Requiring Authority, in consultation with the Landfill Site Manager and the Quarry Operator, shall use its best endeavours to utilise the empty quarry trucks travelling to the site for the transportation of cover material, in order to minimise the total number of heavy vehicles travelling on Whitford Roads. The Requiring Authority shall inform the Whitford Quarry Community Committee every 6 months on the actions it has taken to achieve this objective. These details will be included within the Quarry Management Plan;
- b. That all trucks shall enter and leave the Quarry site via the joint Quarry/Landfill access road. The

upper Quarry track to Trig Road shall be secured by a locked gate and shall be used in emergencies only. The gate shall be fitted with a notice to the satisfaction of the Manager Southern Resource Consents and Compliance bearing the words "Quarry — Emergency Use Only" or words to like effect;

c. That any native bush contained within the areas of unformed road identified on Figure 5.9 attached to this designation will not be damaged or destroyed unless such damage or destruction is necessary to facilitate the formation of the road.

The QMP shall be submitted by the Requiring Authority to the Manager Southern Resource Consents and Compliance for approval. The approved QMP, subject to any additions and alterations inserted by the Manager Southern Resource Consents and Compliance, shall be implemented by the Requiring Authority to the satisfaction of the Manager Southern Resource Consents and Compliance.

II. The Quarry Management Plan shall be reviewed every 5 years from the date the designation is confirmed, except that this may be postponed by the Manager Southern Resource Consents and Compliance where the QMP has been subject to a requirement or a plan change or District Plan review within the previous 5 years.

III. Amendments shall also be made to the QMP from time to time to incorporate:

- i. Requirements of the Council to ensure more effective monitoring of the quarry operation and compliance with these conditions.
- ii. Requirements of the Council (regional consents) in relation to matters it is required to approve by legislation.
- iii. Changes sought by the Quarry Operator to give better effect to these conditions which have the approval of the Council where appropriate.
- vi. The requirements of any applicable legislative enactment.

IV. The Quarry Operator shall, when seeking approval to make changes to the QMP, provide details of the consultation it has undertaken with the Quarry Community Committee. The consultation shall be to the satisfaction of the Manager Southern Resource Consents and Compliance before approval is given to any changes to the QMP.

V. Upon completion of any amendments to the QMP, copies shall be provided to the Manager — Resource Consents and Compliance, the ARC, the chair of the Quarry Community Committee and the chair of the Whitford Residents and Ratepayers Association.

b. Site Rehabilitation

Upon the completion of any stage of the Quarry development, the Requiring Authority shall undertake rehabilitation planting in accordance with condition (o) and shall implement an adequate erosion standard as confirmed by the Requiring Authority's ecologist/arborist. These works shall be carried out within the planting season immediately following the cessation of the quarrying activities.

c. Co-ordination between the Quarry and the Landfill

i. Stormwater Run-off

All construction and excavation activity shall be undertaken in a manner that ensures stormwater run-off from any activity within the Quarry drains into an approved stormwater management system controlled by the Landfill Operator.

The Requiring Authority shall establish procedures, to be contained in the Combined Operations Agreement or other similar document, that in the event of any unplanned discharge of sediment, the Quarry Operator shall immediately contact the Landfill Site Manager and together they shall take effective action to ensure sediment flow into the Waikopua Estuary complies with the relevant Auckland Regional Council Permits granted for the Whitford Quarry and the Whitford Landfill. The

action taken and its effectiveness (including any monitoring) shall be promptly communicated to the Manager Southern Resource Consents and Compliance and the Chairperson of the Whitford Quarry Community Committee.

ii. Noise and Air Pollution

The Requiring Authority shall establish procedures, to be contained in the Combined Operations Agreement or other similar document, that in achieving compliance with the noise and air pollution controls, the Quarry Operator shall, where necessary, ensure co-ordination with any actions undertaken by the Landfill Site Manager.

d. Conservation Covenant

The Requiring Authority shall take immediate steps to covenant the areas notated and identified as "Bush Protection Area" identified on Figure 5.9 attached to this designation in perpetuity to the effect that it shall not damage or destroy any native bush in that area ("the Conservation Covenant"). In so far as the areas notated and identified as "Bush Protection Area" in Figure 5.9 include land that is unformed road, the covenant shall only apply to that unformed road as and from any point in time at which that road is stopped, provided that this condition shall not impose any obligation on the Requiring Authority or the Council to stop the road. The Covenant so entered into by the Requiring Authority shall be registered as an encumbrance on the title to the land so as to run with the land in perpetuity and bind successive owners. The encumbrance shall be prepared by the Council's solicitors and the reasonable expense thereof shall be met by the Requiring Authority.

The 'Bush Protection Area' to the south of the above parcel of land is covered by a similar condition applying to the Landfill designation and is identified as 'Bush Protection Area/Landfill Zone 2' on Figure 5.9 attached.

The boundaries of the Conservation Covenant shall be determined by survey and to the satisfaction of, the Manager Southern Resource Consents and Compliance and shall be finalised in general accordance with, but having no less an area than that depicted on Figure 5.9. Notwithstanding the Quarry designation over part of the area identified as 'Bush Protection Area' on Figure 5.9 attached to this designation, the Requiring Authority shall not damage or destroy any native bush contained within those areas.

On Figure 5.9, some 1.5 ha. of land is outlined as 'Back-Batter' area. When this area has been excavated and replanted in accordance with Condition (o), the Requiring Authority shall enter into a binding Conservation Covenant prepared in accordance with the provisions specified above in order to protect the bush.

e. Tonnage and Access

To mitigate the effects of traffic on the environment, the maximum quantity of rock transported from the Whitford Quarry onto Whitford–Maraetai Road shall be limited to 500,000 tonnes per year averaged over any five year period. Trucks operating from the Quarry shall be restricted to a maximum of two hundred (200) trucks per day and a 6 monthly average of one hundred (100) trucks per day. The Quarry operator shall maintain a register on site showing the daily tonnage and number of trucks with the register being open for inspection by Council officers during the hours of operation.

