

E22. Artworks

E22.1. Background

Artworks provide an opportunity to create a sense of place, and can play a valuable role in enlivening people's experiences and the appearance of the physical environment. Artworks can be located on public space or on private property.

Artworks are encouraged, however potential effects from the location, installation or impacts from lighting and noise, particularly in open space areas, may need to be managed to avoid adverse effects on public access, navigation, public safety and amenity values.

The rules for art works are located in the relevant zone provisions.