The access road shall be located within the Joint Landfill/Quarry Area outlined on Figure 5.9. The existing sealed access road shall be maintained at all times to minimise the potential of body rattle due to uneven road surfaces. The access road shall be inspected on a six monthly basis as part of the detailed quarry walkover with an engineer who shall report to the Quarry Community Committee on the works (if any) that maybe necessary to minimise the potential for body rattle. The works shall

be undertaken by the Quarry Operator in an expeditious manner and to the satisfaction of the Manager Southern Resource Consents and Compliance.

f. Noise from Blasting

i. The noise created by the use of explosives shall not exceed either a peak overall sound pressure level of 128dB (i.e a peak pressure of 0.05 kPa above atmospheric pressure) or alternatively, a peak sound pressure level of 122 dBC. The measurement shall be taken in either case at or within the notional boundary of the nearest affected occupied building existing at the time of public notification of the former Manukau City District Plan in 1995 and excluding any building used and occupied as part of a minerals extraction operation.

ii. All blasting shall be restricted to between 7.00am and 5.00pm (0700–1700), Monday to Friday inclusive, and between 7.30am and 5.00pm (0730–1700) on Saturdays except in emergencies.

g. Vibration

Vibration levels within the notional boundary of any dwelling on land zoned Rural existing as at the date the designation is confirmed, other than those properties owned or used by Auckland Council, shall comply with the recommended criteria given in ISO 2631:1989 and DIN 4150, provided that these levels are not exceeded more than 5% of the total number of blasts over a period of 12 months and do not exceed 10 mm/s at any time.

The Quarry operator shall undertake vibration and air overpressure measurements as the Council may from time to time require and maintain and make available for inspection such records of measurements as may have been made to ascertain compliance with the above controls. The frequency of blast monitoring, monitoring location(s), monitoring equipment and records of information shall be undertaken in accordance with the Quarry Management Plan.

h. Noise

i. The following noise requirements shall apply to the quarrying activities at all times:
The noise level (L10) as measured within the notional boundary of any rural dwelling shall not exceed the following limits:

Monday to Friday between the hours of 0700–1800 and Saturday between the hours of 0730–1800	55 dBA
At all other times including Sundays and public holidays	45 dBA

- The noise levels shall be measured in accordance with the requirements of NZS 6801:1991 Methods of Measuring Noise and assessed in accordance with NZS 6802:1991 Assessment of Noise in the Environment.
- The noise shall be measured with a sound level meter complying with the International Standard IEC 651(1979): Sound Level Meters Type I.

Note:

The notional boundary is a line 20m from the facade of any rural dwelling, or the legal boundary where this is closer to the dwelling.

ii. The Quarry Operator shall implement the Noise Management Plan ("NMP") dated May 2003 for the

purpose of minimising noise adversely affecting any rural dwellings which may arise from the day to day operation of the quarry in terms of section 16 of the Resource Management Act 1991. A copy of the NMP shall be retained at the quarry and the Manager Southern Resource Consents and Compliance and the chair of the Quarry Community Committee shall each be provided with a copy by the Quarry Operator.

iii. The NMP shall be reviewed by the Quarry Operator annually or when significant changes to the management of the quarry are proposed which warrant its review.

During any review the Quarry Operator shall consult with the Quarry Community Committee and the Manager Southern Resource Consents and Compliance about the review and any proposed consequential amendments to the NMP. Upon completion of any such review, the Manager Southern Resource Consents and Compliance and the chair of the Quarry Community Committee shall each be provided with an updated copy of the NMP by the Quarry Operator.

vi. The NMP shall record that:

- i. the NMP applies in respect of quarry activities authorised by Designation 620 in the Auckland Council Unitary Plan;
- ii. the parties to RMA 1566/98 acknowledge that the NMP and these conditions relating to the NMP should not be used as a precedent in respect of any other situation or land use authorisation.

v. The Quarry Operator shall maintain and keep a register of all complaints received about quarry noise. The register shall, where practical, record the following information:

- Time and date of complaint;
- Nature of complaint;
- If practical, resulting noise level;
- Action taken;
- Weather conditions at time of complaint; and
- If there was any follow up with person complaining.

The Quarry Operator shall provide copies of the entries in the register to the Manager Southern Resource Consents and Compliance forthwith upon request.

vi. Following receipt by the Council of any complaint, which in the opinion of the Manager Southern Resource Consents and Compliance may be justified, the Quarry Operator shall, if directed in writing by the Manager Southern Resource Consents and Compliance, commission a suitably trained person to undertake sufficient monitoring to demonstrate whether or not there is compliance with the above noise levels and/or the NMP; and outlining any reduction measures or remedial work that may be required to ensure compliance. Such a report shall be provided within 14 days of a request by the Council weather permitting, or within such further time as the Manager Southern Resource Consents and Compliance may approve in writing.

i. Hours of Operation

The hours of operation for the quarrying activity shall be as follows:

Hours of work:	0700–1800	Monday to Friday
	0700–1700	Saturday
	0730–1700	Sunday (emergencies only)
Hours of load-out:	0700–1800	Monday to Friday
	0700–1700	Saturday
	0730–1500	Sunday (emergencies only)

The quarry may load out to 21:00 hours Monday to Saturday up to 20 days per annum. Each such occurrence shall be reported to the Quarry Community Committee. Where it is intended to load out up to 21:00 hours every effort should be undertaken to advise representatives of the community, eg the Whitford Residents & Ratepayers Association of the extended hours of the load-out. Administrative functions and equipment maintenance may commence at 6.30am Monday to Saturday.

For the purpose of this condition "load-out" means the loading of trucks with quarried material and the subsequent departure of those trucks from the quarry.

j. Community Committee

The Quarry Operator shall:

- i. Consult with tangata whenua, representatives of local residents (Including the Whitford Residents and Ratepayers Association) and industry representative to facilitate the establishment of a Community Committee (or a Joint Committee for the Quarry and Whitford Landfill) as soon as practicable comprising up to five representatives of those groups, a representative of the Quarry Operator and up to two representatives of the Council.
- ii. Ensure, as far as practicable, that those living in close proximity to the landfill and those living in the broader Whitford Community are represented on the Committee.
- iii. Discuss matters relevant to the quarry including, but without limitation, concerns and complaints of residents and aspects of non compliance and ways of alleviating them.
- iv. Disseminate information to the Committee about the quarry and about any future proposals for the quarry.
- v. Ensure its representative attends meetings of the Committee which should be held on a quarterly basis or more frequently if requested by the Council's Manager Southern Resource Consents and Compliance.
- vi. Ensure its representative attend any mediation held at the request of the Councils representative in the event of disagreement between the Quarry Operator and members of the Committee over matters relating to the quarry.

k. Miscellaneous

The Quarry Operator must obtain all necessary permission from the appropriate controlling authorities for all works associated with the development not covered by the designation.

I. Topsoil

No topsoil shall be disposed of by sale or otherwise permanently removed from the site except as may be specified in the Quarry Management Plan and approved by the Council.

m. Discharges to Air

(Refer to ARC Consent No. 30897)

n. Depth of Quarrying

The quarrying activity within the designated area shall not extend below the RL45 level.

o. Ecological Mitigation of the Quarry Extension and the Back-Batter Area

Prior to the clearance of vegetation within the additional 3.6ha of land designated for quarrying area or within 6 months of the designation being confirmed, whichever occurs first, an ecological mitigation plan shall be prepared by suitably qualified and experienced ecologists and submitted by the Requiring Authority to the Manager Southern Resource Consents and Compliance. The approved plan, subject to any additions and alterations inserted by the Manager, shall be implemented by the Requiring Authority to the satisfaction of the Manager Southern Resource Consents and Compliance.

Measures addressed by the plan shall include, but not be limited to:

- i. A comprehensive survey of the wildlife in the habitat.
- ii. The preparation of a revegetation plan in order to establish adequate growing conditions for the replacement planting of suitable native species on the 1.5ha "back batter" area as illustrated on Figure 5.9. The revegetation of the back batter area is to include enrichment planting of a mix of taraire and puriri saplings numbering no less than 160 individual trees to partly mitigate for the loss of a similar number of mature food trees associated with the quarry expansion.
- iii. The preparation of a planting programme outlining the number and location of plants to be established on year by year basis and the implementation of a maintenance regime.
- iv. Undertake all vegetation alteration and clearance in accordance with accepted arboricultural practise and with suitable expert supervision. When undertaking the vegetation clearance, the stumps and leaf litter shall be left in situ. The cleared areas shall be covered with the mulched material sourced from the cleared tea-tree. Following this site preparation, specific areas can then be excavated of their overburden.
- v. Undertake the proposed vegetation clearance outside of the Kereru breeding season.
- vi. As far as practicable undertake excavation of the overburden outside of the kereru breeding season in order to reduce noise disturbance on nesting pairs.
- vii. A lizard salvage operation shall be undertaken, under the supervision of a suitably qualified herpetologist prior to the vegetation clearance with the release being into the adjoining forest area. Following the lizard rescue, the mature trees within the quarry extension footprint can be felled so that any uncaptured lizards can escape into the surrounding vegetation. The felled trees shall be left for at least two days prior to mulching or removal. A summary of the lizard salvage report, listing species

numbers and locations, shall be forwarded to the Auckland Council and the Biodiversity team - Environmental Services.

viii. Prior to any such overburden excavation, the top-soil (and composting mulch) in these areas shall be harvested and stored for subsequent use in the revegetation plantings.

ix. Revegetate all newly created edges with a dense planting of hardy pioneer species. Use the existing shrubby edges as a guide regarding which species to use in this exercise. Maintain these edges for the duration of the quarry, including weed control and replacement of mortalities.

x. Revegetate the completed back-batter slope with indigenous vegetation as soon as the finished slopes become available. Following establishment of a nursery crop of hardy pioneer species on this back-batter, undertake enrichment planting here, which shall include a mixture of taraire and puriri saplings numbering not less than 160 individual trees

xi. Construct a low wind fence along the newly created bush edges in order to provide medium-term protection to the habitat interior. A fence with a minimum height of 1.5m shall be provided, reinforced by the planting of fast-growing native shrubs (such as kanuka, mapou and kohuhu) with a mixture of species such as totara to serve as long-term wind protection.

xii. The Quarry Operator shall plant and the Requiring Authority shall maintain and use its best endeavours to ensure the growth of approximately 1.2 hectares of additional native bush within the area identified as 'Bush Protection Area/Landfill Zone 2' on Figure 5.9, for the purpose of providing an additional food source to the native wood pigeon/kereru (*Hemiphaga novaseelandiae novaseelandiae*). The selection of the plant species, the planting plan and maintenance arrangements will be developed in consultation with the Whitford Quarry Community Committee.

p. Weed and Pest Control Programme — Designated Land and Conservation Covenant

A weed and pest — animal control programme, for both the land designated 'Quarry' and the areas subject to the Conservation Covenant (refer to Condition (d)) shall be submitted by the Requiring Authority to the Manager Southern Resource Consents and Compliance for approval. The approved plan, subject to any additions and alterations inserted by the Manager, shall be implemented by the Requiring Authority to the satisfaction of the Manager Southern Resource Consents and Compliance.

The weed and pest control programme shall include:

i. A programme that has targets aligned with the council's biosecurity targets This shall include weed control operations on the newly created margins of bush on at least four occasions per year, and an annual pest and predator control operation targeting possums, mustelids, rodents and feral cats.

ii. Controlling and maintaining possum levels to below 5% Residual Trap Catch (RTC) within the proposed covenants areas and liaise with the council's Biosecurity section, regarding the most effective methods of pest control,

iii. Eradicate pest plants, as defined and listed in the ARC's (2002) Auckland Regional Pest Management Strategy 2002–2007, including environmental weeds.

iv. Eradicating or excluding goats and stock from within the proposed covenant areas

v. Liaise with the other landowners of the Waikopua Bush (and DOC and Auckland Council bio-

security) and attempt to include the entire Waikopua Bush in the weed, pest and predator control operations.

vi. The preparation and implementation of a monitoring programme by suitably qualified and experienced ecologists to assess the implementation of the mitigation works and of the effectiveness of the proposed treatments along the newly created forest margins in terms of minimising the intrusion of edge effects;

vii. Monitor the effectiveness of the weed and pest control programme, including:

- The success of the revegetation of the finished back-batter;
- The success of the weed control and pest-animal control programmes;
- Any effects of the quarry extension on the immediately adjacent bush blocks in terms of water-related stress;
- Any effects of the quarry extension on the immediately adjacent bush blocks in terms of dust-related stress;
- Any effects of the quarry extension on the biota and values of the streams in both the Claude Stream and Hog Hill catchments.

q. Stabilisation of Cultural Heritage Sites

Prior to any earthworks or construction activity within the zone of instability (a 100m radius from the crest of the pa site as delineated on Figure 5.9), or within 6 months of the designation being confirmed, whichever occurs first, the Requiring Authority shall undertake a geotechnical and archaeological investigation of the zone of instability. The investigation shall be undertaken in accordance with the letter from Riley Consultants dated 11 November 2005, in order to determine the remedial measures required to ensure the stabilisation of the pa site and the adjacent land (when used for its intended purpose). The required stabilisation works shall be implemented prior to any earthworks or construction activity commencing in the area identified as being within the zone of instability. The remedial works shall be undertaken to the satisfaction of the Manager — Resource Consents and Compliance,

r. Protection of Cultural Heritage Items

The Quarry Management Plan shall incorporate suitable measures for monitoring and avoiding adverse effects on cultural heritage items, including but not limited to the following:

- i. The protection of the pa site RI I/333 to the southwest of the quarry extension area in accordance with accepted archaeological practice and which is to be protected from damage by quarrying activities and any encroachment of heavy machinery.
- ii. The quarry expansion area shall be field checked for archaeological evidence after vegetation clearance and prior to earthworks.
- iii. The Involvement of Ngai Tai Umupuia in the identification and management of cultural heritage sites.
- iv. If subsurface archaeological evidence should be unearthed during construction (e.g. intact shell midden, hangi, storage pits relating to Māori occupation, or cobbled floors, brick or stone foundation, and rubbish pits relating to 19th century European occupation), work should cease in the immediate vicinity of the remains and the council, Historic Places Trust and tangata whenua should be contacted so that appropriate action can be taken. This includes such persons being given a reasonable time to record and recover archaeological features discovered before work may commence.
- v. If modification of an archaeological site is necessary, an Authority to Modify must be applied for under Section 11 of the Historic Places Act 1993 in addition to any required approval of the council.
- vi. In the event of human remains being uncovered, work shall cease in the immediate vicinity and the tangata whenua, Historic Places Trust and NZ Police should be contacted so that appropriate arrangements can be made.

s. Annual Survey of Face and Batter Slope Stability

An annual review of face stability shall be undertaken by an engineering geologist to assess defect aspects, and the safety of geological conditions against the model used by Riley Consultants Ltd in their report dated 27 July 2005 and contained in Technical Appendix 2 of Volume Two of the Requirement.

t. Landscape Mitigation

- i. Quarry activities shall not lower the height of the existing water tank ridge/saddle (that are to be defined by a survey of the land undertaken in consultation with the owners of the property at 382 Ara Kotinga Rd, Whitford), south of the new stockpile area.
- ii. Additional screen planting shall be undertaken to the west of the new stockpile area. Planting shall be undertaken in consultation with the Whitford Quarry Committee within 24 months of this designation being confirmed.

u. Expert Advisory Fund

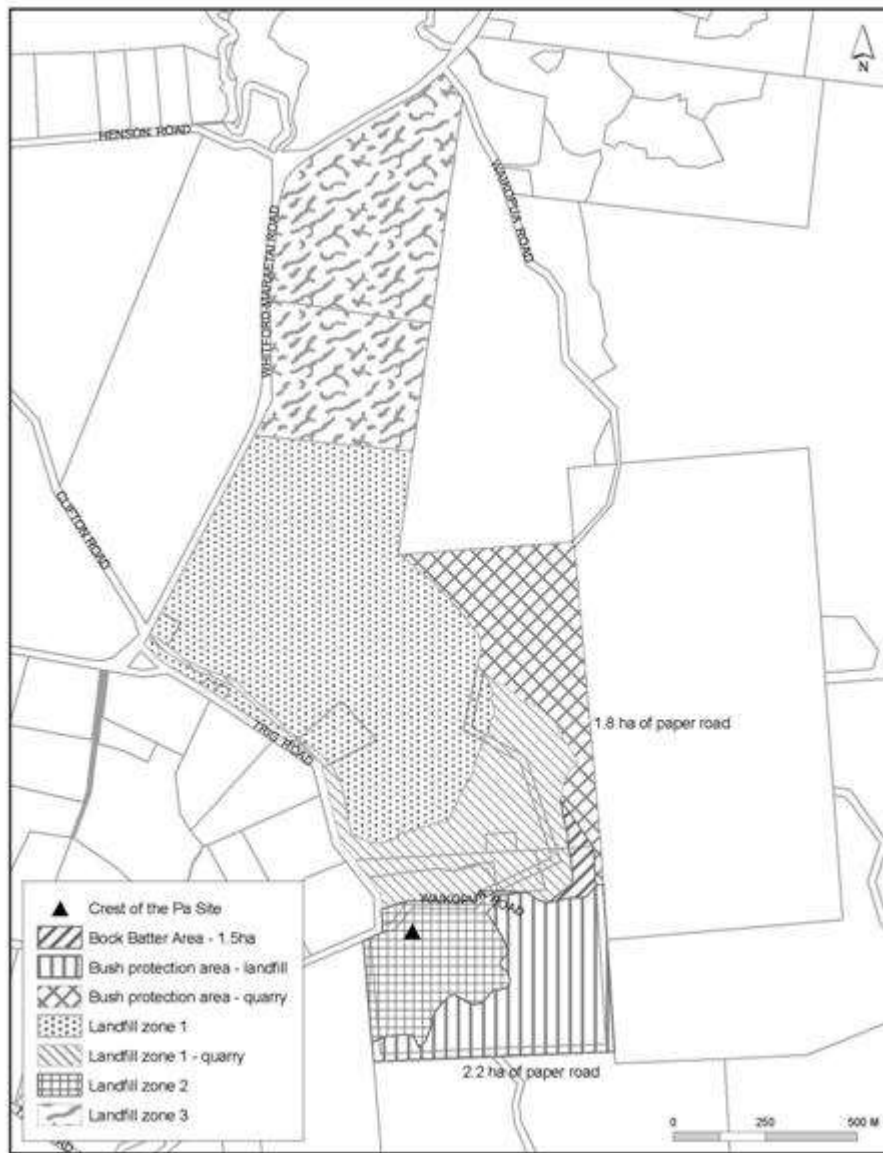

The Requiring Authority shall pay for the Whitford Quarry Community Committee to engage technical experts to review technical documents and report back to the Committee, to a maximum sum of \$10,000 (CPI adjusted) in any one calendar year.

v. Supply of Cover Material

Wherever practicable, cover material shall be supplied to the Whitford Landfill by utilising empty quarry trucks. Details regarding volumes of cover material supplied to the landfill shall be reported to the Whitford Quarry Community Committee on a quarterly basis. For the avoidance of doubt, the truck movements referred to in this condition will be counted as quarry truck movements.

Figure 5.9 - Whitford Quarry Joint Landfill / Quarry Area

Designation 620 Whitford Quarry joint landfill/quarry area

621 Bells Road Parks Depot

Designation Number	621
Requiring Authority	Auckland Council
Location	2R Bells Road, Pakuranga
Rollover Designation	Yes
Legacy Reference	Designation 227, Auckland Council District Plan (Manukau Section) 2002
Lapse Date	Given effect to (i.e. no lapse date)

Purpose

Depot.

Conditions

1. Any works are to be undertaken in accordance with section 4.2.1.2 Parking, loading and access of the Unitary Plan.
2. Before any works, including new buildings, are undertaken an outline plan of works shall be submitted to Council as per the requirements of section 176A of the Resource Management Act 1991. The outline plan of works shall show those matters required by section 176A. All works shall be undertaken in accordance with the outline plan.

622 Popes Road Stormwater Pond

Designation Number	622
Requiring Authority	Auckland Council
Location	2 and 22 Popes Road, Takanini
Rollover Designation	Yes
Legacy Reference	Designation 47, Auckland Council District Plan (Papakura Section) 1999
Lapse Date	15 years from being operative in the Unitary Plan unless given effect to prior

Purpose

Construction, operation and maintenance of a stormwater pond to provide stormwater treatment and disposal.

Conditions

General

1. Any development or redevelopment authorised by this designation is subject to the Outline Plan of Works requirements in section 176A of the Resource Management Act 1991 and shall be carried out in accordance with the conditions of this designation and recommendations in the subsequent Outline Plan of Works.

2. The works to give effect to the designation shall be generally in accordance with the plans and information submitted by the Requiring Authority in support of the Notice of Requirement for construction, operation and maintenance of a stormwater management pond including:

- Designation Plan "Proposed Designation Plan" prepared by Hosken Associates, dated 29/07/09;
- Sub-catchment Plan "Plan of Sub-catchments and Existing Stormwater Drainage" prepared by Fraser Thomas, undated;
- Infrastructure Report "Takanini Structure Plan Area 6 Limited, Infrastructure Report – Plan Change Copy, Private Plan Change Proposal for Takanini Areas 6A and 6B of the Papakura District Plan", prepared by Fraser Thomas, dated March 2009; and
- Geotechnical Report "Proposed Stormwater Pond at Area 6A and 6B Takanini", prepared by Coffey Geotechnics, dated August 2008.

3. The spatial extent of the designation shall be in accordance with the area shown on the designation plan submitted with the Notice of Requirement entitled *Proposed Designation Plan* by Hosken Associates, dated 29/07/09 and shall be illustrated on the planning maps. Upon survey of the site for land purchase, the spatial extent of the designation shall be accurately defined. If the spatial extent of the designation differs, if necessary, the provisions of Section 181 of the Resource Management Act 1991 will apply.

4. In addition to the information required to be provided pursuant to Section 176A of the Resource Management Act 1991, the Requiring Authority shall provide detailed design of the stormwater management pond with the application for the Outline Plan of Works for the development that includes:

- The provision of extended detention and stormwater attenuation for the 50% AEP event, including the provision of peak flow control and discharge to the Papakura Stream for the full range of operating

- levels in the pond and the range of stream levels within the Papakura Stream to ensure that erosion effects on the Papakura Stream are eliminated or minimised;
- b. An assessment of the effects of discharge from the pond from high intensity storm events, where the base flow in the Papakura Stream is relatively low;
 - c. Details of a mechanism or shut off valve system to be installed at the outlet that can be manually activated in the event of a spillage of contaminants within the contributing catchment;
 - d. Design of the associated overland flow paths and stormwater network leading to the pond to establish any critical levels on incoming pipes that have a potential impact on pond operational levels;
 - e. Details showing that the design of the pond outfall does not interfere with the proposed Watercare watermain to be constructed within the immediate stream banks of the Papakura Stream and that this shall not affect the operating levels of the pond;
 - f. Details showing that the water level in the stormwater management pond allows drainage into the Papakura Stream without the need for pumping and allows stormwater from the contributing catchment to drain into the stormwater management pond without causing suspended materials to settle in the stormwater pipes; and
 - g. An assessment demonstrating how the design incorporates the Ministry of the Environment guideline recommendations for climate change to year 2090.

5. At the completion of works for the construction of the stormwater management pond, the Requiring Authority shall provide as-built plans to the Auckland Council for approval by the Team Leader Resource Consents: Southern Resource Consenting and Compliance. The as-built plans shall include (but are not limited to):

- a. The surveyed location (to the nearest 0.1m) and level (to the nearest 0.01m) of the treatment devices, with co-ordinates expressed in terms of the New Zealand Map Grid and LINZ datum;
- b. Documentation of any discrepancies between the design plans and the as-built plans;
- c. The location, dimensions and levels (including cross sections and long sections) of the associated major overland flow paths; and
- d. Plans and cross sections of all stormwater management devices, including confirmation of the water quality volume, storage volumes and levels of any outflow control structure. The plans and cross sections shall provide sufficient details of the stormwater management devices to enable them to be compared to the design plans.

Earthworks

6. In addition to the information required to be provided pursuant to section 176A of the RMA, the Requiring Authority shall provide the following information with the application for the Outline Plan of Works for the development of the stormwater management pond to address earthworks:

- a. Confirmation of the location for stockpiling and disposal of excess fill and appropriate erosion and sediment controls to control runoff and mitigate and prevent soil erosion and sediment loss from stockpiling the excess fill;
- b. Conceptual erosion and sediment control plans and methodologies to control runoff, mitigate and prevent soil erosion and sediment loss; and
- c. A comprehensive dust management and mitigation plan to minimise dust generation and dispersal.

Noise

7. Noise from construction activity shall not exceed the limits recommended in, and shall be measured and assessed in accordance with, New Zealand Standard NZS 6803: "Acoustics- Construction Noise".

Traffic

8. The temporary vehicle access shall be constructed in accordance with the layout shown on the

designation plan submitted with the Notice of Requirement entitled *Proposed Designation Plan* by Hosken Associates, dated 29/07/09, and the engineering and construction standards set out in the relevant Auckland Council District Plan and Development Code.

9. The temporary vehicle access shall be removed when the internal road network is constructed.

10. In addition to the information required to be provided pursuant to Section 176A of the Resource Management Act 1991, the Requiring Authority shall provide a Traffic Management Plan to the Auckland Council Team Leader Resource Consents: Southern Resource Consenting and Compliance for construction traffic associated with the development of the stormwater management pond. The Traffic Management Plan shall include (but is not limited to) methods for managing the effects of construction traffic to and within the site and shall include information regarding the frequency, number of movements and proposed routes.

Landscaping

11. Landscaping of the pond edges and requirement area shall be provided. A detailed landscape management plan showing details of plant species, spacing and planting program shall be submitted with the application for the Outline Plan of Works for the development of the stormwater management pond. The landscape management plan shall be to the satisfaction of the Auckland Council and shall:

- a. Be in general accordance with the Takanini Sub-precinct 1 - Landscape Concept Overlay Plan, Existing Vegetation Plan, Takanini Structure Plan Area 6 (or equivalent Unitary Plan provision);
- b. Be in general accordance with recommendations 6 and 12 of the Cultural Values Assessment, Prepared by Te Roopu Kaitiaki O Papakura, dated December 2007.
- c. Include provisions and methods to ensure landscaping works do not interfere with overland flow paths.

12. The Landscape Management Plan shall be implemented within the first planting season following the completion of works on the site, or the operation of the stormwater management pond, whichever is sooner.

Maintenance and Monitoring

13. An Operational Maintenance Manual shall be prepared for the designation area and shall be submitted with the application for the Outline Plan of Works for the development of the stormwater management pond. The Operational Maintenance Manual shall be to the satisfaction of the Auckland Council. All maintenance works shall be undertaken in accordance with this manual. The Operational Maintenance Manual shall address the following maintenance requirements:

- a. Removal of litter, debris or pollution affecting the pond and outlet structures or causing blockages;
- b. Removal of sediment from the forebay areas as required (approximately once every 3-5 years);
- c. Removal of sediment from the base of the pond on an infrequent basis (approximately once every 20-30 years);
- d. Drying and testing of removed sediment on site and transportation of sediment to an approved landfill;
- e. Aesthetic maintenance (for example landscaping, grass mowing, tree pruning, litter control, erosion monitoring); and
- f. The management of pests (for example Mosquitoes and Flies).

Heritage

14. Where evidence of an archaeological site, taonga, koiwi waahi tapu, or artefacts is discovered whilst undertaking site works, works shall cease immediately and the Council, Tangata Whenua and the New Zealand Historic Places Trust shall be notified.

15. Construction activity shall only occur between the hours of 8.00 am and 5.00pm Monday to Friday excluding public holidays.

Designation 622 - Proposed Designation Plan

623 Takanini Stormwater Conveyance Corridor

Designation Number	623
Requiring Authority	Auckland Council
Location	Takanini, within blocks surrounded by: Walters, Cosgrave, Grove and Old Wairoa Roads; Hamlin, Cosgrave and Old Wairoa Roads; and Old Wairoa, Papakura – Clevedon and Cosgrave Roads specifically: Lot 1 DP21849, Lot 2 DP21849, Lot 4 DP188918, Lot 2 DP 55480, Lot 3 DP55480, Lot 2 DP159502, Lot 1 DP69608, Lot 2 DP69608, Lot 200 DP490095; 50 metre section of Cosgrave Road adjacent to 84 Cosgrave Road 25 metre section of Old Wairoa Road east of Ancroft Street
Rollover Designation	Yes
Legacy Reference	Designation 48, Auckland Council District Plan (Papakura Section) 1999
Lapse Date	9 March 2027

Purpose

To construct, operate and maintain a stormwater corridor (including a channel for the conveyance of stormwater, planting and provision for pedestrian footpaths and cycleways in an area of public open space) to convey the 1 per cent AEP* storm event flows from the upper Papakura Central Catchment to the McLennan Wetland *AEP means Annual Exceedance Probability (AEP), where the 1% AEP storm event is the probability of exceeding a given flood event level within a period of a year, where there is a 1 per cent chance or greater probability of flooding occurring in an area in 1 year.

Conditions

1. Except as modified by the conditions below and subject to final detailed design, the works are to be undertaken in general accordance with the information provided by the Requiring Authority in the Notice of Requirement dated 26 August 2014 and the supporting documents being:
 - a. Takanini Stormwater Conveyance Corridor – Assessment of Effects (Volume One, dated July 2014) and associated errata memorandum
 - b. Takanini Stormwater Conveyance Channel Infrastructure Report and associated technical assessment reports (Volume 2, dated July 2014)

Note: flooding, land take, and landscape and amenity effects are covered only in the Notice of Requirement. All other matters including the technical reports on settlement, archaeology and construction have been updated by documents lodged with the associated resource consent applications prepared by Hill Young Cooper Limited dated April 2016, and referenced by the Council as R/LUC/2016/449, R/REG/2016/450, R/REG/2016/451, and R/REG/2016/452.

- c. Plan sets:

- i. “Proposed Stormwater Channel Land Take Plan”, Figure 3, revision K, plan prepared by GHD, job number 51-31962-00, dated 25 August 2014, in Volume One Appendix 2 of the notified Notice of Requirement
 - ii. “Proposed Stormwater Channel Layout and Designation Extent”, Appendix M2, revision D, plan prepared by GHD, job number 51-31962-00, dated 24 July 2014, in Volume One Appendix 1 of the notified Notice of Requirement.
2. The Requiring Authority must not commence works until the necessary resource consents have been granted for the relevant stage of works.

Advice Note:

Any potential adverse effects arising from the physical works will be considered through the appropriate resource consent process.

3. Prior to construction of any stage of the project commencing an Outline Plan of Works must be provided to the Council under section 176A of the RMA and is to include the following Management Plans for the relevant stage(s) of the project:
 - a. Environmental Management Plan;
 - b. Landscape and Planting Plan;
 - c. Management Plans required for each of the approved regional consents:
 - i. Construction Management Plan;
 - ii. Construction Traffic Management Plan;
 - iii. Construction Noise Management Plan;
 - iv. Contaminated Land Management Plan;
 - v. Erosion and Sediment Control Plan;
 - vi. Groundwater and Settlement Monitoring and Contingency Plan;
 - d. Operation and Maintenance Plan.
4. The Requiring Authority must undertake consultation with adjacent landowners as part of the detailed design of the project and a summary of that consultation is to be included as part of any Outline Plan of Works.
5. As soon as practicable following commissioning of the project, in consultation with the Council the Requiring Authority must :
 - a. Review the designated area and identify any areas of designated land that are no longer necessary for the ongoing operation, maintenance, renewal and protection of the stormwater channel and associated structures and activities including the recreational and amenity spaces to be located in the corridor;

- b. Identify any areas of the designation within the road reserve that are no longer necessary as the completed infrastructure is otherwise provided for and adequately protected by provisions of the Local Government (Auckland Council) Act 2009 and Utilities Access Act 2010;
- c. Give notice to the Council in accordance with section 182 of the RMA for removal of those parts of the designation identified in (a) and (b) above (including any relevant conditions or parts of conditions); and
- d. Provide as-built plans to the Council's Team Leader, Compliance and Monitoring, Resource Consents.

Advice Note:

The Requiring Authority may allow developers of adjacent land to locate temporary stormwater treatment devices in the designated area prior to construction of public works with the approval of the Auckland Council – General Manager - Healthy Waters. The Requiring Authority may allow developers of adjacent land to construct public local roads in the designated area subject to approval by the Auckland Council – General Manager - Healthy Waters and subject to the approval of Auckland Transport as road controlling authority and in accordance with Auckland Transport's specifications.

Mana whenua

- 6. The Requiring Authority is required to undertake consultation with Ngati Tamaoho, Te Ākitai, and Ngāti Te Āta as part of the detailed design of the project and a summary of this consultation must be included as part of the Outline Plan of Works.

Advice Note:

Each of Ngāti Tamaoho, Te Ākitai, and Ngāti Te Āta may choose to nominate a representative to act on behalf of interested Mana Whenua groups as "the kaitiaki".

Environmental management plan

- 7. An appropriately qualified ecologist is to be engaged at each stage of the project (i.e. detailed design, pre- and post-construction) to undertake an assessment to determine ecological values, including conducting field investigations, and to identify appropriate environmental design considerations to avoid or to mitigate potential ecological effects and where possible to enhance ecological values.
- 8. An Environmental Management Plan must be prepared and submitted as part of any Outline Plan of Works and subsequently implemented to address the following matters:
 - a. Enhancement of habitat and ecological value of the conveyance channel through incorporation of ecologically sensitive design principles;
 - b. Maintenance of a minimum base flow to provide for potential fish habitat;
 - c. A lizard management plan;

- d. Options to manage weed and pest species in the designated area; and
- e. Operational and maintenance requirements to ensure ongoing establishment and enhancement of ecology in the channel.

Advice note:

The Environmental Management Plan will incorporate the requirements of any conditions of the resource consents that may be required for the project.

Landscape and planting plan

- 9. A Landscape and Planting Plan is to be prepared by a registered landscape architect and submitted as part of any Outline Plan of Works to demonstrate how the corridor will enhance landscape character and amenity values, including safety. A Landscape and Planting Plan may be prepared for each of the four stages of the project, provided that an overall concept plan is provided for the Outline Plan of Works considerations. The Landscape and Planting Plan(s) must include the following matters:

- a. Provide for a naturalised channel through use of appropriate materials and form including a meander in the low flow channel where possible and an asymmetric approach to the planting design;
- b. Integration of the channel structures (including the weir structures) with the open space environment and of the corridor with adjacent development;
- c. Connection, accessibility and movement across the channel including analysis responding to any known development plans showing the location of bridges and connections;

Advice note:

The TSCC road crossings should include a minimum of two crossing points along the east/west alignment of the corridor (one between Grove and Cosgrave Roads and one between Cosgrave and Old Wairoa Roads) and a minimum of one crossing point along the northern branch.

- d. Provision for footpath and cycleways in the designated area including multiple crossing points to encourage connectivity between areas and to provide accessibility to key destination points;
- e. Provision of amenity spaces that are suitable for passive and active use;
- f. Identification of plant species, their size and proposed locations;

Advice note:

The plant species should be appropriate to the final soil and hydrological conditions as well as ensuring that the selected species do not significantly restrict flows.

- g. Location and details of all hard landscaping including dimensions and specifications;
- h. Methods to ensure public safety within the designation area including discouraging access during heavy rainfall, and any signage requirements;

Advice note:

Fencing should generally be avoided, but where required should be as low and open in design as possible. Fencing design should contribute to the overall landscape design aesthetic and support positive CPTED (Crime Prevention Through Environmental Design) outcomes.

- i. Incorporate the results of consultation, including with (but not limited to) landowners, Mana Whenua, and Auckland Transport; and
- j. Indicate how positive urban design outcomes will be enabled, with particular regard to the following:
 - Facilitating and encouraging a positive interface with existing and potential adjacent developments;
 - Supporting wider connectivity and safety for walking and cycling routes;
 - Design that reflects the local context (current, historical and cultural);
 - Creation of useable amenity spaces;
- k. Location, design and integration of all maintenance access points and elements.

The Landscape and Planting Plan(s) must take account of ongoing maintenance requirements to ensure hydraulic flows are to be implemented, as required by the Operations and Maintenance Plan required by these conditions.

The approved Landscape and Planting Plan(s) must be implemented on completion of the works for each stage of the project.

- 10. A Crime Prevention Through Environmental Design analysis prepared in collaboration with the Auckland Council Community Facilities Department must be provided demonstrating how the design will ensure surveillance is maintained and entrapment spots and visual obstructions are eliminated, including appropriate provision of lighting. The analysis must be submitted as part of the Outline Plan of Works and implemented as part of the approved Landscape and Planting Plan(s).
- 11. Design plans for any permanent at grade and above ground structures are to take account of the following matters:
 - The location, landscape setting and adjoining land uses;

- The layout, architectural form and detail, and use of a consistent and appropriate palette of materials, to ensure these elements are visually recessive;
- The configuration of multiple surface elements to minimise their prominence and visual clutter;
- The use of materials which are sufficiently robust and which minimise the potential for graffiti and/or vandalism; and
- Landscaping to integrate with development of the local reserve and adjacent subdivisions.

12. The Requiring Authority is to consult with Auckland Transport at the detailed design stage to identify opportunities for walkway and cycleway connections within the designated area and to confirm design standards for walking, cycling and vehicle access.

Construction noise and vibration

13. All construction and earthworks activities are to comply with the New Zealand Standard 6803:1999 for Acoustics – Construction Noise.

14. All construction and demolition activities are to comply with the limits set out in Table 1 of German Standard DIN 4150 Part 3:1986 “Structural Vibration in Buildings – Effects on Structures.”

Operation and Maintenance Plan

15. An Operation and Maintenance Plan must be prepared and implemented for operation and maintenance of the stormwater conveyance channel and provided with the Outline Plan of Works. This Plan is to include:

- a. Structural integrity and function checks (weirs, culverts, inlets/outlet, etc.)
- b. Inspections checking scour/erosion and associated maintenance and remedial work requirements
- c. Sediment monitoring and removal
- d. Planting maintenance plan
- e. Weed and pest control
- f. Litter and gross solids removal
- g. Measures to counter graffiti and vandalism
- h. Investigation of any unnatural discoloration, odour, staining issues, etc.
- i. Additional inspections following heavy rainfall events.

Network utility operators

16. The Requiring Authority must consult and collaborate with network utility operators which have existing assets in the designation area through the design to construction stages of the works to ensure that critical services are not disturbed. Where this cannot be achieved then consideration must be given to minimising any disturbance on the functioning of the existing asset. If required, any temporary diversion of assets is to be agreed with the relevant network utility operator.
17. A summary of the communication and consultation undertaken between the Requiring Authority and network utility operators is required to be provided as part of any Outline Plan.
18. Pursuant to section 176(1)(b) of the RMA no person may do anything in relation to the designated area that would prevent or hinder the designation without the prior written consent of the Requiring Authority. The following activities will not prevent or hinder this designation and may be undertaken prior to, during construction, and after construction without seeking the Requiring Authority's written approval under section 176(1)(b):
 - a. Regular operation, maintenance and repair works for the network utilities existing at the date this designation was approved;
 - b. Minor renewal works to the existing network utilities necessary for the ongoing provision or security of supply by network utility operators; and
 - c. Upgrades to the existing network utilities in the same location and with the same or similar effects on the designation and works as existed at the date the designation was approved.
19. Access for network utility operators to undertake emergency works within the designation area may be undertaken without the need for express written approval but the Requiring Authority must be advised in writing as soon as possible of any emergency works that could prevent or hinder the designated works and the Requiring Authority is to advise the relevant network utility operator(s) to seek approval if the works are ongoing.

Advice Note:

Any requests for prior approval under section 176(1)(b) of the RMA are to be made to: the Auckland Council – General Manager - Healthy Waters.

20. The Requiring Authority is to consult with Watercare Services Ltd ("Watercare") throughout the detailed design of the stormwater conveyance corridor regarding the crossing or diversion of Watercare's trunk watermain along Cosgrave Road, and must:
 - a. Ensure the design is in accordance with Watercare's standards and does not preclude a second Watercare pipeline in the designation area;
 - b. Begin consultation at the initial stage of the detailed design phase; and
 - c. Obtain Watercare's approval prior to commencing construction of the section of the project that may affect the trunk watermain.

21. The Requiring Authority is to provide for any measures to support the Watercare trunk watermain physically throughout both the construction phase of the project and post-construction.
22. The Requiring Authority is to collaborate with Watercare to ensure that a second trunk watermain pipeline across the designation area is designed to minimise any effects on the operation of the stormwater asset. The Requiring Authority must provide Watercare with all necessary approvals to erect and to operate the watermain pipeline in a reasonable timeframe.

Advice Note:

The Requiring Authority acknowledges that Watercare proposes to construct a second trunk watermain pipeline through this area and that the watermain is likely to cross the stormwater designation.

Works in the road reserve

23. The Requiring Authority must consult and collaborate with Auckland Transport and network utility operators which have existing assets in the road reserve through the design to construction stages of the works to:
 - a. Design the works to avoid restrictions on normal road rehabilitation, maintenance and upgrading including, but not limited to, excavation below the existing sub-grade of the road as part of repairs and/or full reconstruction of road pavement, drainage, the erection of transport and utility related structures within the road reserve, and the disturbance of soil and/or sub-base;
 - b. Where (a) cannot be achieved then consideration must be given to the stormwater asset being appropriately protected to prevent damage being caused by Auckland Transport and/or network utility operators carrying out normal maintenance activities;
 - c. Obtain any required approvals under relevant legislation or standards for works carried out in close proximity to the assets; and
 - d. Undertake ongoing communication and consultation with network utility operators and Auckland Transport as soon as reasonably practicable (and at least once prior to the construction timing and methodology being confirmed, and construction duration being finalised), and throughout the duration of construction. Identify any changes to the project that may affect network utility and transport operations to ascertain whether or not any changes or updates to the Construction Management Plan are required to address unforeseen effects relating to the National Code of Practice for Utility Operators Access to Transport Corridors 2015.
24. The Requiring Authority must consult with Auckland Transport as the corridor manager and use its best endeavours to ensure any construction or future upgrade or maintenance works on the stormwater channel in the road corridor are programmed and coordinated with any maintenance and upgrade works programmed for roads and planned work on any network utility operator assets in the corridor.

Advice Note:

The Requiring Authority is expected to follow the processes in the National Code of Practice for Utility Operators' Access to Transport Corridors 2015.

For the avoidance of doubt, an 'existing network utility' or 'existing road' includes infrastructure operated by a network utility operator or Auckland Transport which was:

- In place at the time the notice of requirement was served on the Auckland Council; or*
- Undertaken in accordance with these conditions or the section 176(1)(b) RMA process.*

Alternative access

25. The Requiring Authority must ensure that an alternative vehicle access is provided at 91 Grove Road to replace the access that is to be removed for construction of the channel. The appropriate location for this alternative vehicle access is to be determined in agreement with the owner(s) of 91 Grove Road. Evidence of this agreement is to be provided to the Council as part of the relevant Outline Plan of Works for that stage of the project.
